Page 180
"What's nice about my Starclassic Maple Kit is I get the vintage look and feel, but I get TAMA's sound—the perfect combination of old meets new."

We caught up with Chris Gaylor in Tacoma, Washington right after the band's tour of Japan. "Japan was awesome!" enthused the All-American Rejects drummer, "and the food is amazing. Right now we're going to do some radio dates. Then finally back home." Where's home? "Oklahoma! (Gaylor quickly quotes the lyrics to Rogers and Hammerstein's "Oklahoma!" "where the wind comes sweeping down the plain. We're the only state with our own musical—how cool is that!"

Oklahoma's strong Midwest marching band tradition is one reason Chris is playing drums today. "I learned to play in marching bands, which was amazingly fun. I played quad tom. That's where a lot of my playing comes from. I started band in 6th grade and took lessons until 8th when I did jazz band stuff and took lessons with an actual kit. My father was a drummer when he was in college, and we'd sit around and listen to Buddy Rich, Philly Joe Jones and Gene Krupa and look at the great pictures of their old vintage drums. I also listened to Dave Grohl a lot. He was kind of the Bonham of my era. As a matter of fact, my other favorite drummers were also playing Tama—Stewart Copeland, Bill Bruford, Kenny Aronoff—and that probably had a lot to do with my decision to go with Tama. The drums always sounded really good and consistent."

"What's nice about my Starclassic Maple kit is I get the vintage look and feel, but I get Tama's sound—the perfect combination of old meets new. It's a standard sized kit, except for the two snare drums. Which snare I play, depends on the room. I don't do anything technical like switch out the snares. I'm pretty much a meat and potatoes type guy. I'm technical when I'm playing by myself, but in a band, I figure it's best to keep it simple—most of the time."

"I can't see myself ever switching from Tama—everyone should own a Tama kit," laughs Chris. "Well, at least one! This is actually the biggest set I've had so far—i've never had a really big kit in my life, but when I sat down behind the kit with the 24" kick drum for our "Time Stands Still" video, it just felt so comfortable. Some day I'd like to have a giant kit to see what it does. Hear what it sounds like. Just a giant kit to play hard."

"The 8 x 14 G-Maple is the wicked awesome snare drum of all snare drums. You get that gigantic hallway feel, but you can still hear ghost notes on it. When I first bought the 8 x 14 brass, and we were playing small rooms, it would drown out my kick drum, it has such crack to it."
CHRIS GAYLOR

CAN REJECTS
In Ron's Memory

Dear Friends Of Modern Drummer:

You've all been so kind to us since my husband, MD publisher Ron Spagnardi, passed away on September 22, 2003. How do I begin to thank everyone for the hundreds of letters, cards, and emails that we received? Your wonderful comments have provided so much comfort to me, my daughter Lori, and our entire MD family. I want to thank you from the bottom of my heart for all of your kindness.

Ron never really thought of himself as anyone special. He just loved doing what came so naturally to him. This magazine meant the world to him. In fact, our lives revolved around Modern Drummer. Years ago, when Ron and I first started dating—and MD wasn't even a thought in his mind yet—he would often wonder where his drumming ability would lead him. Now we know.

I don't believe Ron ever realized how many people he touched in the span of MD's twenty-seven years. He was a modest man. (Right now I'm sure he's wondering what all this fuss is about.) Many will remember Ron and me coming out on stage during the MD Festivals at Montclair State University to greet everyone. The reason I always joined him on stage was because he was never one for drawing attention to himself.

That said, we would like to focus some attention on Ron with the tribute feature included in this issue. To further honor his memory, we've established a scholarship fund in his name at his alma mater, Berklee College Of Music. If you'd like to make a donation to the fund, or if you're a student interested in applying for the scholarship, please see the information on page 76 of this issue.

In closing, rest assured that we will keep Ron's dream alive in all future issues of Modern Drummer.

“We have lost an amazing man fire, unquestionably changed

For many years, MD has recognized and memorialized losses among the drumming community. However, none have hit as hard as the loss of Ron Spagnardi. Ron may not have been one of the top-rated players in the industry, but he brought something greater than chops, timing, and rhythm. He established a line of communication within our community that bonds us all. That line was able to encompass all aspects of drumming, from reading to ragtime, and from solos to solos, making each one of us a better-educated and enriched drummer.

Ron’s vision wove the fabric that helps to strengthen our community. These are the qualities of a father who holds a family together. He will be missed.

Stuart Wachtin
via Internet

What Ron created was something no “great drummer” alone could have been able to do. In fact, he succeeded in changing the lives of drummers all over the world without playing a note! When I play a gig I always think of drummers past and present, famous and not famous who have influenced me. Ron will always be one of those people.

David Drubin
Miami, FL

Aside from all that Ron gave to drummers, he also was the first major publisher to print my work. Back in the “hard copy” days, he always made sure to add a hand-written note to the acceptance letters, just saying “hi” and encouraging me to keep writing. Every drummer in the world owes Ron a great debt. Now it’s up to all of us to be “keepers of the flame.”

Ron Hefner (MD writer)
Ft. Myers, FL

With his magazine, Ron created a connection—a way for fans and basement drummers to get to know famous drummers, to gain information on products, to take lessons, and to feel the pulse and energy of being a drummer. And with the MD Festivals, Ron brought the drumming world together like nothing else had ever done before. The Festivals were never a competition, but a place for sharing ideas and approaches to the thing we love. Ron even surprised us by performing at the 1997 show, where he proved that he could swing with the best.

I first met Ron and Isabel at one of the early Festivals. Ron was a kind and gentle man who seemed to enjoy the Festivals as much as the drummers who attended did. Year after year, he and Isabel would greet me warmly, making me feel like I was one of the gang. I will miss him deeply.

Rodney Harrison
Jamaica, NY

Under Ron’s guidance and vision, MD became the percussion publication “of record,” and, indeed, the most respected. I am always honored when I’m asked to contribute something. Like Gene, Papa Jo, Max, and Buddy, Ron helped change the world of drumming. He will be missed.

Bruce H. Klauber, D., Music
(MD contributor)
Lafayette Hill, PA

I never met or knew Ron, but the vision that he pursued and eventually realized twenty-seven years ago has had—and continues to have—an immeasurable effect on musicians everywhere, and on drummers and percussionists in particular. My sincerest condolences go to this family and his extended family at Modern Drummer.

Geoff Lang
Montreal, QC, Canada

I hope Ron knew how much we love the day our MD arrives in the mail, and the joy we get from reading it. What a wonderful idea he had, and what an impact his life had on all who love drumming.

Bill Bunkers
Oak Park, IL

The drumming community has lost a pioneering spirit who gave us a voice when there was nothing there for us. Ron brought us all together, spearheading the MD Festival, and putting drum journalism on the map. Even though I never met him, I always felt that I knew him through his magazine and his books. He was—and I’m proud to say this—my drum father.

Ron, thank you for creating this wonderful magazine, which will forever stand as the legacy of a great man. You will be dearly missed by a community that you helped create.

Stuart McConaghy
via Internet
who, through his own will and creative the world of drumming forever.”

Back in the mid-1970s, when MD was nothing more than a good idea, I recall Ron running ads in the Aquarian newspaper looking for writers for “a new drum magazine.” None of us knew at that time how successful MD would become. I can think of very few individuals who have done more to promote, educate, and entertain drummers of all levels than Ron Spagnardi has. He will be sorely missed by the entire drumming community.

Bob Cianci (MD writer) Highland Lakes, NJ

From the first MD issue I ever read back in 1985, the magazine has helped to inspire, motivate, and improve my playing. None of this would have been possible if Mr. Spagnardi had not had the vision and passion to create Modern Drummer, which has led to the global community of like-minded people that we enjoy today. The positive effect of his work on our instrument and on music in general is almost immeasurable.

Dan Hill from England, via Internet

Ron was always an influential person to me, with the way he thought, wrote, and played. As a fan and devoted reader, I hope the Modern Drummer legacy will carry on brightly after this tragedy. Hopefully every drummer will keep in his or her heart what Ron tried to pass on to us during his lifetime. He was a very special person who touched many souls, including mine.

Alex Bettencourt from Portugal, via Internet

Ron took a chance in 1977 and created the first (and best) magazine for drummers. Who'd have thought that there'd be a market for such a magazine? Ron did! His vision—along with the amazing staff that he assembled—continues to improve, inform, and inspire drummers from all walks of life, levels of skill, and styles of play. I, for one, need to say the obvious: Thank you, Ron.

Jeff Ball via Internet

What Ron Spagnardi did for the drumming community was second to none. Through his great publication, Ron was able to inspire young and old players alike with interesting interviews, development exercises, song charts, and much more. As if that weren't enough, Ron then created the world's most prestigious drumming event. I'm certain that my ten years as an MD Festival audience member have helped me to become a better drummer. I also developed strong friendships with many drummers from around the globe. This was Ron's doing! Add to that the fact that Ron and his wife Isabel always made a point to spend quality time with us out in the line. I don't know if they ever realized what that meant to all of us.

Ron was much more than just the head of the world's greatest drumming publication. He was truly respected and fondly loved by drummers from around the globe. It makes me smile to think that, as I write this, Ron is probably trading licks with Buddy and Gene.

Scott Lewis (MD Festival 3:30 Club) Nanuaguan, NJ

Cliché as it may sound, Ron was truly a visionary. I can't express the joy I still feel to this day at getting my Modern Drummer in the mail each month, or what that seemingly insignificant event has meant to my life. I never had the chance to meet Mr. Spagnardi and to tell him that I loved his work. But I did, very much. Thank you for letting me offer my respect and gratitude to a man who made me very happy for over a quarter century.

Patrick Barkery Elk Grove, CA

Ron Spagnardi's dedication and enthusiasm transcended Modern Drummer. He realized that the magazine was more than ink on paper, more than lessons and rudiments. It is heart, soul, and passion for music and drumming. It represents the camaraderie and brotherhood that make this community what it is. We have lost an amazing man who, through his own will and creative fire, unquestionably changed the world of drumming forever.

Jodi J. Nepveu New Hampshire

The lessons that I absorbed from Modern Drummer's monthly tutorial are immeasurably responsible for my even being a drummer today. I'm sure that I speak for all writers who have had our work published in MD when I say that it's been an honor to contribute to Mr. Spagnardi's dream. Well done, Ron. And thank you.

Rod Fogarty (MD writer) Toronto, ON, Canada

I feel like I've lost a teacher whose influence I hadn't appreciated until I had occasion to reflect on how much I've learned. Through MD, Ron has endowed many drummers who never met him with a profound and lasting gift. For this, he will always be remembered with the deepest respect and appreciation.

Alan Dunst via Internet

Ron Spagnardi's dedication and enthusiasm transcended Modern Drummer. He realized that the magazine was more than ink on paper, more than lessons and rudiments. PHILLY SOUND DRUMMERS
How exciting to see a feature story on the great Earl Young and Charles Collins. I was already familiar with Earl Young, but I wasn’t aware that Charles Collins had played on so many amazing Philly Sound tunes as well. Listening to their classic tracks is a must for any drummer who wants to know how to serve the song. Particularly amazing is the full ten-minute rendition of “Disco Inferno” from the Saturday Night Fever soundtrack. This was recorded in the days before click tracks and drum machine manipulation, but you could set your watch to Earl Young’s time! The average drummer would have trouble keeping that groove locked in for two minutes, much less ten.

Thanks for a fantastic article on two drummers who everyone should become familiar with. It’s nice to see that these guys are no longer “Standing In The Shadows Of Philly.”

Derek Hawkins
Denver, CO

SHERRIE MARICLE
Thanks for Burt Korall’s well-written and much-deserved feature article about Sherrie Maricle (December ‘03 MD). As one can clearly determine from the article, Sherrie is an extremely hard-working drummer on and off the stage. She transforms this work ethic into a very dynamic stage performance.

Several years ago, Sherrie worked with high school musicians at a three-day jazz festival sponsored by our local community college. The culmination of this festival was a concert by Sherrie’s band, Diva. Sherrie’s performance as a drummer was commanding, but equally impressive was her ability to get the most out of these young high school musicians. She is not only an accomplished musician, but also a gifted educator and role model.

Scott A. Bell
Mason City, IA

MD IN THE FIELD
Thanks so much for the package that MD sent to me out here. I’m sorry for not responding sooner, but we have been touring around, putting on concerts for soldiers all over Iraq. Enclosed is a photo we took with your T-shirts and magazines, in front of the presidential palace that we stay in on a former Saddam compound. Those in the photo are (from left) myself, percussion specialist Danny Arizmendi from Brownsville, Texas, and staff sergeant Clayton Moore from Waterloo, Iowa.

Your support of the troops deployed here is much appreciated. You make our jobs a lot easier. Thanks again, and God bless America.

How Much For The Jellybeans?

My uncle is thinking of selling his vintage Ludwig Vistalite Quadraplus Jellybean set. It consists of red 9x13, amber 10x14, blue 12x15, and yellow 14x16 concert toms, a green 16x18 floor tom, a blue 14x24 bass drum, and a clear 5x14 snare drum. The hardware includes two cymbal stands, a snare stand, a hi-hat stand, and a Speed King bass drum pedal. Everything is original except for some of the heads.

The bass drum is missing the T-rods and claws for the front hoop (which I have). That drum also has two minor cracks. One runs about 3’ from the lug to the edge of the drum. The other is at another lug hole, and is about 9/16” long. All of the drums have minor scuffs and scratches, and there is very slight pitting on the chrome. The photo below is not of my uncle’s kit, but is identical to it. Can you provide an estimated value for this kit?

Claudio

Flying With Cymbals

I’m going to be flying from Boston to San Jose for a band gig. Can one carry on a bag full of cymbals these days? My fear is that I’ll bring my soft bag full of cymbals to the airport, only to have some overzealous security officer decide that my cymbals are weapons. Then I’ll have to check the cymbals, meaning I’d used my hard case instead (which I’d rather not use). I know that the cymbal bag will fit in the carry-on luggage space. I’ve carried on bigger portfolio cases with artwork and presentation materials. Any advice?

Tim Brunelle

Different airlines have different policies about such situations. Your best bet would be to take the bag of cymbals to the airport in advance, and get an official ruling—on paper, with someone’s signature. You could then show that paper to security and airline personnel when you actually check in for your flight. If the airline is reluctant to allow the cymbals on board, we’d suggest that you avoid the hassle and check them, using your hard case with all possible additional padding and protection.

K Custom Jazz Ride

I recently purchased a Zildjian 18” K Custom Jazz ride, and I’m curious about the history of this model. Zildjian no longer offers a Jazz model ride; they now offer Dark rides and Dry rides, among others. While the new model names are more descriptive and would be helpful during a purchase, I’d like to know Zildjian’s description for my cymbal, in terms of its thickness, “darkness,” “dryness,” etc.

Bill Lynch

We forwarded your question to Zildjian director of education John King. He responds, “The Zildjian 18” K Jazz ride cymbal (not K Custom) was originally introduced in 1984. It possessed a rather high profile (bow) that allowed for good midrange emphasis while still having the low-end body that K cymbals are known for. This medium-light cymbal could be considered as a crash-ride type of instrument with some ‘dry’ sound qualities.

“In 1991, Zildjian introduced K Pre-Aged rides (in 18”, 20”, and 22” sizes). They had a shape and effect very similar to the Jazz ride models, but also had other elements of sound that increased their versatility. Jazz ride sales were eventually surpassed by sales of the Pre-Aged models, so they were discontinued in 1995.

“The elimination of certain cymbal models is a necessary process as state-of-the-art manufacturing techniques continually ‘raise the bar.’ This is not to say that older cymbals have no place in modern music. In fact, they offer special qualities that can only be found in older instruments—much like those of the Jazz ride you now possess.”
Play THE BEST. PLAY THE ORIGINAL.

The most famous heads in drumming welcome back some of the most famous heads in drumming.

Some drummers can't get enough of a good thing. Just ask any of these pros (or those from marching like the Cadets, Crossmen and Phantom Regiment) who've recently returned for what matters most — consistently great sound that gets you noticed.
Drums And Temperatures
I just finished soundproofing a shed in my back- yard. I live in Denton, Texas, where it can get up to 100° in the summer, and low enough to snow in the winter. When I'm playing my kit I'll have a fan or a heater operating, depending on the season. But they will not be running when I'm not there.

My drum teacher mentioned that drumshells may crack due to too much heat. How likely is this? Also, can temperature affect cymbals? Would it be safe to store my kit out in my shed, or should I shepp it back and forth from my house when I want to play?

James Welch

Extremes of temperature can damage drums—particularly their finishes. Covered finishes can melt or bubble under extreme heat. Lacquered finishes can crack due to the expansion or contraction of the shells resulting from changes in temperature. Shells themselves can, in rare instances, become damaged due to moisture as a result of high temperature and humidity, or from condensation that can occur when temperatures cool suddenly in even moderately humid conditions.

Our advice (and that of most drum manufacturers) has always been that any environmental condition in which you would be comfortable will also be comfortable for your drums. Conversely, any condition in which you would not be comfortable, or which would be dangerous for you, might possibly be equally dangerous for your drums. With that in mind, we'd suggest that you not keep the kit set up in an extremely hot or extremely cold room. Either maintain the climate control (even when you're not there), or store the drums in a safer area and take them to the practice space only when you plan to use them.

Cymbals are generally not affected by temperature alone. However, certain atmospheric conditions—such as salty, humid air near the sea—can contribute to oxidation and tarnish on cymbals (and on drum hardware). This shouldn't pose a problem for you in Denton, but it still wouldn't hurt to store your cymbals in a padded bag, rather than leaving them set up on the kit.

Starclassic Anniversary Finish
I have a used set of Tama Starclassics I bought from a Guitar Center store about two years ago. The set includes 9x10, 10x12, and 12x14 toms, and an 18x20 kick. I'm not sure when the drums were made, but I was told that they were a 25th Anniversary set made in a limited number, and that the finish on the drums was thereafter discontinued. The finish is a blue-green sparkle that looks bold and beautiful under stage lights. I'm wondering how accurate the info I received about the finish is, because I'm hoping to buy a fourth tom.

Andrew

Tama's Paul Specht replies, "We think you have a limited-edition Blue Sparkle Fade kit that was made for Hoshino Gakki's (Tama's parent company) 90th Anniversary in 1998. (Hoshino USA did have a 25th anniversary in 1997.) However, we did make two other sparkle fade finishes exclusively for Guitar Center: Blue Silver Sparkle (BSS) and Blue Gold Sparkle (BGS). For that reason, it would be best if you could take a picture of your kit and send it to Tama, attention Paul Specht, Box 886, Bensalem, PA 19020.

"We can make add-on drums for your kit once we know what you have. You can order them through Guitar Center or another authorized Tama dealer."
Absolutely Birch Nouveau

Nouveau Lug Casing
This revolutionary "quick release floating lug" makes changing heads quick and easy. The lug casing hooks onto the nodal point bolts of the shell, eliminating any direct contact between the leg casing and the shell.

Aluminum Die-Cast Hoops
These lighter and stronger hoops add superior sustain for more consistent tuning.
49 Colors Available!

ABSOLUTELY HANDCRAFTED
Bass Drum Control Tips From Thomas Lang

Q I’m currently working through Colin Bailey’s Bass Drum Control book, and I’m having a problem finding the correct alignment between the pedal and the foot. In order to achieve the most control, is it more effective to line up my foot with the footplate, or at an angle? Also, how does seat height affect bass drum control? Thanks for the huge inspiration.

A Bass Drum Control is a great book. Keep plowing through it! As far as foot angle goes, my foot is perfectly aligned with the pedal, as if the footboard was glued to the sole of my shoe. I avoid positioning my foot at an angle, and I never slide my foot up or down the footboard. I maintain the same position at all times. All I do is change between heel-up and heel-down playing, and I occasionally correct my foot position when I slide too far forward.

Drum engineers and technicians spend a lot of time thinking about, experimenting on, and testing drum pedals. One thing they all have in common is experience and know-how. So every pedal is designed to function in a specific way. There is a point on every footboard where the pedal—when played at that particular point—works at its most efficient and most comfortable level and rate. Every pedal has this “target zone” or “sweet spot.” I trust the competence of the design engineers, so I pretty much do what they recommend: I transfer my own foot action and power straight to that “target zone.” I don’t do any uncontrolled sliding or swiveling, no rocking or twisting, no twitching—no nothing. I plant my foot on the pedal and only lift or drop my heel for heel-up and heel-down playing. The ball of my foot will remain in the exact same spot on the pedal while I do this, as I attempt never to move off that “sweet spot.”

Seat height greatly affects bass drum technique. I’ve found that anything below “thighs parallel to the floor” doesn’t work for me. I sit very comfortably and naturally, with my hips about 2” higher than my knees, with my legs spread naturally and not too far apart at about a 45° angle.

I also have my kick drum quite far away from me (or so my colleagues keep telling me), so that my knee is angled at about 115°. That position kind of forces me to keep my back straight. With a straight lower back, I feel “on top of things,” and I have much better balance. This is essential for more demanding pedal playing.

I also position my cymbals relatively high, so I’m forced to sit with a slightly lower back in order to reach everything comfortably.

I used to have muscle cramps in my hips, along with back and shoulder pain from slouching and from sitting too low. But since I adjusted my seat height, I’ve had no problems whatsoever, and my foot technique has become more relaxed and more powerful.

Matt Sorum On Cymbal Selection

Q I recently got The Cult’s Music Without Fear DVD. I love the sound of your Zildjian cymbals on it. Could you please describe in detail what models and sizes you used? Thanks for your time and all the inspiration.

A When I play live, I tend to go for large, thick cymbals. From my left to my right, I use a 19” A crash, an 18” A crash, a 22” Ping ride, a 19” K or 20” A crash, a 20” China, and a 22” crash-ride. For hi-hats I use 15” A Rocks or New Beats. When I’m recording I mix things up with Ks and A Customs. They sound great in the studio, but they’re a bit thin for live hard rock.
Wherever you hear a backbeat, you'll find a Beta microphone from Shure. Look closely, and you'll find everyone from Alex Acuna to Dave Weckl, from Eddie Bayers to Kenny Aronoff. If you look long enough, you may even find inspiration.

Beta Microphones. Tour tested. Top of the line.
Abe Laboriel Jr.'s Big Bass Drum Sound

On the live videos I've seen of the Paul McCartney tour, your bass drum sounds nice and punchy. I would not expect this to be the case with the 20x28 drum you're using. What processing are they using on it? What's your current microphone selection? And are you doing any triggering on your bass drum?

I currently have a 22x22 kick that sounds great. However, like you I'm a big guy (6'4", 240 lbs.). When I sit behind a 22" or 24" kick, I feel like I dwarf the drum. I realize that a 28" kick will never be as punchy as a 22", but if good tone can be had with a 28" kick, I'd get one in a flat second.

Tim Jones

Thanks for the compliments on my kick drum sound. I love the sound of the 20x28, but it definitely is not the standard, punchy pop sound. I think that it's much more dynamic than a smaller drum. If you play it softly, pulling the beater from the head, it resonates beautifully. If you dig the beater in and rest it on the head, you get a great attack with a low-end rumble. Add padding and you get a good, punchy sound. Unfortunately I don't know the specifics of the miking or the mic path info for the DVD recording. But I can tell you that we didn't use any triggering. If you're reluctant to commit to a 26" or 28" kick, look into renting one for a couple of days so you can experiment. I think you'll fall in love with it.

Repeat Bar A Classic Quote From MD's Past

"I used to work in a General Motors factory unloading wheels and tires from freight cars. It was backbreaking work. Music is work. If you want to be serious about this instrument, be prepared to do the work."

Jazz legend Elvin Jones, July 2002

ART AND SCIENCE

REALFEEL "MUJCHO PAD"

Designed by Daniel de los Reyes

The new Mucho Pad has four playable surfaces.
Two simulate timbales, with one being gum rubber & the other neoprene. There are also two cowbell pads (high and low).

This is where it gets cool. There is also a playable rim - a must for traditional timbale rhythms. Even cooler, the cowbell pads get higher in pitch as you move toward the center of the pad... just like real cowbells! And the non-slip bottom side of the pad can be used for congo/bongo style warm ups, a bonus for hand drummers.

The RealFeel Mucho Pad: Let our science help your art!
A revolutionary mix of musical elements is the sound of Paragon, our new line of Neil Peart signature cymbals. It's this innovative blend that allows Paragon to deliver the explosiveness of AA, the warmth of Hand Hammered and the bright, shimmering tones of AAX every time they're played.
After leaving Primus in 1996, Tim (don’t call him “Herb”) Alexander has reunited with bassist Les Claypool and guitarist Larry LaLonde to resurrect one of the most popular and cutting-edge rock acts of the ’90s. The bizarre, quirky, funk-laced material that Primus built their reputation on was a great vehicle for Alexander, as it drew attention to his abilities to blend rock and funk with a musically creative and authoritative technique.

The band returns with a new “uniquely Primus” five-song CD titled *Animals Should Not Try To Act Like People*. It also includes a DVD retrospective of the band’s twelve videos, including the 1992 Cheesy Home Video documentary and other tasty tidbits.

So what brought these confused and disturbed lost friends back together? “We had talked about doing a tour,” Tim says, “just to have some fun and see what the response would be. Then it turned into making this DVD and recording five new songs. It took a few years of just getting back in touch with each other. But now we’re finally hitting the road.”

When asked how it feels to be back in Primus after seven years, Alexander replies, “It’s like the movie *Groundhog Day*. Sometimes it feels like we never stopped, and the last seven years have been a dream.” Has the drummer’s attitude changed in regards to the way he approaches the new music? “I think I might be a little bit slower,” Tim jokes. “I’m old now.”

In comparing the new Primus compositions to the past catalog, Alexander states, “Since we’ve grown a bit, I don’t think the same things move us as individuals. We listen to different music than we used to, and that’s going to come out in our music.”

Tim’s current drumkit and cymbal setup is similar to the old days—three racks, two floors, two kicks, four Octobans, and a bunch of cymbals. Tim continues to occasionally fill in with The Blue Man Group (his previous employer) in Las Vegas when drummers are out sick, injured, or on tour. Alexander also has a new DVD, distributed through Hal Leonard, which is a performance clinic filmed in Chicago. “It’s just forty minutes of playing,” he explains, “and includes a commentary track. It’s not your typical drum video.” Judging by his musical history, the new Primus music, and the DVD retrospective, “typical” is not a word found in Tim Alexander’s musical vocabulary.

Mike Haid
Gary Husband
UK Great Gets Gonged

British drumming god Gary Husband came to international acclaim on such 1980s Allan Holdsworth albums as Metal Fatigue, Atavachron, and Sand. Husband's steamroller drumming has also graced the music of Jack Bruce, Gary Moore, Level 42, and most recently, fusion maestros Gongzilla. Their latest release, East Village Sessions, shows Husband to be as tasteful and astute as ever. Gary insinuates a clever backwards bonham groove for "Aquila," adds graceful textures to "Ging Gong," and goes tribal on "The News."

"Gongzilla goes for real group performances," Husband explains. "It's quite a grilling! I would've preferred to work with a click track, but they wouldn't hear of it. This is all live—the real deal."

Husband endorses Drum Workshop, but played a Tama Starclassic set for East Village. However, according to Gary, gear doesn't figure as much into one's growth as does practice. "I just started practicing again after twenty years or so," he admits. "I was never too interested in pursuing drums from a premeditated standpoint. It was just 'the moment' I wanted. Now I'm aiming for more consistency, independence, and control."

Husband's upcoming projects include performances with his Force Majeure group (including Randy Brecker and Jim Beard), a piano trio album called Gary Husband & Friends—Aspire, and a solo piano album of John McLaughlin material. Husband can also be heard on the Julian Siegel Quartet's Close Up, Steve Toppings' Late Flower, and two recordings from Allan Holdsworth: Bring To Light And Then.

But where is the Gary Husband solo drumming record? "I've spent a long time trying to make a drum album," he replies. "But I refuse to make music that resembles TV cop show themes or that fits into someone's idea of what a fusion album should be. I've been asked to make a retro jazz/rock album evoking Mahavishnu, but this is out of the question. And I will absolutely have nothing to do with anything that involves the word 'shred.' That's a childish frame of reference that has nothing to do with music at all."

Ken Micallef

DEPSWA'S

Gordon Heckaman
Drumming For A Dream

"With every drum part I play, I try to complement the other musicians as much as I can," says Depswa drummer Gordon Heckaman. And that attitude is readily apparent, especially on the act's most recent Interscope/Geffen release, Two Angels And A Dream. Throw in the disc. After a few tracks you'll notice that while most drummers would battle their bandmates for the foreground—particularly in the intricate, alternative genre that Depswa works in—Heckaman is completely respectful of letting the song be the song. And perhaps that's because he understands the band from another perspective. You see, Heckaman was a fan of the band before he joined the act two years ago.

The buzz over Depswa's recent disc has helped to land them on some major tours, including last summer's Ozzfest. "We bumped it up a notch," Heckaman says of the band's live performances. "When I play, I'm pretty visual. I'm a big fan of Morgan Rose of Savoydust, and he's so much fun to watch. I'm not trying to copy him, but I do little arm movements to keep the kids entertained. In fact, a lot of fans I've met have mentioned my playing style, which is cool."

Recording Two Angels And A Dream was actually Heckaman's first opportunity to work with a producer. The band enlisted P.O.D. producer Howard Benson to guide their efforts. "I was nervous going into the studio," Heckaman admits. "I'd been in studios before, but not on this level. But Howard really enjoyed my drumming. I think it was the speed that I did everything. I did all of my tracks for the album in three days."

Heckaman found that he benefited on stage from his studio experience. "Benson had me on a steady diet of click tracks for two weeks before we went into the studio," the drummer says. "I had it down. And now I play live on stage to a click track. That's been one of the best things I've learned to do."

Waleed Rashidi
Want to know the true meaning of a dedicated drummer? How about warming up your chops on practice pads in the back of a U-Haul trailer at 9:30 A.M. and in 95° weather, all in preparation for taking the stage at 10 A.M. on the grueling second stage at Ozzfest. Welcome to the world of metal drummer Jason Bittner. His band, Shadows Fall, works hard, and they’ve been slaying crowds with their unique blend of old-school metal and modern thrash.

Bittner’s drumming is smooth and confident. He has a relaxed technique that allows him to maneuver through the uptempo material with grace. And his playing style perfectly melds with the band’s influences, which reach back to the ’70s. “Believe it or not, a lot of us in this band are influenced by the music of Boston,” Bittner says. “I’m also a big fan of Slayer and Anthrax. But our musical influences go across the board, from ’70s, ’80s, and some ’90s metal. We feel that a lot of ’90s metal has run its course. We want to prove that there’s still room for a metal band that has melodic and lyrical abilities.”

Bittner’s biggest metal drumming influences are Dave Lombardo and Charlie Benante, and his favorite technical drummers are Mark Zonder and Neil Peart. “Those guys always play for the song and never overpower,” Bittner says. “That’s the way I like to play. I don’t like the constant double bass stuff. I like to break it up and play fills that enhance the music. I’ve been working out of Bobby Rondinelli’s great book, The Encyclopedia Of Double Bass, and also Gary Chester’s New Breed, to try and strengthen my chops. I’m doing what I can to come up with new ideas that I can bring to our music.”

Mike Haid

A true performer gets the job done, night after night, stage after stage. They’ve spent years honing their craft and when selecting tools there is no room for compromise, only the absolute finest will do. Bobby Allende is a true performer and his tools of choice are Pearl.

Bobby’s Signature Series Congas and Bongos were designed under his watchful eye to meet the grueling demands of a working performer. Seamless fiberglass shells with an extra wide base provide optimal projection and stability while the 28” height make them perfect for the seated player. The stock Remo Fiberskyn 3 heads compliment our all-new rim design that makes extended jam sessions a pleasure. The exclusive finish is a silky #620 Café Con Leche.

Bobby Allende and Pearl Percussion, true performers, night after night.
"I have an ability to bring people together, and that gives me the opportunity to do something very dangerous." So says drummer Martin Atkins about Pigface, a rotating consortium of musicians conceived of thirteen years ago during a tour with industrial metal forerunners Ministry and KMFDM. Atkins, who has lent his drumming talents to Public Image Ltd., Killing Joke, and Nine Inch Nails, among others, has recently released Easy Listening..., an engaging collection of music and spoken word representing the latest Pigface amalgamation.

Though Pigface was originally identified with industrial genre artists, Atkins allows the band an open-door policy on the creative front. Over thirty musicians—including Chris Vrenna, members of Kittie, The Rollins Band, and Dope—contributed to the making of Easy Listening... “The whole idea of Pigface is still evolving,” Atkins observes. “That feels so great to me.”

A multi-talented individual with a staggering work ethic, Martin also runs Underground Inc., an umbrella company of twelve independent, artist-driven record labels, including his own Invisible Records, which has a catalog of over two hundred releases. Becoming immersed in the day-to-day operations of Underground means his drumming often comes second to taking care of business. “I’m more likely to have an opinion about who’s creating a fantastic promotional opportunity than who I admire as a drummer,” Atkins shares, though he admits to being a fan of Tool’s Danny Carey and one-time Pigface collaborator Matt Walker. “I love Matt’s drumming,” he says. “It’s just so punchy and precise.”

Atkins’ many years spent as a producer and engineer have, naturally, colored the way he approaches playing the drums. “I have my own studio,” he says, “so I engineer my kit sound. If you listen to some of those massively compressed, limited, overblown drum sounds on the Pigface album, you’ll hear that I’m now more interested in the processing rather than the tuning of the kit.”

For live performances, Atkins uses a five-piece Pearl set customized with electronic triggers. “That’s just to mentally trigger a signature sound from an album track to put the listener in that moment,” he explains. “I’m very interested in recreating the ‘correct’ energy of a song—and sometimes that means just one signature sound, like a snare drum crack—to put people in that head space.”

Gail Worley

Pearl

MARC QUIÑONES
TRUE PERFORMERS
SIGNATURE TIMBALES

A true performer stands confidently in the spotlight ready to bare their soul through their instrument. This is the time that they have prepared for through endless hours of rehearsal and practice. Marc Quiñones is a true performer and it shows in every aspect of his music. He demands perfection in himself, his tools and will settle for nothing less than the finest, Pearl.

Marc’s Signature Series Timbales are unlike any other Timbales available. 14" and 15" polished steel shells featuring two inverse heads with a unique five lug design that allows maximum cymbal striking area with less lug interference. The included socket wrench takes advantage of our exclusive top tuning feature that allows fast head changes without the worry of nuts and washers falling off. The included cowbell post features a sympathetic sound dampening sleeve to prevent our bells and blocks from ringing through the stand. By using a one wing bolt design the entire unit mounts in seconds to the included heavy-duty double braced tilting stand. A PBL-20 Clave Block is included at no charge.

Marc Quiñones and Pearl Percussion, true performers. spotlight after spotlight.
Kenny Aronoff, Robbie Magnruder, Greg Morrow, and Andy Newmark are on drums, with Tom Roady on percussion, on The Essential Mary Chapin Carpenter.

Ronald Brunner Jr. recently completed recording with Suicidal Tendencies. He's also been working with Infectious Grooves.

Eddie Bayers’ most recent sessions have been with Kenny Chesney, Michael Peterson, Debby Gray, Felix Cavaliere, Ricky Skaggs, Jimmy Buffet & Alan Jackson, Willie Nelson, and Toby Keith.

Levon Helm, Matt Johnson, and Sterling Campbell are on Rufus Wainwright's Want One.

Vinnie Colaiuta and Dennis Chambers are on Mike Stern's These Times.

Bobby Irvin and Liam Bradley are on Van Morrison's What's Wrong With This Picture.

Manu Katché is on Sting's latest CD, Sacred Love. Keith Carlock is doing the tour.

Chet Doocy and Hip Pickles have been performing quite a bit lately, including a gig "opening" for former NYC mayor Rudy Giuliani.

Chris Parker is on Ralph MacDonald's new solo CD, Eric Marienthal's Sweet Talk, and Paul Taylor's Stepping Out, and on tracks by Patti Austin and Tom Chapin. Chris has also been doing gigs with Bette Midler, the Baltimore Symphony, Tom Scott, and his own band, Topo & The PussyCats.

John O'Reilly has been in the studio with The Trans Siberian Orchestra.

Kenny Aronoff and John Miceli are on drums, and Luis Conte is on percussion, on Meat Loaf's Couldn't Have Said It Better.

Mark Walker is on Jim Riff's Door In A Field, Dave Gordon's Faux Rant, and Andrew Stewart's Blue Canvas With Spiral. Michael Blaun, Andy Sturmer, and Noah Levy are on Mandy Moore's Coverage. Billy Hawn is on percussion.

Bernie Pershey, Dave Raven, Scott Miracle, Kevin Clouse, Sergie Gonzalez, Brady Blade, and Russ Kunkel all lay it down on Beth Hart's new CD, Leave The Light On.

Harvey Mason recently performed at the New England Conservatory’s 100th-anniversary celebration.

Joe Forgone, the drummer for The Soul Survivors ("Expressway To Your Heart"), recently passed away. Our sincere condolences go to his family and friends.

Happy Birthday!

Yamaha Rydeen Drumkit
God Of Thunder Delivers Entry-Level Excellence

Yamaha's Rydeen kit is an excellent example of how today's entry-level kits are offering better construction quality and overall sound than ever before. The Rydeen (Japanese for "god of thunder") series has the sound and feel of a high-end kit, with relatively minor concessions in hardware and shell finishes to reduce cost.

The Rydeen kit, which is constructed of 8-ply Philippine mahogany with a high-impact PVC outer covering, is available in three different five-piece configurations. The shells are made using the same proprietary Air-Seal System used to make Yamaha's high-end models, which the manufacturer claims ensures that each shell is perfectly round. Bass drum hardware features Yamaha's original ball-clamp tom mounts. The accompanying hardware package includes a straight cymbal stand, a hi-hat stand, and a snare stand (all double-braced), along with a bass drum pedal. The hardware is manufactured in Yamaha's Indonesian motorcycle factory, where rigorous durability and quality-control standards are kept. Let's inspect these goodies from the "God Of Thunder."

**Choices**

Rydeen kits come in three configurations. The RD2F55 model we reviewed features a 16x22 bass drum, 8x10 and 9x12 rack toms, a 14x14 floor tom, and a 5x14 snare. The RD0F5 kit substitutes a 16x20 kick and a 5x13 snare drum, while the RD2F5 model substitutes 9x12 and 9x13 rack toms and a 16x16 floor tom.
Finishes offered are Night Black, Garnet Red, Racing Green, Royal Blue, and Rydeen Ash, which was the finish our review kit came in. It's a deep metallic plum-colored wrap.

**Bass Drum**

The 16x22 bass drum comes equipped with wood hoops that secure a clear Remo Powerstroke 3 type batter head and a black front head with a high air hole. The drum had a solid punch and beautiful tone that was matched perfectly by the toms. This does wonders for the execution of even-sounding bass/tom combination fills.

The bearing edges were true, and the drums come fitted with minimal hardware. Both of these factors contribute to maximum projection. The bass drum spurs are sturdy, but they’re fixed in length. That means they can’t be adjusted to raise the bass drum further from the floor.

**Toms**

The 8x10 and 9x12 rack toms, along with the 14x14 floor tom, are the drums that make this kit a worthwhile investment. Fitted with Remo clear one-ply top and bottom heads and triple-flanged steel hoops, the toms sing with sweet, resonant tones at any pitch. As I mentioned earlier, the toms and the bass drum possess a symbiosis of sound and feel that can take your playing to a higher level of precision because of their smooth and even response.

**Snare Drum**

The 5x14 wood snare had a dry, direct tone with minimal overtones. The Remo heads were not identified by model, but were similar to a coated Ambassador batter and a clear Ambassador snare bottom. The snare mechanism features a standard throw-off that was easily adjusted, and the drum is equipped with triple-flanged steel hoops.

The snare’s sound was very articulate due to its dry nature. But it didn’t cut through the volume of a loud, live party band without being miked. The bearing edges were true, but frankly this drum didn’t match up to the projectonal tonalities of the bass drum and toms.

**Hardware**

The Rydeen hardware held its own quite well in many punishing situations. The bass drum pedal comes fitted with a nylon strap drive and a felt beater. The absence of a solid floor plate made the pedal fairly light, but it also prevented it from giving me a feeling of solid foundation when it came time to really kick it. However, for jazz and most mid-volume playing situations, the pedal was smooth and sturdy. Yamaha’s ball-clamp tom-mount arms feature sturdy, five-sided arms that penetrate the shell. Combined with the secure ball-clamp function, I believe they provide more stability and versatility in tom positioning than any other toms on the market. That said, I didn’t care for the floor tom leg mounts—simply because there are no wing nuts and you need a drumkey to adjust the legs. This is a minor inconvenience during setup and breakdown, but it can be a major problem if you’re trying to make quick adjustments while playing.

The straight cymbal stand, hi-hat stand, and snare stand all felt secure while being fairly light. The only notable limitation of the hardware is that the cymbal stand doesn’t extend up very high.

Perhaps the design focus of this kit is young, fairly small beginners.

**Conclusion**

I played the Rydeen kit on professional gigs that ran the gamut of musical styles. I never once thought of it as an “entry-level” kit, because, frankly, it never felt or sounded like one. Even allowing for the limitations of the snare drum, the kit sounded great in every situation.

The quality of craftsmanship and materials used to build the Rydeen kit make it a very strong contender in the highly competitive entry-level market. The God Of Thunder knew what he was doing when he designed this kit.

---

**THE NUMBERS**

**Configuration:** 16x22 bass drum, 8x10 and 9x12 rack toms, 14x14 floor tom, and 5x14 snare. Philippine mahogany shells, offered in Night Black, Garnet Red, Racing Green, Royal Blue, and Rydeen Ash covered finishes. Hardware package includes ball-clamp tom-mounting system, bass drum pedal, straight cymbal stand, snare stand, and hi-hat stand.

**List price** .................................. $819

**Quick Looks**

**H3 DrumScience DrumStick Wax**

H3 Drumstick Wax is a grip aid for drumsticks that comes in a reusable 2-oz. tin. (The empty tin would be handy for storing drumkeys, snare strings, and the like.) The wax is dark indigo blue and has a tropical scent. The goal of the product is to give you a solid grip on your drumsticks without making your hands messy or sticky.

To use the H3 wax, you remove the block from the tin and apply it to the grip area of the sticks. You can put it on directly before playing, or during your session. You don’t have to wait for it to dry; it’s instantly ready to go.

You don’t need to reapply the wax for each gig if there is some on the sticks already. It’s heat-activated, so it “wakes up” once you’ve handled your sticks for a few seconds. I tried the wax on many pairs of sticks for use on different types of gigs, and it gave me a solid grip without leaving a sticky residue. I’d never tried a product like this before, and I was very pleased with the results. My wife also uses it on her timpani mallets.

H3 Drumstick Wax has a five-year shelf life, even after being opened. H3 DrumScience will also be marketing a wax removal tool in keychain form, so that you can remove the old coat and reapply a new one if you wish. Retail price varies from $5.99 to $7.99 depending on location.

Chap Ostrander
UFIP Brilliant Series Cymbals

Brilliant Idea!

For those who are unfamiliar with the name, UFIP (Unione Fabbricanti Italiani Piatti) has been manufacturing cymbals in Pistola, Italy since 1931. The brand is well regarded in Europe and has been making quiet inroads into the American market over the past few years.

Recent UFIP reviews, such as MD's September '03 examination of the company's exotic tiger-striped China cymbals, fueled my suspicions that UFIPs have become "artsy" instruments. However, only seconds into my testing of the new Brilliant, I realized that these are versatile, workaday cymbals.

It's UFIP's policy not to stamp "ride," "crash," or "China" on its cymbals, leaving drummers to employ any given cymbal as they see fit. For example, one of the cymbals we received was stamped with "207/51 centimeters, Made in Italy," followed by the weight in grams. To simplify things for this review, I viewed that one as a ride, and everything 18" and under as a crash or splash. Hi-hats are factory-paired.

UFIP cymbals are manufactured by a method called "rotocasting." Molten B20 bronze alloy is poured into molds that spin at high speed. The cymbal pops out of the mold with its rough profile and bell clearly visible. UFIP claims that this process, as opposed to the more common one in which bells are hammered out or hydraulically stamped, results in added "beef" in the middle of the cymbal. After hammering and lathing, the Brilliant are buffed in a proprietary process that smoothes over the tonal grooves, leaving a lustrous, reflective finish.

Not Your Basic Rides And Crashes

Our review batch included 12", 14", 16", 17", 18", and 20" cymbals, along with 13" and 14" hats. The line also includes 8" and 10" splashes, 22" rides, and 18" and 20" Chinas.

The 20" ride is a medium-heavy cymbal that features a porcelain-like ping and moderate wash. At a club, that ping was audible even when the amps were turned up on stage. When I laid into the bell, it gave out a hearty, Latin-ish clang without exciting the body too much. The crash, if you can call it that, was an unfocused explosion in the lower mid frequencies.

In the studio, I found the 20" ride's version of "ping" remarkably pleasant. It seemed to straddle the line between "K-style" wash and more contemporary clarity. With this potential in hand, I'd carry it to any recording date as an option. Its emphatically "middle" frequency response travels well from style to style.

The 18" was one of my favorites. Although it had passable ride characteristics, it made a killer crash. Mind you, it took some getting used to, especially in the testing room, where I found it a little overbearing. But when I put the cymbal in context—struck in unison with a 16" floor tom, for example—I was smitten. It produced frequencies ranging from rich, deep lows to stinging highs. The sustain was long but not out of control.
By this point, I was beginning to realize that UFIP Brilliant are not your typical thin crashes. They all seemed to be a wisp heavier—and to exhibit a little less flex—than crash cymbals I would ordinarily choose. But the payoff is crashes that you can hear from the throne and the back row—which I verified by having someone else give the cymbals the old one-two-while I roamed out front.

Surprisingly, the 17” crash had enough “tonal distance” to be paired with the 18” and still produce a sufficiently wide pitch interval. Understandably, it lacked a little of the power of the 18”, but retained the basic character. The 15” and 16” Brilliant exploded quickly and then got out of the way. I’d use either as a primary crash in low- to moderate-volume situations. As with all of the Brilliant test cymbals, they were mallet- and brush-friendly, emitting a variety of overtones not immediately obvious with sticks.

Something curious happened when I tested the Brilliant in a recording studio. In two separate sessions in the same room, two different engineers lowered the overhead mic’s from their customary position of a foot above the cymbal line. This indicated to me that, despite my perception of a little extra weight, these weren’t overly loud, raucous cymbals that were blowing up the overheads. On playbacks, the cymbals had good presence, with the 16” and 18” making a particularly effective pair. In fact, they had me challenging my habit of employing at least one paper-thin crash.

Perhaps I spoke too soon, though. Fact is, I wouldn’t have minded if the 14” were paper-thin. To me, it was just too thick at the edges and slow in response to make an effective crash. I say “to me” because I know that some metal heads are going to find it perfect when competing with amp stacks. Similarly, the 12” was also heavier than a conventional splash, but it spoke quickly and sharply. I’m certain that the additional weight would give it extra mileage over garden-variety thin splashes.

Your Basic Dream Hats

The Brilliant hi-hats made me want to play them. The top cymbals were medium in weight; the bottoms were heavy and featured two holes to prevent vacuum airlock. I started with the 14” in the testing room, and immediately discovered that they had what I look for in hi-hats—in spades. First of all, the top cymbal had several sweet spots that made shank-to-tip stick patterns come to life. When I relaxed the pedal, leaving the two cymbals “just kissing,” a touch of the stick would set them sizzing for a good three or four seconds. And the chick they made when closed with the foot was solid, but not necessarily loud. It cut through sufficiently for live applications, and quickly became my first choice for studio sessions. I regret the day these babies went back to UFIP.

The 13” pair wasn’t shabby, either. Their overall tone, chick, and body was a little high-pitched in relation to comparable models from other brands in my collection. But it was not an abrasive high. Again, that sizzling sound was evident with the cymbal plates barely touching, and, again, the stick sound was light and well defined. Despite their relatively high pitch, I’d recommend these as primary hats, or as truly excellent auxiliary hats.

Conclusion

The UFIP Brilliant are a versatile line of cymbals that fall well within the price range of working drummers. The 18” crash stood proud for me, and this comes from a guy who owns well over a hundred cymbals. It was that special. Likewise, the hats were among the best I’ve played. Because of the Brilliant’s slight additional weight and unique character, I’d caution against ordering them by mail (at least, not the 14”). Last word: They look pretty groovy under stage lights!

HQ Percussion Mucho Pad

HQ Percussion and percussionist Daniel de los Reyes have teamed up to produce the Mucho Pad. It’s a practice pad designed to replicate a set of timbales with two mounted cowbells. One drum surface is gum rubber and the other is neoprene, which provides two different playing feels as well as subtle pitch differences. The neoprene pad also has a slightly raised rim to practice rimshots on. Both surfaces feel great to warm up on with timbale sticks or regular drumsticks. The pad has a non-slip bottom to prevent it from moving when you walk on it. It can also be turned over and used as a warm-up pad for hand drumming.

The two neoprene cowbell pads represent the high and low bell of a timbale setup. They’re set on a piece of wood that’s slightly raised above the timbale pads. This piece is attached to the pad by hook-and-loop fastener strips, and can be removed for transport or storage.

The Mucho Pad is a great practice aid for drummers or percussionists. It also provides a terrific pick-up line on the road: Oye muchachos! Wanna come up to my macho pad and see my Mucho Pad? (Okay, I’m done.) List price is $75.95.

Norman Arnold
Cadeson is one of the emerging brands from the Orient that have quietly but aggressively been making inroads into the US percussion market. They're no newcomer; they've been in business for over seventeen years. Along with other musical instruments, they design and manufacture all of their own drumshells and hardware. They currently offer six series of drumsets, from entry-level to professional. The Studio Wiz reviewed here is a high-end kit targeted at jazz players.

**How's It Look?**

The Studio Wiz features the traditional small drum sizes of older jazz kits, but with some interesting twists. The 14x18 bass drum is not only smaller than the common 22" pop/rock kick, it's also smaller than the 20" jazz bass drums of the 1950s and '60s. The floor tom is a fairly standard 14x14, but the rack toms are more akin to sizes we designate today as "fast toms": 7½x10 and 8½x12. The ten-lug snare drum measures 5½x14.

Our review kit came finished in a high-gloss clear lacquer that allows the natural maple grain to show through. The edges of the shell are darkened, creating a "natural maple face" effect. Running around the center of each drum is a fleur-de-lis stencil in a stain about one shade darker than the maple. This is pleasing to the eye and adds a little personality to the otherwise conservative look of natural wood.

Cadeson's lugs are gold-plated solid-metal cubes a little over ½" square, each with a tension rod tube on top and an ornamental bead on the bottom. The badges, vent holes, and bass drum claws are also gold-plated. The tom-mount suspension plates and the rims are zinc-plated, which adds a satin look to the finish. This limited use of gold plating in combination with the zinc looks classy without being ostentatious. The wing nuts are stylishly curved and easy on the fingers. The rack toms are suspended with plates bolted into two of the six lugs and not connected to the rims or tension rods (which means you can change heads without removing the drum from the setup).

**What's It Made Of?**

The most interesting item to note about the Studio Wiz drums is their shell construction. These days, although there are some 4-ply maple drums made, most feature six or more plies. That's true of Cadeson's drums as well—except for the Studio line. There they've done something unique.

In the 1960s the major drum manufacturers constructed their drums of 3-ply high-quality mahogany, with 3-ply maple reinforcing hoops. Cadeson maintains that while this construction gave those drums warmth and tonality, they did not project as well as newer drums. To remedy this, they have created a 3-ply shell with a 3-ply reinforcement ring, both of maple. According to Cadeson, "The tone is a combination of focused projection with vintage warmth." (The snare drum features 5-ply reinforcing rings for additional strength against the higher head tension usually used on snare drums.)

To further improve the sound of the drums, the lugs are attached to the shells with only one fully drilled hole per lug. With 50% fewer penetrations, more of the shell area is open and free to vibrate, thus enhancing the tone and resonance of the drum.

**How's It Sound?**

Okay, let's talk about that tone and resonance. In order to get an accurate impression of the sound of the toms, I de-tuned them all and
then tuned them back up. I found plenty of tone at the low end, but the resonance began to come through more at the middle to upper segments of the tuning range.

All of the toms had a nice tonality that was reminiscent of 1960s drums. They also had some punch, in the form of a pointed attack with a pronounced ring that carried well. This was no doubt a function of that hardwood reflecting the sound around and out of the drum. When I replaced one of the factory-provided coated Remo Ambassador tom heads with a clear Ambassador, the tonality was still there, but not the same depth or warmth. The attack was much more audibly. I preferred the sound of the coated heads. They carried just fine, and the tone was warmer and more appropriate for jazz. I think Cadenson made the correct choice of heads for this set.

The bass drum proved deceptive. Though small in size, it wasn’t small in sound. A good stomp on the pedal yielded a solid yet tonal thump that stood out in the beat and under a fill. Though not identified, the batter head looked like a modern dammed model. The front head had no hole in it. This combination increased the ring while adding some bottom to the sound.

Normally, with a thin 3-ply shell, more of the shell vibrates and less air is moved. This means you get a warm tone, but less sound projection. Not so with this drum. The maple construction, reinforcement rings, and wooden hoops seem to be enough to stiffen the shell and transfer a lot of the vibration from the head to both the drumshell and the air inside it. This results in the air (and hence the sound) bouncing back and forth inside the drum, amplifying it to a considerably audible level.

The snare drum produced a sound that was fully present, and then made a quick, controlled exit. There was little extended afterring. This is an articulate snare with no need to rely on a metal shell to bounce and amplify the sound. Ringing rimshots left the snares sizzling, and single strokes were clear and well defined. Press rolls were full of buzz, and backbeats sounded solid and woody. This snare is a nice complement to the pleasingly tonal toms and vocal bass drum.

How’s The Hardware?

As mentioned earlier, the rack toms use a suspension-type mount. The tom arms are 7/8” rods with ball & socket adjustments. This offers quick, easy, and infinite positioning. The bottom rods are held by clamps mounted to the cymbal stands; there are no mounts on the bass drum. Plastic ties on the end of the tom rod and felt pads on the tom protect the drum when inserting the rod through the mount.

The bass drum pedal is a double-chain affair with adjustments to change the angle of the footboard, the tension, and the pedal throw. It has a full baseplate, spring-tensioned spurs, a built-in drumkey holder on the left side, and a side-mounted adjustment to tighten the pedal to the hoop. The beater is reversible, with two differently shaped felt impact heads.

This is a nicely responsive pedal; double beats were easy to play, and it had a smooth feel. The pedal shaft is keyed at the upper right side so it can be used as a slave in a double pedal setup, which is available from Cadenson.

The double-braced hi-hat has a large, single-chain drive. It features a ten-position tension adjustment, as well as a clever two-piece geared assembly that the bottom cymbal sits on. As you lift and rotate the upper half of this assembly, the horizontal angle changes and tilts the cymbals. The pedal feels solid and reliable when you stomp on it, and splashes are easy to execute.

The kit features one straight cymbal stand and one convertible boom stand. These are double-braced and sturdy, and they can support a cymbal and a tom each with no wobbling. They also incorporate clutch-type tilters that allow smooth and infinite cymbal positioning.

The double-braced snare stand uses a ball & socket basket tilter. This makes it convenient and quick to adjust, and again offers infinite positioning. I even turned it a full 90° so that the snare was perpendicular to the floor, then played the drum with a bass drum pedal. The height of the stand can be adjusted from a low of 14” (from the floor to the bottom of the snare drum) to a high of 22”. The basket can be removed from the snare stand with a drum key for easy pack-up.

So What Do We Think?

This is a very nice drumset. The stenciling enhances the natural wood finish, while the gold plating adds a touch of class. The kit is small, but the sound is not, and it produces a nice combination of warmth and projection. The hardware is sturdy and offers some nice features.

I think this kit would work well for a jazz combo, and even for a moderately loud rock group (if mixed up properly). I love the fast-size toms; they’re easy to handle, offer great setup flexibility, and sound every bit as good as larger toms. Though it’s a compact package, the Studio Wiz kit has a lot to offer.

THE NUMBERS

Configuration: 14x16 bass drum, 7½x10 and 8½x12 rack toms, 14x14 floor tom, 5½x14 snare drum. Shells are 3-ply maple with 3-ply reinforcing rings. (Snare features 5-ply reinforcing rings.) Gold-plated lugs, zinc-plated drum rims. Hardware package includes bass drum pedal, along with straight and boom cymbal stands, snare stand, and hi-hat stand (all double-braced).

List price .................................................. $2,200

Gibraltar 8600 Flat Base Hardware
Talk About Your “Less Is More”

Over the years I’ve been a strong campaigner for lightening one’s load when it comes to equipment. I truly believe that reducing the weight of your gear will help to prevent injury and promote career longevity.

I also believe in the old adage about using the right tool for the job. For example, if you want a 20” China crash six feet up in the air, you're definitely going to need a heavy-duty, double-braced cymbal stand with a huge tripod spread, in order to support that cymbal. However, if you’re one of the thousands of drummers out there schlepping their own equipment to clubs or wedding gigs, you can be perfectly well served by much lighter hardware. Of course, it must be up to contemporary standards of functionality and performance.

I add that last provision because up until recently, if you wanted a lightweight, vintage-type stand, you had to actually find a vintage-type stand. Any new, ultra-lightweight hardware on the market was usually at the low end of a manufacturer’s line, or was a cheapo no-name item likely to collapse under even moderate professional use. And whether you used a vintage piece of equipment or a newer one, features like tilts and height adjustments were minimal at best.

Fortunately, the past couple of years have seen the introduction of new stands that are based on vintage designs, but incorporate up-to-date features and the advantages of modern manufacturing technology. One such line is Gibraltar’s new 8600 series.

An Overall Look
Each 8600 stand features a compact tri-leg base. The wingbolt is reinforced by an added drumkey lock to secure the base into position with no slippage. This allows you to adjust the legs of the tripod from completely flat to a fairly steep angle, making it easy to place stands close to one another without getting their legs tangled. All the stands feature die-cast parts, with nylon bushings that prevent metal-to-metal contact at the height adjustments.

---

by Rick Van Horn
Cymbal Stands

The 8610 straight and 8609 boom cymbal stands provide enough height adjustment to serve most traditional setups. The boom stand won’t get that China six feet in the air, but it’ll put a 16” crash over your rack toms just fine.

One particularly nice feature of the cymbal stands is a gearless tilter that’s adjusted by a large, easy-to-handle wingnut (and secured by yet another key) lock. This tilter rotates around a central shaft, providing infinite adjustment. Gone are the infamous cheapo ratchet tilters that never let you position a cymbal the way you want it.

Snare Stand

The 8606 snare stand features a gearless basket adjustment for infinite positioning capability. (Nice!) It also features a large, easy-to-grip handle to secure the drum within the basket. The stand offers a surprisingly wide height-adjustment range—going high enough to serve as a stand-up concert stand for a young drummer.

Hi-Hat

Lightweight hi-hat stands often seem too wimpy to withstand any serious stomping. Not so with the 8607 hi-hat. It’s made plenty tough. It also offers features you’d expect from a pro-quality unit, including adjustable spring tension, anti-creep spurs, a memory lock for height adjustment, a key-lockable clutch, and very smooth performance.

And the best part of this hi-hat is that at a measly eight pounds, it’s the heaviest of all the 8600 stands.

Conclusion

Unless you’re a heavy hitter on a heavy-metal tour on which you’re bashing heavy cymbals with heavy sticks (are you beginning to see a theme here?), there’s nothing that Gibraltar’s new 8600 stands couldn’t do for you. They’re superbly made, they offer professional functionality, they’re priced attractively—and they’re so light you can practically juggle them. What’s not to love?

Quick Looks

Zildjian 18” Oriental Crash Of Doom And Azuka Timbale Cymbals

The 18” Oriental Crash Of Doom is a smaller version of the original 20” model that was designed with input from Danny Chambers. It’s a medium-thin, dry, trashy-sounding effects cymbal. It isn’t pretty—in fact it looks bent and battered, with a double-layered lathing and hammering design. Its attack is subtly pronounced at low volumes but really sharpens and penetrates when the cymbal is struck firmly. Its wash of sound produces dark overtones with a medium decay. This ugly duckling could work well as a dark crash or ride with a clean bell sound in a jazzy situation, as an accent cymbal in a louder musical environment, or for heavy crash-riding applications. List price is $292.

The all-new 18” Azuka Timbale cymbal is a redesign of the original. Zildjian worked with Latin percussion master Alex Acuña to perfect this versatile effects cymbal. The structural design is similar to that of the 18” Crash Of Doom, but the Azuka features large circular hammering as opposed to the COD’s smaller hand-hammered look. The cymbal’s brilliant finish seems to mellow the attack, especially on the bell, which gets swallowed up in the wash and spread of overtones the longer you stay on the cymbal. As a result, ride characteristics are not well defined and seem to get lost in the music. However, when the Azuka is crashed, the attack is solid, bright, and punchy, leading to a beautiful wash of sound. List price is $280.

Mike Hald
Wahan Snare Drums With Vario Lifter
Yet More German Ingenuity

**HITS**
- Overall drum quality and sound is top-notch.
- Vario Lifter is well-designed and easy to use.

**MISSES**
- Putting the Vario Lifter at knee height can put the drumhead too high to be comfortable to play.
- Effect of Vario Lifter depends on specific combination of head tension.

by Paul Bielewicz

I have to admit, at first I was skeptical. "Another snare drum gimmick, eh? What is it this time?" But my skepticism gradually went away as I got the hang of what may very well be one of the coolest new snare-drum innovations in years.

Wahan Technologies' Vario Lifter is a mechanism that allows the user to adjust snare tension—and even to turn the snares on and off—all without missing a beat. It works via a lever that moves horizontally, where a traditional lifter arm would move vertically. A large plate attached to this lever allows the user to turn the snares on and off with his or her knee.

You may ask why this is necessary. I tried to think of any playing situation in which I'd wished that could turn the snares on or off, or adjust them on the fly in the middle of a song. I really couldn't think of anything. Sure, every now and then I'd play a song with the snares turned off, but I've always made the change between songs. But then I realized that I was only thinking this way because I'd never had the ability to change the snares in the middle of a song. Having this option available to me opened up a whole new world of cool possibilities.

Our review group consisted of three stainless-steel snare drums: a 4x14 Funkmaster, a 5x14 Studio master, and a 6x14 Stagemaster. Each drum had a highly polished mirror-finish exterior and a brushed (matte) interior. They were fitted with identical RMV one-ply coated heads, triple-flanged steel hoops, and solid tube-style lugs. And they were all equipped with Vario Lifters.

### The Vario Lifter
The design of the Vario Lifter itself is quite ingenious. Its elbow lever allows the user to achieve control of it quite easily from either an "on" or "off" position. The mechanical tension of the Vario Lifter seems much lower than that of a traditional snare throw-off. But it's perfectly adequate; it keeps the snares at proper tension without allowing them to slip or loosen up during repeated use.

### Setting Up
I put the first drum on a standard snare stand, and positioned it how I thought would be correct. Because my right leg is dominant, I assumed that it would be the leg I'd want to use for the Vario Lifter. As it turned out, because of the range of motion necessary to move the Lifter through its various positions, it was impossible to use it while keeping a bass drum beat. I began to wonder what good being able to adjust snare tension was if you couldn't do it while playing a song (presumably containing a bass-drum pattern). I then realized that if I turned the drum around and operated the Vario Lifter with my left (hi-hat) leg, I was able to play the bass drum while simultaneously adjusting the snare tension. I could still use my left foot for opening and closing the hi-hat while operating the Vario Lifter with my knee.

The first challenge in properly playing a snare drum with a Vario Lifter was to set the drum at a height that was comfortable for playing and also allowed me to operate the Lifter with my knee. This wasn't terribly difficult with the 4x14 and 5x14 drums, but did prove problematic with the 6x14. It took a lot of experimentation to find a compromise location. The drum was still a little higher for my hands and a little lower for my knee than I would have liked. But I was able to play the drum and operate the Lifter satisfactorily.

### In Use
I played a simple pattern on the drum while moving the Vario Lifter up and down repeatedly. My first impression was that the Lifter didn't really seem to provide much variation of snare tension. It could be moved through its entire range of rotation from bottom to top,
and the snares essentially went from off to on, without much in between. With a little more experimentation, I found that an improved Vario range only came when the resonant head was tightened to above-average tension, and the batter head was loosened to below-average tension. Unfortunately, that combination might not provide a drummer with the proper snare-drum sound for every song, every room being played in, and every overall musical environment.

6x14 Stagemaster
Right out of the box, the 6x14 drum required very little tuning. I increased the tension on the upper head to medium-high, and left the bottom head alone. My first impression of this drum was how incredibly responsive it was. Snare response was excellent from the lightest touch with brushes to a solid backbeat or rimshot. The drum offered a good combination of dryness and a crisp tonal character, while also possessing the fat, ringy tone one would expect from a full-size metal drum. Playing in the center of the head yielded a bright, crisp, and slightly ringy sound, while playing around the edges yielded a higher-pitched, louder, and very pronounced overtone. I wouldn’t recommend muffling this drum. It was made to sing.

With the batter head tuned to a higher tension, much of that tonal variety between the center of the head and the edges went away, hitting the center of the drum yielded a high-pitched, crisp sound, and the edges were nearly identical, with only slightly more ring. The snare response was slightly decreased, but still above average.

With the batter head at a low tension, repeated sticking patterns produced a lot of low-end overtones and build-up. This can be either a positive or negative quality, depending on how evenly the head is tensioned overall. It can sound correct if the tension is even, but muddy and dissonant if it is not. When I played a simple pattern or backbeat, nearly all the overtones went away, resulting in a dry, staccato note.

5x14 Studiomaster
With many of the positive qualities of the 6x14 and 4x14 Wahan drums, the 5x14 Studiomaster was definitely the most versatile of our sample lot. It was also the easiest of the three drums to place at a comfortable playing level and still have the Vario Lifter at a comfortable location for my knee.

Tuned high, the 5x14 drum took on many of the qualities of its 4x14 sibling. It was bright, high-pitched, and had moderate overtones. A medium tension produced a slightly more staccato note, similar volume, increased overtones, and a vastly improved snare response.

At low tension, the 5x14 drum provided a round, fat character suitable for jazz, rock, and other playing situations where a big backbeat or thick groove is desired. Brush response at this low tension was superb. However, the best part about the 5x14 drum at this tension was that this was where the Vario Lifter really started to be a lot of fun. A lower tension on the batter head gave a vastly increased range of variability to the Vario Lifter, and I started to get into some really cool grooves and patterns while varying from snares off to on, and just about every combination in between.

4x14 Funkmaster
The Funkmaster took on many of the tonal qualities of a piccolo snare when tuned high. It was bright, crisp, and ringy, with a simply Earth-shattering rimshot. Overall variation from the center of the batter head to the edges was decided less pronounced than on the other two drums, but above average nonetheless.

At a medium tension the 4x14 had a very focused sound—still crisp, but with a reduction of overtones. Tuned low, the drum was adequate and it even took on some of the qualities of the deeper drums. But overall it didn’t possess the same refinement that the other two took on at low tension.

Overall Quality
The construction and finish quality of all three of our sample drums was superb. There are many features of each drum that improve their quality and usability. All three have ten lugs and tension rods per head, which provide increased tunability and allow very high and low tensions without making the drum sound choked or muddy. The tension rods are fitted with nylon washers that provide an increased tuning range with a smoother overall motion. Because the Vario Lifter and butt plate mechanism is attached directly to the tension rod/rim assembly, it doesn’t require any extra holes in the body of the drum (as traditional throw-offs and butt plates do). This improves the resonance of the drums.

In addition to the Vario snare-tension adjuster, there is a spring-loaded wing nut on the butt-plate side that allows the user to make fine snare-tension adjustments. While the wing nut did the job, I found it a little too small to use comfortably. And, quite frankly, it seemed a little cheap in relation to the overall quality of the drums.

Conclusion
After playing the Wahan drums and getting the hang of the Vario Lifter, I had a lot of fun. Granted, not every drummer would have a need to adjust snare tension on the fly. But if a Wahan snare drum with a Vario Lifter is within your budget range, I suggest you at least check one out. It’s a well-designed innovation that can add a very cool weapon to your drum arsenal.

Don’t worry if you didn’t have a ticket to Modern Drummer’s Festival Weekend 2003, because now, with the release of this new 2-disc DVD, your living room sofa has become the best seat in the house! Produced by Hudson Music’s award-winning production team, the discs contain almost six hours of performances, interviews, and bonus features in crystal-clear digital audio and video, with easy-to-navigate menus and chapter selection. Featured are special appearances by eight of today’s most popular drum artists, as well as Mike Orris, Jr. and Louis Santiago, Jr.—the rising stars of the Undiscovered Drummer Contest—plus show-stoppers The Drumbassadors and Hip Pickles. Bonus Features include Mike Portnoy rehearsal footage, stick tricks with Steve Smith and The Drumbassadors, and an exclusive Photo Gallery. Pick up a copy at your favorite drum shop, or go online at www.moderndrummer.com to order your copy today!

Audio-Technica AE2500 Bass Drum Microphone

Two Mic's In One

The kick drum is often the most complex instrument to dial in on a recording session or live gig. Studio engineers are known to spend hours experimenting with different microphones and mic-placement techniques in order to capture the sweet sound of the drum. Adding to the challenge is the fact that different mic's accentuate different characteristics. Many times, two or more mic's are used just to get a good sound from a kick. A dynamic mic' will be employed to capture the drum's attack and energy, while a condenser microphone will be used to enhance the warmth and tonality of the drum.

In a perfect world, we'd be able to have it all. Audio-Technica hopes to shape that world with the introduction of the Artist Elite AE2500 microphone, which they modestly advertise as "the ultimate kick-drum mic'." What makes the AE2500 so different is that it's actually two mic's in one—or more specifically, two mic' elements in a single road-worthy casing. A condenser and a dynamic element are both fed through a 5-pin XLR cable that splits into two separate standard 3-pin XLR input connectors. This means you have two discrete input signals to play with from one source. As if that weren't enough, the mic' also has a switchable 10-dB pad (good for hot signals) and a switchable 80-Hz high-pass filter (nice to have, even though you wouldn't want to engage this with a kick drum).

Simply put, what A-T has pulled off here is a major accomplishment, technologically and sonically. First, the designers have managed to house two different elements in one mic' casing in perfect phase, which is no easy feat. Second, the AE2500 offers a live or studio engineer unprecedented control over the shape of a kick drum's sound. Consider the fact that you can mix the input level, EQ, compression, and gating of the condenser and dynamic elements independently for every note struck on the kick drum. That's a lot of flexibility and control toward achieving a perfect sound on a sonically complex instrument. If you want a mic' that you can just throw on the drum and quickly get a sound with, this isn't the one for you. But if you like to experiment, you'll find whatever kick sound you desire with the AE2500. To better understand this concept, let's explore the two different mic' elements in the AE2500.

Table Of The Elements

The dynamic's frequency response begins at about -5 dB at 30 Hz, and builds up to zero dB at around 60 Hz. There's a nice boost at a kick's typical sweet spot of 70 Hz before going flat again at about 200 Hz. It starts rising again around 1.5 kHz and maintains a fairly wide peak from there to around 6 kHz before rolling off dramatically from there. I hoped to see more of the extreme low end established in the dynamic part of the AE2500, but this is where the condenser takes over.

The condenser element is a cardioid pattern, which means that it concentrates most of its focus on a single source while still picking up much of what surrounds it. The frequency response is almost completely flat from a full 20 Hz to 1 kHz, but it does have a tiny bump from 40 to 50 Hz. It also has a more pronounced 3-4 kHz peak, and then a much stronger one at 9 kHz before it attenuates from there. Condenser mic's in general are more sensitive than dynamics, but they're less successful with aggressive sources (such as, oh...a kick drum). However, the condenser element is what will reproduce the overall depth and roundness of the drum, which is something lacking in dynamic kick mic's. This is also why the 10-dB pad is a welcome addition to the condenser element, since it will offer better control over high SPL levels.

As noted above, there are significant fre-
frequency boosts of varying degrees in both elements at the mid-high range. This may be surprising in a mic' that's supposed to capture the low frequencies produced by a bass drum. But a kick is not just about low end; it's also about the attack and "click" that must come through a busier modern mix—particularly when the kick is fighting for space with the bass guitar. These "click" frequencies exist in that 5-9 kHz upper-mid end of the spectrum, so this is precisely what you want. Although the AE2500's mid-highs are pronounced, this doesn't mean you will get any low-end loss. Quite the opposite. Since the condenser element is nearly flat from a full 20 Hz to 1 kHz—and considering that the extreme low-frequency point of human hearing begins at around 20 Hz—you'll have more than enough ultra-low end to play with.

On The Job

Once you put the AE2500 to work, you begin to realize that this mic' is very sensitive to proximity effect. This means that subtle movements of the mic' generate a variance in sound timbre. At an inch or two away from the head, it seemed to work best on-axis (pointing straight at the head). This close miking captured a great deal of head sound, but also got a nice low "doooom." Further back toward the middle of the drum, the mic' liked being a little more off-axis. This works to the condenser element's strength in capturing more of the kick's roominess, while still getting a great deal of attack from the dynamic element. At this point you get more of a punchy, well-rounded thud.

At the hole of the front head, the mic' again seemed to like being on-axis. In that configuration it caught a great deal of low-end spread while still retaining a tasteful attack.

Other Applications

Aside from kick drum, I also used the AE2500 for a session in Nashville on a wonderful drum called a klong yaw. It's a 3' long drum with enormous depth in the low-end frequencies. When placed at the bottom hole, the mic' captured this drum accurately and beautifully, soaking up the deep 30-60 Hz range with a richness that was immediately evidenced in the mix. It's not easy to capture those frequencies so smoothly, but the AE2500 handled them admirably. In fact, it generated that "Oh yeah" feeling you get during those special moments in a song.

Conclusion

Although I have zero complaints about the AE2500, there are a couple of things to consider before you put down your hard-earned dollar. Notably, the two-element design, with its two separate XLR connectors, means that you need two channels on a console to operate it. Using two inputs just for the kick drum on a cover band's 16-channel board would certainly cut into a sound engineer's precious real estate. This mic' is more applicable to mid-to-large tours or on studio sessions, where the sound console has input channels to spare. Also worth noting is that the 5-pin XLR that is necessary in order for the AE2500 to work is not easy to replace in a pinch.

If microphones were cars, the AE2500 would be one of those spiffy BMW convertibles—astonishingly well-made, aesthetically beautiful, and ready for any occasion. It isn't cheap, but you can get a lot of mileage out of it. The flexibility of sound shaping it provides goes beyond anything else available in the market. As such, the AE2500 may indeed be the ultimate kick drum microphone.

JOHN OTTO
The Limp Bizkit
Otto Hour
Four years ago, when John Otto was first featured in *Modern Drummer*, the then twenty-three-year-old spoke with a wisdom and knowledge that belied his age. "When I started listening to jazz, I didn't understand the music," Otto said. "But I thought, 'These guys wouldn't have any problems playing *any* kind of music.' I wanted to be able to do that."

Through hard work and practice, Otto has exceeded his wildest musical dreams, turning himself into a monster drummer. He's incorporated jazz fluency and groove efficiency into a drumming style that is his and his alone. And as a member of Limp Bizkit, a band that creates their chart-topping songs through collective improvisation, Otto has had the chance to stretch his chops and test his mettle. With singer Fred Durst, bassist Sam Rivers, DJ Lethal, and new guitarist Mike Smith, Otto has achieved something rare in these days of soulless pop stars, motorized hip-hop, and Pro Tools machinery.

Typically recorded without a click track, Limp Bizkit’s mammoth grooves are as natural as the jungle and often just as ferocious, all thanks to Otto’s slippery and smoking 2-and-4 alignment. The band has also been quite resourceful, evolving in ways that pretenders to their throne could never imagine. At the center of their growth is an outlook that admits everything and denies nothing. Rap? Jazz? Metal? Hip-hop? It’s all there in the Bizkit brand, and it starts from the ground up with John Otto’s inclusive worldview of drumming styles past and present.

by Ken Micallef
Grounded in metal, jazz, and hip-hop, Otto's fireball rhythms are the grease that makes the Bizkit cook. A native of Jacksonville, Florida, Otto grew up listening to everyone from John Bonham and Lars Ulrich to Elvin Jones and Bill Stewart. Beyond simple lip service to the greats of jazz, Otto has put in serious woodshed time and academic study, starting back at his days at the Anderson School Of The Performing Arts and moving forward to high school drum corps and individual instruction with noted teacher Rick Kirkland. Otto spent time deconstructing Elvin's solos as well as Bonham's sound. And he's studied the mad genius of Vinnie Colaiuta, but also the academic texts of Ted Reed and Kim Plainfield.

More recently, Otto has recorded his own loops, CD and mastered the art of playing two bass drums. (Besides the usual way of playing double bass, he's developed a technique of playing two pedals simultaneously with one foot.) Otto has also started his own media company. And he has somehow found the time to record Limp Bizkit's latest release, *Results May Vary*.

On the band's previous hit album, *Chocolate Starfish And The Hot Dog Flavored Water*, Otto put his years of experience and expertise to the test, merging feline hip-hop grooves and furious sticking with the band's freewheeling jams. The drummer popped it low and mean on "Hot Dog," got loose and lumbering on "My Generation," wailed like Bonham on steroids in "Full Nelson," and laid down cannonball grooves on "Livin' It Up," "Take A Look Around," and the caterwauling "Boiler."

*Results May Vary* reveals an Otto of a different stripe. The band has changed gears, replacing a guitarist and adding a harder, more menacing approach. *Results* is a dropkick to the groin with hardly a moment to catch your breath. Otto is merciless throughout. From "Eat You Alive" and "Gimme The Mic" to "Creamer," he shows why he's one of the most versatile, creative, fluid, and fiery drummers working today.
"If you put something on a record, you have to be able to duplicate it on the stage. I've seen too many bands that sound good on record but don't pull it off live."
**Otto's Acrylics**

Drums: Orange County Drum & Percussion with acrylic shells in electric blue finish
A. 16x16 floor tom
B. Roland PD-9 pad
C. 8x10 Octoban
D. 6x8 Octoban
E. 6x10 snare

Hardware: Pearl

Heads: Remo smooth white Emperors on toms and bass drum batter, smooth white Ambassador on bottoms, coated CS on snare batter

Electronics: Roland TD-10 sound module, KD-7 kick triggers (positioned next to each bass drum pedal)

Sticks: Zildjian John Otto Signature model

---

**MD:** Most people don’t think of drummers playing metal or hip-hop as being particularly expressive, but you’re extremely open, flexible, and fluid. Is that all because of your extensive training?

**John:** I think it is. It’s all those hours in the practice room and a lot of playing experience. After all that time spent on the instrument, you get to a point where you don’t have to think about things. Your playing becomes like a language, where you’re simply speaking your mind, getting your thoughts out without having to think of the words.

**MD:** A lot of jazz drummers are into certain rock drummers, but it’s not usually the other way around. Most metal guys wouldn’t know Elvin Jones from The Muppets’ Animal.

**John:** I listened to Elvin Jones a lot. Years ago I studied with this dude named Rick Kirkland. When I went to him for lessons, I told him I wanted to be able to play jazz. At that point I couldn’t play it and I didn’t understand it, but the music amazed me. It sounded cool. I eventually got into albums like Miles Davis’s *Bitches Brew*. I was into Dave Weckl for a minute. To this day, I always listen to Vinnie Colaiuta, and, of course, Steve Gadd.

**MD:** Why did you ultimately pursue rock over jazz?

**John:** That’s what I grew up with. I listened to Metallica, but also Big Daddy Kane. For me, it was always metal and rap. I’m a product of that generation. I make beats.

That said, I was influenced by a lot of different music coming up. When I got into studying drums, I decided to study it all. I don’t claim to be a super-jazzzer, but I can read charts, and I love to play samba.

**MD:** You have that fluidity, which makes everything feel good.

**John:** That’s what it’s all about to me—it’s not so much about licks. I did a clinic for Zildjian in Australia a little while back, and that’s what I focused on. I was a little concerned about it, because Vinnie Colaiuta had been booked to do it but then cancelled. So Zildjian asked me to do it. I was thinking, man, how can I do this? I’d never done any kind of clinic before. I am nowhere near the kind of player Vinnie is. But I decided to just go for it.

I started out at that clinic by playing
The **Steve Gadd** Sound.

Nobody gets inside a tune and finds the pocket like **Steve Gadd**. He set a **new standard** in contemporary drumming and is one of the **most influential drummers of all time**.

Introducing the **NEW K Custom Session** Line designed by the Zildjian Sound Lab and Steve Gadd. 18" session ride, 16" and 18" session crashes, 14" session hi-hats.

John Otto

three minutes of a straight beat without any fills. Then I stopped and said, “This is what you kids coming up have got to do. It’s not about how dope your fills are. It’s cool to have those tools, but you have to realize what your job is, which is to hold down a beat and make it feel incredible. That’s the most important fundamental.”

When you’re growing up, it’s natural to want to do all the fancy stuff. But sometimes that’s all you hear. At the same time, when I solo, I go pretty far out.

MD: I kept waiting for you to take some “fours” on Results May Vary.

John: If you pick up the Orange County Drums promo DVD that I did, you’ll get an idea of where I can go. I laid down a click and then just went for it over the top.

MD: Speaking of chops, you played in marching band in high school. Do you think that helped your drumming?

John: That was great for building chops, especially for the rudiments. I don’t practice them as much as I used to, but I really enjoyed working on things like flam taps, Swiss Army triplets, dragadiddles, and windmills. Even though I don’t work on that stuff anymore, they’re in my drumming somewhere.

MD: You attended the Anderson School Of Performing Arts. What was your audition like to get in?

John: I had to read some snare drum pieces, perform drumset etudes, play some xylophone, and know the basic rudiments of percussion. Then I tried out for the jazz band, and since I had been studying quite a bit by that time, I made it into the top jazz band. That was in 1993.

I was really into jazz at that point. I studied Gene Krupa, Buddy Rich, and a lot of the big band era. Then I moved forward into more modern styles, eventually studying people like Elvin Jones. I really like John Coltrane’s Africa/Brass record. Coltrane is my favorite saxophonist, but I also like Joe Lovano. And I still use traditional grooves when I play jazz, although you won’t catch me using traditional on Bizkit stuff. But I still practice it.

MD: You sound like you must be a natural talent and a quick study. But were there things about the drums that were hard for you to grasp?

John: Hell yeah—a lot of things. But my private instruction with Rick Kirkland is what pushed me to grab the bull by the horns. It’s about learning different techniques and developing your independence.

Kim Plainfield has a great book called Advanced Concepts. You didn’t think I knew that, did ya? [laughs] Kim is a bad-ass. I studied out of that book, and it was like busting a gut. It was really hard. That’s why some people think studying is for geeks. It takes discipline.

MD: What else was hard for you?

John: Sambas were tough for me to develop and solo over. It’s very hard to develop that independence. I worked a lot out of Ted Reed’s Syncopation, playing sambas with my feet and right hand while playing the figures in the book with my left hand.

Most of my drum lessons were, “Let’s get on the drumkit and battle.” After getting my ass kicked for so many years by my teacher...dude, you start learning that stuff. I’d go home and start chopping it up on the set. But Rick was a great drummer and teacher. He used to play with Ray Charles, and he still teaches down in Jacksonville.

MD: In 1995, when you first started jamming with what would become Limp Bizkit, did it feel somehow special?

John: Oh yeah. I knew that we would be signed within a couple years, and we were. It was a good situation. Everyone was open to ideas right away. We messed around with covers, but we were all about doing our own music. We wrote a bunch of songs together. And to this day, all of the music is written by the group. We normally jam and come up with different riffs. Then Fred comes up with the vocal melodies that go over the top.

MD: If I had heard this band before it became successful, I would have thought, “These guys are too far out to succeed. Is it metal? Hip-hop? Neo-prog?”

John: I don’t know why people connect with us. As far as a frontman for a rock band, I don’t see anybody putting it down like Fred. He’s not a trained singer, but it’s never too late, bro. He’s been studying for the last couple of years. If you put something on a record, you have to be able to duplicate it on the stage. I’ve seen too many bands that sound good on record but don’t pull it off live.

MD: Getting back to your playing, would you say that some things have come naturally to you?

John: Some things come naturally, but some I’ve had to work on, for sure. Playing time with a metronome was hard at first. Dynamics too. On the other hand, playing grooves is like second nature to me—feeling grooves as well. They’re just like melodies running in my head. But things like soloing and independence are an ongoing battle. Working on that stuff will never

stop until you leave this Earth.

MD: Was there a moment after all the practicing and training that you had a drumming epiphany, a breakthrough?

John: That came a few years back, when I was playing in an all-improvisational band. We had worked out some heads to songs, but the middle sections were totally improvised. We always played out. That can get annoying for some people, but we were learning how to feed off of each other in much the same way that Elvin and Coltrane did. At least that was the kind of vibe we were going for. That really opened my mind for drumming and put everything into the proper context.

MD: Do you recommend that drummers try to find that kind of open-ended situation?

John: Absolutely. The best way to improve is to jam, jam, jam. Get some people you like to play with and just do it. And don’t only play one style of music.

MD: I understand that Bizkit doesn’t use a click live or in recording sessions.

John: I used a click on “Build A Bridge” and “Down Another Day” on Results. But we don’t normally use one, because of the way our songs are structured. A click is a great practice tool, but there’s a certain level of natural pushing and pulling of the beat that I feel makes the music swing better.

MD: Your drumming is straighter on Results May Vary than on Chocolate Starfish. Is it a return or a change of direction?

John: It’s a little bit of a change. I really focused on playing what was appropriate for the songs. I had a great time recording...
What makes Stagg Series cast cymbals so good?

Drummers agree on what makes the best cymbals:

- B20 Bronze... a cast mixture of 80% copper and 20% tin
- Hand Lathing... to create the perfect balance, weight and sound texture from each cast.
- Hand Hammering... the craftsman creates the unique sound of each individual instrument, define the shape and tuning with experienced hands.
- A rich variation of sound and color that defines the drummer's individuality.

Each Stagg Series Cymbal is the result of skill and dedication passed on from one generation to the next. Genuine handmade instruments, not copied or mass produced. We know you will find your true sound in this range of cymbals.

Handmade cymbals worthy of great performances

John Otto

this album, but it was like doing three albums, because we recorded so much music. Not all of it was heavy. There were different songs and styles. Once everything was recorded, we tried to pick the songs that had continuity for the album.

MD: When you have access to any sound or piece of equipment, how do you rein yourself in?

John: You have to know what kind of sound you want to create. There are different sounds I tried to achieve. I tried to take a couple of songs back to the John Bonham sound, that non-safe radio sound.

MD: As far as the drum sounds, some tracks have a big room sound, others sound close-miked.

John: It’s all about doing what’s needed to serve the song. I watched Led Zeppelin’s The Song Remains The Same one night, and I told the guys I wanted to get that sound. Back in the day, they used a lot of open room miking. That was the technology they had. Then it all went to close-miking, which is the radio sound. It’s safe. I tried to integrate the two. I close-miked the drums and also spread mic’s out all around the room. We also used some vintage mic’s, like Telefunkens and Neumanns. You can clearly hear the Bonham sound toward the end of the record on the tune “Creeamer.” There was a lot of messing around happening, too, like recording different songs with different drums.

MD: Why did you add a second bass drum?

John: I wanted to get back to double bass. I never used it on our previous records, but there are spots on Results where it really worked. In the middle of “Gimme The Mic,” a double bass drum part comes in that mirrors what the whole band is playing.

MD: I like your use of different hi-hat sounds.

John: When we first break into that section, I’m playing closed hi-hat. Then four bars later it breaks into the open hi-hat with the tambourine jingles [Zildjian Re-Mix]. It cut through that section while the band was all blazing and I was playing the double bass part. I like those hi-hats. I also use them in fills.

MD: Limp Bizkit plays loud onstage. What are the challenges for you in that setting?

John: It’s a challenge to be able to hear...
John Otto

everything clearly. I don’t like in-ear monitors, because it feels like you’re playing along to a CD. I prefer speaker monitors, but I think I need to experiment more with the in-ears. I have four sub-woofers, so I can have a wall of sound if I want it. But I’ll probably be deaf soon if I’m not careful. I also use a “thumper” under my seat [low-frequency vibration device] so I can feel the bass drums and toms.

MD: Your new drums look impressive.

John: I really like the acrylic shells. They’re much better than wood for toms. They really project, which surprised me. I won’t play anything else now.

MD: Let’s talk about some specific tracks on Results. On “Eat You Alive,” the parts go from firing rock to a ska groove and then to a more free-funk style.

John: Yeah, I play a kind of space dub there. Then at the end you hear the toms and the double bass kicking in. I use the double bass sparingly, because I’m not in a speed metal band. But I do use them. They’re not just for looks. I also use the double bass on the last chorus of “Phenomenon.”

MD: On the other end of the spectrum, I heard you played with the palms of your hands on “Down Another Day.”

John: Right. It’s a mellow tune, and it just felt good to play with my hands. I hit the drums with my palms and fingers, very similar to how you’d play bongos.

MD: Is “Red Light—Green Light” a drum loop?

John: Yes, I created that on an Akai MPC. It has a few dropouts, but it’s mostly the same all the way through. To make the program not feel so drum machine-ish, I turn off the “timing correct” function for everything but the backbeat. We used it on that tune because it’s a traditional hip-hop track. Live drums weren’t called for.

Lethal put together all the music for that.

MD: How do Lethal’s loops affect you in concert?

John: We do a lot of trading. For instance, in a tune like “Phenomenon,” you hear the beat come in, which are Lethal’s programmed drums, and then I work around that beat. We do the same thing on “Nooky.” The verses are him, the breakdown in the verse is me playing rimshots, and then we go back and forth.

As I mentioned earlier, we don’t play to clicks live, so anything can happen, unlike some of these bands that plan live to a click and use Pro Tools. Some of them sound like The Backstreet Boys trying to do Bizkit. They’re slaves to the technology because everything is programmed. To me, that’s too perfect and boring.

MD: The beginning beat of “Let Me Down” sounds like the old Steve Miller song, “Take The Money And Run.”

John: Steve Miller’s drummer, Gary Mallaber, was great on that original track. I also went for a Bonham vibe on the tune, but in my own way.

MD: What are some of your upcoming projects beyond Limp Bizkit?

John: I just started an entertainment company called Mastermind. My partner and I are going to sign some street hip-hop. We’re looking for rock bands too.

MD: When are you going to make the John Otto solo record?

John: I haven’t really thought about it.

MD: From what you’ve been saying, it sounds like you have all sorts of MPC beats and song ideas.

John: I could do that, but I’d also want to include a lot of drum stuff. Hmmmm, maybe that’s something I should start thinking about. Yeah, I gotta do that.
GENUINE WUHAN CYMBALS & GONGS

Shine On with Genuine Wuhan S™ Series Cymbals

These hand-crafted, professional cymbals offer their distinctive musical and visual characteristics at prices well below those of any other manufacturer's hand-hammered models (and below those of some machine-hammered lines, as well). Shining sound... shining appearance... shining value. With the Shining S™ Series, Wuhan® once again offers drummers the best for less!

Choose ATTACK™ for sound ideas.

Now comes another great idea only from Attack™!!

The Tone Ridge® head.

The Tone Ridge® head has a muffling design built into the head. Much like the waves generated from a pebble dropped in water, sound waves reverberate from a drumhead when struck. All other devices used to absorb these overtones need to be placed on the head and are generally made of foreign materials (such as foam), which choking the sound. But the tone ridge, formed by pressing the head into a split level, damns these overtones, producing a more focused sound. ATTACK™ Tone Ridge® Drumheads are available in 1-ply, 2-ply, clear and coated.

It's impossible to describe Ron Spagnardi and not use the word "visionary." Of course, Ron himself would deny it, because he was a modest man not given to personal horn-blowing. But in the hundreds of condolence messages that we received from around the world following Ron's passing this past September 22, "visionary" was the one adjective used over and over again. And after all, what else would you call a man who saw a need that no one had seen before—and then had the courage and conviction necessary to turn that need into a reality?

The irony is, the founder, editor, and publisher of the world's most widely read drumming magazine never set out to be any of those things. He started out to be a drummer.

Ron started playing at the age of eight. He was following in the footsteps of his father, Leo Spagnardi, who had been a jazz and big band drummer in the 1940s and '50s. As a teenager, Ron played dance gigs and clubs throughout the New York/New Jersey area. In the early '60s he enrolled at the prestigious Berklee College Of Music in Boston.

After graduating from Berklee in 1963, he earned his living for the next several years by operating a music store and drum-teaching studio in New Jersey. At the same time, he continued to play at the Village Vanguard, the Five Spot, and other notable New York clubs with jazz artists such as guitarist Joe Beck and vibist Mike Mainieri.
Ron The Drummer

Studying hard at the age of ten (1953)

A sophisticated drum set artist at fifteen (1958)

On the march in high school (1959)

The editor keeps his hand in: Giggling in New Jersey in 1984...

and 1990.
In the mid-1970s, Ron’s never-ending personal quest for drumming information led him to a realization: While several music-related magazines existed at that time, none was specifically dedicated to the needs and interests of drummers. Ron was convinced that drummers would appreciate—and buy—an informative and entertaining publication all their own.

In 1977 he put his family’s savings on the line to create that publication, which he named *Modern Drummer*.

The first editions of the fledgling publication were created on a ping-pong table in the basement of the Spagnardis’ Nutley, New Jersey home. The magazine’s staff initially consisted of Ron, his wife, Isabel, his father, Leo, and his eight-year-old daughter, Lori. Ron wrote virtually all of the articles in the first issue, using a variety of pen names. The fate of the second issue depended on how well the first one sold. From such humble beginnings, Ron’s brainchild has since become the most widely read drum publication in the world.

Over the ensuing twenty-seven years, *Modern Drummer*’s headquarters moved from the Spagnardis’ basement to an office building in Clifton, New Jersey, and from there to two successive locations in the nearby town of Cedar Grove. Along the way, Ron expanded MD Publications to include books by such well-known drummers as Joe Morello, Gary Chester, Bill Bruford, Carl Palmer, and Billy Ward. Ever the teacher, Ron also authored over a dozen books himself.

In 1993 Ron created *Drum Business*, a magazine dedicated specifically to the needs of drum retailers. And, of course, he was also the producer of the legendary *MD Festival Weekend*, annual events that brought drummers from around the world to perform and mingle at Montclair State University.

Over his twenty-seven years at the helm of *MD*, Ron grew in stature as a figure in music journalism. Fortunately for all of us, he never stopped being a drummer. And as a drummer, he believed firmly that his first priority—and that of *Modern Drummer*—was to “promote the dream of drumming” to readers around the world. That belief informed and inspired every aspect of what he brought to the magazine, and through it to the worldwide drumming community. His loss is deeply felt among that community, but his legacy will live on in these pages.
Ron The Editor

Ron Spagnardi's personal history is inseparably linked to that of Modern Drummer. As his daughter Lori puts it, "MD was the sibling I never had. And sometimes I wondered which one of us came first!"

MD's headquarters from 1977 to 1979 was the Spagnardi home in Nutley, New Jersey. Ron's desk was in the basement, and the magazine was laid out on a ping-pong table.

In 1979 the magazine opened its first real office, on the second floor of 1000 Clifton Avenue, in Clifton, New Jersey. By that time Ron had taken on a more "executive" look.

MD moved to the Confield Office Park in Cedar Grove, New Jersey in 1984. Over the next ten years, Ron presided over the launch of the MD Festival Weekend, Drum Business magazine, and several successful drum books, while the magazine itself grew ever larger.

Ron and his wife Isabel designed and supervised the construction of Modern Drummer's current headquarters in Cedar Grove, which opened in 1994. From his office in that building, Ron continued to guide MD's efforts to provide drummers with the most educational, entertaining, and enjoyable magazine possible.
RON SPAGNARDI
1943 - 2003

Drummer, Visionary, Supporter ... Friend.

THANK YOU.
Remembering Our Founder
Drumming Greats On Ron Spagnardi

I am so sorry to hear of the death of Ron—it came suddenly to those of us unaware of his illness. He has certainly left a remarkable legacy in the shape of the magazine, which has done so much to encourage me and countless others in our drumming lives. And Ron leaves us in good hands, as I'm sure the MD staff will continue to maintain the high standard that he set from the beginning.

Bill Bruford
(Yes, King Crimson, Earthworks)

I join all of the other drummers in the world in mourning the loss of Ron Spagnardi. His work, enthusiasm, and commitment to all things drumming touched and enriched all of our lives. I know that these are tough days, but I am confident and grateful that the MD team will continue to honor his vision and legacy. I send you all my heartfelt condolences.

Peter Erskine
(Weather Report, Elvis Costello, jazz great)

Ron Spagnardi was a true visionary, and, in a large way, the ringleader that helped instigate the drum community that we have today. His creation, Modern Drummer magazine, was the focal point that the drum community needed in order to formalize the tendency most drummers have to freely share their love of drumming with each other. Ron had a very classy approach to presenting the drummers of every generation, and he was keenly tuned into the fact that the drummers of today are standing on the shoulders of our forefathers. This is one of the facets that I like the most about MD, and it was obviously a reflection of Ron's philosophy.

Whenever I hung with Ron at the numerous MD Festivals that I attended and performed at, he was a true gentleman—warm and enthusiastic, and truly excited about all the drummers who were there, both onstage and backstage. Ron's support of my drumming career has been very important to me, both on a personal level and a professional level. Personally, because I respected him and his views, it pleased me that he respected me and my drumming approach. Professionally, because of the influence and power of Modern Drummer to inform the public and shape an image. Because he publicized what I was doing in the music world, it helped my career as a professional drummer in a large way.

I was shocked and saddened by Ron's passing, as I didn't know he was suffering from cancer. I miss Ron and know he is hanging in with some of the cats he dearly loved—Buddy, Gene, Papa Jo, and Armand. We will long be influenced by the legacy of Ron Spagnardi. Let us keep his name and vision alive.

Steve Smith
(Journey, Vital Information)

Ron Spagnardi started the first drum magazine, which, to me, is a major feat. He not only brought the drumming community together, he brought drums to the magazine stand. And not just to the magazine stand, but to the American and international psyche, putting drumming in a place of stature. MD gave drumming credibility and legitimized it in a way that hadn't been done before. Ron really broke new ground, and when I heard about the risks he took, using the family savings to realize his dream, I really have to give a BRAVO in capital letters to him.

Ron always made me feel at home at the Festivals and such. Maybe it's my Italian blood, but he always made me feel like a goombah! When I talked to him on the phone, Ron just had a way of making me feel like I was an old friend. We need more people like that in the world. He had a successful business and remained personable, so it can be done. I applaud him for that.

Vinnie Colaiuta
(Frank Zappa, Sting, Faith Hill)

I had the honor of meeting Ron a couple of times. He made MD what it is today—the greatest drum magazine in the world. We drummers would be lost without it. We lost one of the greatest guys on the planet who put out one of the greatest books for guys like me. I had the honor to grace two covers of MD, and I'm an avid reader—I read every issue that comes out!

No doubt, Ron will be missed by me, the drum industry, and all of the drummers of the world. But I do know he's in a great place, and I hope to see him when I get there. God bless him.

Peter Criss
(KISS)

By virtue of losing Ron, we lost the editor of probably the greatest rock 'n' roll drum magazine there is, and it's a great loss to all of us, especially drummers. I've read Modern Drummer ever since it started, and I still read every issue.

Joey Kramer
(Aerosmith)

I've known Ron Spagnardi since the inception of Modern Drummer. I think he was a real visionary in his field, and I was happy to be involved with him at an early date. I found Ron to be a very sincere and honest person. And years ago, when he took some lessons with me, I found him to be a very good drummer. I thought he was also a talented writer. He produced some very meaningful books, particularly The Big Band Drummer, which he wrote three years ago. In fact, I still use it a great deal. That's a marvelous book—among his many others.

Ed Shaughnessy
(Johnny Carson's Tonight Show, Doc Severinsen)

Words cannot describe all my feelings for Ron. I knew him well enough to know that he had the strength and passion to fight as long or longer than most people would. I wish I could have said goodbye and praised him for having created the most amazing drum magazine in the world. I send all my love and thoughts to his family and everyone at Modern Drummer.

Kenny Aronoff
(John Mellencamp, Smashing Pumpkins, Michelle Branch)

Ron was a great friend. I can remember vividly the first Modern Drummer Festival I played. I had my dad with me, and Ron and his wife, Isabel, knew we were big Detroit Lions fans and that there was a game on that we were missing. Ron went home and brought a TV into my dressing room so my dad could watch the Lions game. He sat in...
The man who introduced the world to drumming.

Ron Spagnardi - Truly the Modern Drummer
Ron Spagnardi Tribute

I'm very sorry to hear of Ron's passing. He was the best friend a drummer—and our industry—could have.

John Riley
(Vanguard Orchestra, jazz educator)

Ron was such a great guy and so supportive of me in particular. Please give my love and condolences to Isabel and everyone else, in the organization. Again, my love and support to all.

Danny Gottlieb
(Pat Metheny Group, Blues Brothers)

I'm so sorry to hear of Ron's passing. Please give my heartfelt sympathy and condolences to all at MD, and especially to his family.

Terry Bozzio
(Frank Zappa, solo artist)

I was very saddened to learn of Ron's passing. It certainly is true that he did a great deal to heighten the awareness and appreciation of drumming. I also think that Ron must have felt very proud of what he accomplished, like a musician who leaves behind a bunch of great recordings. He will be remembered for creating a forum that had never existed before—and one that will last.

Robby Ameen
(Eddie Palmieri, Ruben Blades, Jack Bruce)

I wish to extend my deepest sympathy and condolences to Isabel and Lori Spagnardi, the staff of Modern Drummer, and all friends and extended family for the loss of Ron Spagnardi. I would also like to express my gratitude for the countless hours of joy and inspiration that Ron brought to me personally via his wonderful creation, Modern Drummer magazine.

Several years ago I approached Ron about doing an in-depth story on him. I thought it would be fascinating to talk with him about his vision and how he achieved the American dream. Though flattered, Ron expressed that he would be wasting pages of the magazine that could be dedicated to other drummers. In a world where every business mogul is so ready to toot their horn and have a book written about them, Ron was truly a man of humility.

Zoro
(Lanny Krawitz, Bobby Brown)

I remember when I was about thirteen years old, sitting in a jazz club with my dad (jazz great Sonny Igoe) and Ron watching Joe Morello play. We just hung out, and Ron talked to me like I was a person, not some little kid who didn't know anything (which is, of course, what I was).

That night Ron and my dad were talking about his new project at the time, Modern Drummer magazine. He was asking my father what he felt should be included in the magazine and who should be featured. I felt impossibly cool, just being near these guys and sitting at a bar!

At the end of the night, Ron pulled me off to the side and said, "Your dad was telling me about you. He thinks you're the real thing." What that meant to me, the fact that Ron would take the time to do that for an awkward, gangly thirteen-year-old boy when he could have so easily blown me off, was something I'll never forget.

Ron was a class act from top to bottom, and his magazine will forever be a tribute to his vision, kindness, and integrity.

Tommy Igoe
(Broadway's The Lion King)

Very sorry to hear the sad news about Ron. I knew he wasn't well for quite some time, but he was a trooper through it all. My thoughts go out to Ron's family.

Jeff Hamilton
(Diana Krall, Clayton/Hamilton Orchestra)

I mourn the passing of Ron Spagnardi, who I feel made a huge contribution to the drumming community. His support and love will be deeply missed. From the deepest part of my heart, I send condolences to Isabel and Lori Spagnardi and the staff of Modern Drummer.

Horacio "El Negro" Hernandez
(Gonzalo Rubalcaba, Michel Camilo, Jack Bruce)

I just found out about Ron's passing, but I wanted to extend my condolences to his family and the entire MD staff. I feel very lucky to have been able to meet him and share important moments with him.

Antonio Sanchez
(Pat Metheny Band, MD Festival 2003 Performer)

I am so sorry about Ron. He was a good man and a visionary. He will be missed.

Paul Leim
(Randy Travis, Shania Twain, Nashville studio giant)

There's simply nothing one can say... I will miss Ron's great spirit, but will forever cherish his work for our community. My deepest sympathy to all of his family and friends.

Joe Franco
(The Good Rats, Twisted Sister)

Missed Out On Any Of MD’s First Twenty-Five Years? Now You Can Have It All With...

MODERN DRUMMER’s 25-YEAR DIGITAL ARCHIVE!

Tired of weeding through tons of back issues to find an interview with your favorite drummer, a great transcription, or a valuable lesson? NOW YOU CAN HAVE IT ALL RIGHT AT YOUR FINGERTIPS!

- Hundreds of enlightening interviews with the greats of drumming.
- A world of practical advice in every article ever published in MD’s roster of over 35 departments.
- Tons of beats, exercises, drum solos, and charts.
- Thousands of book and record reviews.

Complete product coverage as it appeared in every issue from January ’77 to December ’01!

THE MD DIGITAL ARCHIVE contains an astounding 265 jam-packed issues. That’s over 35,000 pages of easy-to-access information on one handy, 8-CD-Rom Set or one computer DVD.

Here are just a few of the great features:
- Full Archive Search
- Download Updated Index Via Internet
- Custom Graphical User Interface
- Zoom And Pan
- Annotation Support
- Preview Issue Cover Thumbnails
- Bookmark Support
- Single Or Multiple Page Viewing

All 265 issues for only $199.97

Here’s What Just A Few Readers Have Already Said...

“My wife blessed me with a copy of the Archive for Christmas. I’ve been enjoying revisiting articles that I haven’t seen in years. Congratulations on what will be the reference standard for drum and percussion research for years to come.”

Ben B. Humolstown, PA

“My compliments on the MD Digital Archive. I’m very impressed with how easy and intuitive the software navigates around the archive. An excellent product—and considering the tons of useful and relevant information, a bargain!”

Ron Spagnardi Tribute

I'm very sorry to hear about Ron's passing. I offer my condolences to all.

Cindy Blackman
(Lenny Kravitz, independent jazz artist)

I didn't know Ron well, but I must say that on the occasions when our paths crossed, he was always a most gracious man. My prayers are with his family, as well as with the MD staff.

Tommy Aldridge
(Ozzy Osbourne, Whitesnake)

Ron Spagnardi changed the drumming world with his magazine. We're all thankful for him. Our deepest sympathy and condolences go to his family and staff at Modern Drummer.

The Reyes Family (Walfredo Sr., Walfredo Jr., and Daniel)

I just heard the news about Ron. My heart goes out to the family and all of you at MD. He was a special individual with a vision and so much integrity. He will be missed.

Adam Nussbaum
(John Abercrombie, John Scofield)

I'm so sorry to hear about the passing of Ron. The drumming world will be a little on the quiet side now that his big contribution to our klang, brush, and pop universe has been silenced. Please pass along my sincere regards to Ron's family and friends. They can take comfort in knowing that at least now Buddy has someone to talk to in heaven. Long live Ron and his percussive vision, and long live all the modern drummers everywhere.

Vic Delorenzo
(Violent Femmes)

Editor's note: Unfortunately, we received so many notes about Ron that it was impossible to fit them all here. Our sincere thanks go to all of the artists who shared their thoughts about him.

RON SPAGNARDI
A Man of Vision
A man that will never be forgotten...

from your friends at REMO
The Industry Pays Tribute

Ron Spagnardi never set out to become a figure in the drum industry. Like most of the people who populate that industry, Ron set out to be a player. But in launching Modern Drummer magazine, he inevitably forged alliances with the leading drum industry stakeholders, most of whom shared Ron's fondness for drums and drummers. Here's a sampling of their tributes to him. Each is testimony to the great esteem with which Ron was held in the drum community.

Ron and Isabel have been good friends of mine for over twenty-five years, and I always looked forward to getting together with them at the Modern Drummer Festival. I'll never forget the incredible parties Ron would throw for all the artists. We always had a ball. Thank you, Ron, for being so hospitable, generous, and most of all, for being a beautiful person. I will never forget your friendship and great contribution to our percussion world.

Lennie DiMuzio (Sabian)

Ron Spagnardi—the man, the musician, the entrepreneur, the visionary, the human being. He possessed all of these qualities and wore them with great dignity. Ron will be missed, both as a friend and colleague. With profound respect and admiration,

Vic Firth (Vic Firth Inc.)

Four or five years ago, MD editor Rick Van Horn called me. It seems Ron was rooting around in MD's gear room looking for some sticks that he could sit down and practice with. Rick said to me, "Ron's in there muttering, 'I can't even find a pair of lousy 7As.' Will you please send him a pair? So I went into our factory, found a pair of the worst possible rejects, and had "lousy 7As" imprinted on them. Ron called me shortly after that and could scarcely utter a word because he was laughing so hard. The last time I saw him, he reminded me of those lousy 7As, and he still had them. Ron's contribution to this industry can't be overstated. I miss him and miss knowing that he was always at the other end of the telephone.

Pat Brown (Pro-Mark)

My most memorable moments with Ron were spent in Italian restaurants. The evening prior to the Modern Drummer Festival, he would host a quiet dinner for his dear friend and much-loved industry figure, the late Steve Etelson. I felt honored to have a standing invitation to attend and would always try to get to New Jersey on time!

Though quiet, unassuming, and almost shy, Ron could certainly hold his own over a plate of pasta, sharing drumming tales and having a good laugh. He was very sensitive and caring—a really nice person.

When Steve Etelson died, Ron was absolutely devastated. A photo from their last dinner still sits on Ron's desk. Yet for all he did to create and communicate the world of drumming we enjoy today, Ron Spagnardi was a reluctant hero. I guess we should understand that. After all, he was one of us—a drummer.

Wayne Blanchard (Sabian)

What I remember most about Ron Spagnardi was his passion and love for drumming and drummers. He was one of the few of them to realize his dream: Modern Drummer magazine. In fact, he was the magazine and the magazine was him. We have lost a person who cannot be replaced. Ron, we are all better off for having known you.

Roy Burns (Aquarian Industries)

With Ron's passing, the worldwide drum and percussion community has lost one of its most articulate and influential voices. For those of us who got to know him, we mourn the loss of a friend and celebrate a great life.

David McAllister (Latin Percussion)

Like Armand Zildjian, Ron leaves a legacy that few people can lay claim to. Although he created the industry standard in percussion magazines, he was a drummer at heart—he truly loved drummers. I was always impressed at how available he made himself, even to unimportant guys like me! His passing is an immense loss to the entire percussion community, a community that he largely created. God bless you, Ron.

John P. DeChristopher (Zildjian)

Few people in life take the risk or seize the opportunity to truly change things for all those who will come after. Ron Spagnardi was one who chose to do just that. Most drummers today have been touched by the magazine he created. As a publication that celebrates both the instruments and the brotherhood that sets drumming apart from all other groups of musicians, Modern Drummer has chronicled our world and become the voice of our art. Ron understood the bond that all drummers feel and chose to make it his life's work.

Jim Phiffer (Pearl)

I first spoke with Ron in 1978, and he always encouraged me in times when we shared concerns about our new companies ever becoming successful. A few years ago he asked if I would join him and others in a percussion ensemble to open the MD Festival. I told him I hadn't played professionally in years and really wasn't up for it. "No" was not an option. Ron told me everything would be fine and I would be among industry players like myself. When I heard the ensemble included Vic Firth and Roy Burns, I immediately called him and said, "What are you thinking? These are great players."

Like our talks in 1978, Ron reassured me that we should just go out and do it, and it turned out to be the most memorable time. He loved encouraging people and helping them through hard times. His dream was to have a magazine to bring drummers together, and he did just that. His success is a major part of drum history.

Don Lombardi (Drum Workshop)

All of us here at Yamaha are extremely saddened by the news of Ron's passing. His editorials are famous for bringing the drumming community together as a family—always encouraging, always inspiring, always determined to allow the music to take us to the next level of drumming. He reminded us that ultimately, despite our differences, we belong to one family with a love for the same instrument. Ron will be truly missed by all.

Jerry Andreas (Yamaha Drums)

Ron Spagnardi was a very humble man. I don't think he ever fully understood the significance of his and Isabel's accomplishments with Modern Drummer magazine, Drum Business, and the Modern Drummer Festival Weekend. Today we take for granted the instant dissemination of information, but we have to remember that it was Ron who first gave the percussion community its forum for communication and education. We owe a great deal to this man.

Carol Calato (Regal Tip)

"In Ron's Memory"

A scholarship fund has been established in Ron's memory at his alma mater, Berklee College Of Music. Contributions can be made to The Ronald Spagnardi Memorial Scholarship, Berklee College Of Music, Attention Beverly Tryon, 1140 Boylston St., Boston, MA 02215-3693. Drummers interested in applying for this scholarship can contact Berklee at (617) 747-2660 or tryon@berklee.edu.
IN MEMORIAM

RON SPAGNARDI

OUR HEARTS GO OUT TO THE SPAGNARDI FAMILY AND RON'S COLLEAGUES FOR THE LOSS OF A DEAR FRIEND AND FOUNDER OF MODERN DRUMMER MAGAZINE

FROM YOUR FRIENDS AT MEINL
Gigs:

Neil Young • Peter Frampton • Bonnie Raitt • Jackson Browne • Joe Walsh
LeAnn Rimes • Vince Gill • Mark Knopfler • Amy Grant • Lee Ann Womack
Since the mid-‘60s, guitar legend Peter Frampton has played with some of the finest drummers in the world—Jeff Porcaro, JR Robinson, and Humble Pie’s Jerry Shirley, to name but a few. For the past six years, Frampton has relied on Nashville drummer Chad Cromwell. According to Peter “For me, the drummer in any band is the engine that drives and steers the rest of the players. Chad is one of a handful of players in the world who has the sensitivity and overall feel to take the music to another level. After playing live and recording with Chad, I am totally spoiled. He’s a very special player.”

One of the qualities Chad Cromwell has—besides his warm, down-to-earth personality—is his ability to switch gears in the drum seat at a moment’s notice. He’s rocked out on record and on tour with such artists as Frampton, Neil Young, and Joe Walsh. But you can also find him laying down a traditional country groove with Vince Gill, Amy Grant, or LeAnn Rimes. He’s also toured and recorded with former Dire Straits frontman Mark Knopfler for the past eight years.

Cromwell was born in Paducah, Kentucky on June 14, 1957. His family moved to Memphis, Tennessee when he was three. He commuted to Los Angeles in the mid-‘80s before settling in Nashville in 1990. Since his move to the Music City, Chad has become one of the most in-demand session players on the scene, while still maintaining a busy touring schedule. Few drummers get the opportunity to have success at these two, often at-odds sides of the music business.

By Billy Amendola
Photos by Paul La Raia
MD: How did you become Peter Frampton's drummer?
Chad: I took the gig with Peter to sub for Eddie Bayers, who ran into some conflicts and was unable to do a short three-week run of dates. A good buddy of mine that I do session work with here in Nashville, Michael Rhodes, was playing bass for Peter at the time. He called and asked if I'd be interested in doing the gig. I've been with him for about six years.

MD: Was Peter's new record, *Now*, tracked live as a band?
Chad: Some of it was and some I overdubbed on. The way Peter does a lot of his stuff is, he'll demo the songs with co-writers that he'll be working with and then build up his demos. Some turned out to be really good performances.

MD: Let's go back to when you first started playing. What made you want to play drums?
Chad: I used to hang out with a Greek family that lived down the street from me. They had a Sears Silvertone guitar with the amp built into the case. Do you remember those? [laughs] And they had a set of drums from Sears as well. This was right around the height of The Beatles, so they even had catalog-order Beatle boots! I remember seeing that stuff and thinking it was really exotic. I was an athlete in school, so that was my focus. But when I went around to that house, it was really different and fascinating to me.

I originally wanted to play bass. Then that following year, a guy that I played ball with and his brother both got that same Silvertone drums & guitar setup. They invited me over, and I sat down on the drumset and just started playing. It was automatic. There was no thought given to it; I just could play them. So I got the drumming bug from that, and from then on I started asking my folks about getting a drumset. They wouldn't go for it, but they did give me a snare drum with a stand and a cymbal, along with a pair of drumsticks and a pair of brushes. I got on that snare drum and went at it.

MD: How old were you at the time?
Chad: I was nine years old. I just threw myself at playing that snare drum when I wasn't playing football or baseball.

MD: Who was the first drummer you saw that made you say "Wow"?
Chad: Buddy Rich was the first guy that made me go, "Look at that!" It was one of his performances on the Johnny Carson show. I remember the snare drum and hi-hat stuff that he did—just explosive and unbelievable. There's obviously never been anyone before or since like him. Buddy was just a force of nature behind the drumset.

MD: Who came next?
Chad: Ringo was a big influence. I always dug the way he played. It was a combination of his playing and those songs. Being so young, I didn't fully appreciate his drumming, but I knew I liked it. Then when I was twelve, my family moved to what I thought was the other side of the world, even though it was only about twenty miles away. I felt totally isolated and had to attend another school. It was a tough time for me. I turned that into rebellion. I kind of went left at that point, and I hated school and hated being an athlete.

All of a sudden, Woodstock—and that whole world—got me excited about music. Playing on a drumset became, "Alright, this is what I've got to do to get through whatever this time is." My folks bought me a Gretsch set that I put in my bedroom. It was a double bass kit, and I threw myself into those drums.

MD: Did you take lessons?
Chad: Not back then. Much later on I took a couple of jazz lessons. I'm mostly self-taught, though. I started playing along with records.

MD: What records would you play to?
Chad: I'd play with James Gang records and Humble Pie's *Live At The Fillmore*.

MD: That must be a trip now when you play "I Don't Need No Doctor" with Peter Frampton. [The guitarist was a member of Humble Pie.]
Chad: [laughs] Yeah, it is. In fact, it's ironic, isn't it?

MD: Who else would you listen to?
Chad: The art-rock stuff was starting to happen then, like Yes, Genesis, and Emerson, Lake & Palmer. I also got into Led Zeppelin. And I was still hanging onto The Beatles, even though they had broken up by that time.

By the time I was thirteen or fourteen, I was starting to think about getting serious about playing. I finally found myself getting into some garage bands around Memphis, and then high school band kind of stuff. Not proper school band, but "Hey, let's put a rock 'n' roll band together and see if we can get a couple of prom gigs." Then a musician friend I knew was in one of the more popular rock bands at the time, and their drummer quit, so he asked me if I wanted to play for them. That sort of got me into the mainstream professional scene in Memphis.

There's a studio in Memphis called Ardent Studios where a lot of records have been made—The Box Tops, part of *Led Zeppelin III* was done there, The Bar-Kays, ZZ Top, Stevie Ray and Jimmie Vaughan.... It was the place. I had an opportunity with this band to get in after-hours and be part of a recording session. It was my first exposure to being in a studio. That really changed me. It was like, "Okay, I like this. I want more."
A few years later I met Jim Stewart and Bobby Manuel. Jim was the guy who founded Stax Records. Stax had since been sold, and Jim had signed a production deal with Atlantic Records, via Jerry Wexler, and they started producing their own records and artists. Their production company was called Daily Planet, and their big hit was “Disco Duck.” You remember that song?

MD: Oh yeah, by the radio deejay Rick Dees.

Chad: Right. That was their big claim to fame. Dees was a Memphis deejay who made it big in LA. Anyway, I somehow wormed my way into getting to sit around and watch those guys, and they took me under their wing. That’s when I learned how to make a living in this business. Those guys taught me so much about recording and drumming. They loaded me down with tapes of Al Jackson—I became a huge fan of his. JR Robinson was coming in at the time, so they had me check him out too. There was no better way to learn than just being a fly on the wall and watching these guys do their thing. And what I learned was how to play a groove. At that point, I became a disciple of R&B. It changed my whole approach to being a drummer.

MD: You can hear that in your playing. On the new Vince Gill record, Next Big Thing, there’s a song called “She Never Makes Me Cry.” You’re right in the pocket on that one.

Chad: Thank you. That’s the R&B thing I’m known for. I’m not the guy to call for flashy stuff. My attitude is, I don’t play drums on songs, I play songs on drums. And that’s what those guys showed me, what my role was in the making of records and playing music and songs. They showed me how to qualify every single note I played and make them consistent, steady, and solid. They also taught me “bass drum up.”

MD: What’s that?

Chad: If you listen to R&B music, the groove comes from the bottom end. The emphasis is from the bass and the pulse of the bass on up. With jazz, the bass drum really is more of an accent. Those guys taught me to play from the bottom up rather
Chad Cromwell

than from the top down. I can’t tell you how important that was for me. It put me into a pop radio and R&B style of playing.

MD: How did you get involved with Joe Walsh?
Chad: I met Joe in Memphis and ended up recording and jamming with him in a studio that belonged to the lady who’s now my wife, Leslie. That kind of put me in a whole other direction. Joe was the first artist I worked with who I had grown up listening to. It was like, Man, how serendipitous is this? So I spent seven years off and on with him, and that got me to L.A. I actually did two records with Joe. One was called *Got Any Gum?*, and then the last record I did was *Ordinary Average Guy*. Then a subsequent tour followed with Joe Vitale and me on double drums. Al Kooper was in that band too. Go figure that combination. It was wacky. [laughs]

MD: How did you hook up with Neil Young?
Chad: I was recommended by Neil’s coproducer, Niko Bolas, as well as by Neil’s bass player, Rick Rosas, who I had played with in Joe’s band.

MD: How would Neil run his sessions?
Chad: It’s almost more like stream of consciousness. He is totally not into crafting, refining, and making it sound like a perfect record. His thing is all about capturing the moment. He once said, “The deal is to get a good photograph of the song when it’s born.” The rawer, more instinctive, and spontaneous the moment can be while you’re recording with him, the better it is.

MD: You also toured with Neil?
Chad: I hit it pretty hard with him for about two years, starting in ’88 with his band The Bluenotes. We did *This Note’s For You,* Freedom, and Lucky Thirteen. We did the song “Rockin’ In The Free World,” which was kind of the pre-cursor to what was going on in Seattle.

I remember we were in Spokane, Washington, and all of a sudden he walked in with “Rockin’ In The Free World,” which had nothing to do with the blues. The next thing we knew, within a matter of weeks, the tour was over and Neil, the bass player, and I found ourselves in New York City at the old Hit Factory cutting tracks. There’s one song called “Don’t Cry” that’s like a textbook example of what Nirvana eventually did, going from that real sort of clean, quiet verse to a totally explosive chorus. We went from a ten-piece

start rehearsing.”

MD: When did you make the move to Nashville?

Chad: When I was on Jackson’s tour, we played in Nashville at an amphitheater and my wife, Leslie, met me there. I got up the next morning and left to continue Jackson’s tour, and she went house hunting. When I finished Jackson’s tour, we came back home to Memphis to spend the Christmas holidays, and then we packed up and moved to Nashville.

MD: What advice would you give to a drummer wanting to move to Nashville? I’ve always heard that the session scene is almost impossible to break in to.

Chad: It is. But I would advise drummers to do the same thing I was told, which is to be patient and be prepared to do whatever you have to do as you wait your turn. There’s no automatic in. I had a really slammin’ résumé coming in to town, right off of Jackson Browne and Neil Young, but it didn’t mean a thing.

At that time, Larry Londin was still alive. There were teams of musicians here that did the lion’s share of the work. So if you wanted to get in on that team, the only way was if one of those guys couldn’t make it. By the time I came here, there were four or five other guys in line ahead of me waiting for their shot. That was the point I decided to stop touring for a while. I wanted to dig in and get my career started in Nashville.

My wife and I starved for two years—I mean desperate times. We got dangerously close to bankruptcy. Several times I thought this wasn’t going to work. I was married, building a house, and had a baby coming. It was tough times. But it all worked out. Now we have two beautiful children, Sheppard and Shannon, who are ten and eight.

MD: Obviously you have a supportive wife. That really helps.

Chad: Very much so. And she understands the business.

MD: Who was your first record with in Nashville?

Chad: The first artist of note that I recorded with was Joan Baez. Willie Weeks was on bass for that session. And one of the guys who produced that record, Kenny Greenberg, has since become one of my best friends in town. He co-wrote Amy Grant’s “House Of Love” with Wally Wilson. So at that point I started getting calls for demo dates, and one thing led to another.

Tony Brown, who ran MCA Records here...
Chad Cromwell

Chad: Oh definitely. Mark obviously fell in love with Nashville. And then, by virtue of that, that’s how I ended up meeting him through a recommendation. Then the next thing you know, we’ve recorded everything Mark’s put on tape for the past eight years. We actually started recording together in ’95. Then the first tour we did together was in ’96, and that’s how the band The 96ers came about.

MD: Listening to Knopfler’s solo recordings, there’s more country influence than you would expect.

Chad: It’s been a really good thing for me. I stay pretty busy by virtue of the fact that I do some touring. Obviously there’s a certain amount of work that I’m not doing here. It puts me in a position of letting go of certain regular-call clients, some of which I’m okay about letting go, some of which I’m not okay about letting go. I never have been just a dyed-in-the-wool session guy or dyed-in-the-wool touring musician.

The way I think of it is, it’s like two completely different disciplines. There’s a craft side of things when you’re a session player, because you’re going in and making records and trying to get X number of songs recorded in a specific amount of time—and you’ve got to adapt to that quickly. It’s not like when you’re in a band and you’ve got a year to write your songs, rehearse a month to work it all out, and then go in the studio.

What I do is, I show up on the day, charts are handed out, and generally on a country date we’ll do one or two songs per session, which is a three-hour block of time. With some artists who are more established and have bigger budgets—like Mark Knopfler—we’ll use a whole day to work on one song. And that’s great because you can really explore the territory. Vince Gill does the same thing. He gets an acoustic guitar out and plays the song for us, instead of us just listening to a demo. That way there’s no distracting information that can lead you in a certain direction.

MD: When you’re doing a country record as opposed to a rock record, is your mindset different? For instance, will you not play a certain fill on a country date because it’s more of a rock fill?

Chad: There are certain things you stay away from. To be honest, with country playing, I try to keep my fills to a minimum. And if I do play any, they’re basically little stepladders into a verse, bridge, solo, or ending. They’re not going to be two-measure, drawn-out sorts of fills. That’s not saying I haven’t done that on country records, though. But the majority of the time the fills are dead-on and straightforward.

MD: Do you normally record with a click?

Chad: Most times I cut to a click or some kind of loop. I love playing to loops because they’re more musical. And from a drummer’s standpoint, they’re great.
Snare Solutions

Evans offers an unparalleled range of drumheads designed exclusively for snare drums...complete with special features to make fine-tuning your snare sound a reality.

Power Center®/Power Center Reverse Dot®
A 10mil single-ply head with a 5mil reinforcement dot that's vented to allow a more natural vibration.

Genera™/Genera Dry™
A 10mil single-ply head with a slimmer 2mil overtone control ring and optional dry vents yields a fat and focused spread and woody tone.

Genera HD™/Heavy duty/HD Dry™
A durable double-ply head (7.5mil and 5mil) with an internal overtone control ring and optional dry vents that enhance articulation and make the head bark.

ST™ (super tough)/ST Dry™
Packaging two plies of 7.5mil film, the ST offers serious protection. It promotes a full bandwidth re-birth and delivers high-volume punch, yet remains articulate.

Chad Cromwell

because it frees you up to be a little more expressive with the drum part.

For a while there, the loop was half of the drum track on a lot of records I was doing. That said, sometimes the very best way to record is without a click, but you’ve got to have a hell of a band to do that.

MD: I think an individual's personality has a lot to do with getting call-backs, live or in the studio. Do you agree?

Chad: Definitely. You’ve got to be a team player. It’s all about that. I’ve seen some pretty strong personalities come in and destroy a room. They might be amazing players, but that’s only part of it. You’ve got to be able to get along with people, especially when you’re touring.

I think the role of the drummer is to be the foundation. You’re trying to provide peace of mind. It’s your responsibility to make sure everyone else on that stage is feeling secure, and it requires a certain kind of personality to be able to do that. There aren’t many Keith Moons in the world who get to make a living the way he played. God bless him—I totally love Moon, but you know, a loose cannon behind a drumset can be a really destructive thing.

MD: Any other words of wisdom you’d like to share?

Chad: Don’t use my methods, kids. [laughs] I would say to any young drummer who wants to do this, go back and listen to the old Stax, Muscle Shoals, Philly, and Detroit records. Study them, because that’s the practical lineage to what we do now as far as making records goes. And that includes country music. Country is no different from pop, rock, or R&B. The drumming principles are all the same. If you listen to any of those records, what you’re going to find coming from the drumkit are very simple parts with a couple of drum fills that you’ll never forget.

For more with Chad, check out February’s Web Exclusive interview at www.moderndrummer.com. You can also hear some of the tracks discussed in this piece at the site on MD Radio.

**DW BY DESIGN**

What happens when you take more than 30 years of pedal expertise and combine it with some of the most technologically advanced hi-hat features ever conceived? You get a hi-hat that is so smooth, effortless and durable that it’s destined to be standard issue for the world’s top drummers. It’s no surprise to us that the next generation of DW hi-hats has already becoming “The Drummer’s Choice”. . . . we designed it that way.

The Half-Time Shuffle
It's All About The Feel

by Ron Spagnardi

The half-time shuffle, so expertly used by players like Bernard Purdie and the late Jeff Porcaro, among others, should be a part of every drummer's vocabulary. The following examples will give you a good foundation for this important feel.

First, practice the basic 16th-note-triplet pattern to get a feel for the half-time shuffle. Play the right hand on a closed hi-hat.

Now let's add the bass drum on 1 and 3 and a solid snare drum backbeat on 2 and 4.

Once you've developed a feel for the basic beat, we can begin to add notes to make the patterns more interesting. Try incorporating the additional bass drum notes shown in example 3.

Here's another variation for the bass drum.

Now the real fun begins, as we start to add ghost notes on the snare drum. Be sure to play the ghost notes at a low level, much softer than the backbeats. The feel of the half-time shuffle is lost if the balance between the softer ghost notes and the stronger backbeats is not carefully observed. Practice adding the two ghost notes in the following example.

Here ghost notes have been added to the first and third triplets.

The creative challenge of the half-time shuffle lies in mixing varied bass drum patterns with ghost notes, while maintaining a solid backbeat, which acts as an anchor. In each of the following examples, the interplay between the bass drum and snare drum gets increasingly complex. Just be certain to always focus on proper balance as you play through the patterns: hi-hat and bass drum at a moderate volume, a strong snare drum backbeat, and very soft, subtle ghost notes.

RAY LUZIER
(David Lee Roth, The Nixons, Hideous Sun Demons)
www.rayluzier.com
Odd Times
Part 4: Soloing Across The Barline
by John Riley

Playing in odd times is fun and challenging. It gets even more interesting when common motivic ideas are played in 5/4. In my previous column (December 2003), we worked with building solos by combining one-measure phrases in 5/4. Here we’ll work in two-measure phrases, and we’ll stretch the boundaries by employing 3/4, 4/4, and 5/8 phrases to camouflage beat 1 of the second bar.

Let’s begin with ideas built from the six-stroke roll, paradiddles, and quarter-note triplets. Play two measures of 5/4 time before each phrase. Maintaining the standard pattern with your feet will be challenging at first, but doing so will help you keep your place. (Be sure to swing all of the notated 8th notes.)

These phrases, based on two five-note sticking patterns, create interesting rhythmic counterpoint.

[Music notation is shown here, with the top and bottom lines being the two sticking patterns and the middle line being the counterpoint.]
Finally, here are a few solo ideas based on common three-, four-, and five-note ideas.

I hope these four articles on odd time playing have inspired you to explore the genre. Once you’ve internalized these ideas, try playing them without their respective foot ostinatos. Combine these ideas with those from the earlier column, and with your own phrases, to build longer solos in 5/4. Experiment with these concepts in other odd time signatures; the possibilities are endless. Strive to eliminate musical boundaries. There should be no restrictions on your musical freedom and expression, regardless of time signature. Good luck!
Carter Beauford is a throwback to the glory days of fusion and funk drumming. He plays with the pocket of David Garibaldi and Clyde Stubblefield, the energy and chops (and left-hand lead) of Simon Phillips and Billy Cobham, and the improvisational abilities of Jo Jones. "Grey Street," from the most recent Dave Matthews Band studio release, Busted Stuff, shows Carter in top form.

As in most of his performances, Carter chooses not to play a straight riding pattern on the hi-hat during the main verse groove of the song. The sound he produces is a full-drumset funk concept that uses all limbs to create a groove, without repeating parts in any of the limbs. This can be extremely difficult to master and is learned through a systematic study of jazz and funk independence. Read along with the tune and check out how the hi-hat pattern and snare drum ghost notes outline the main pulse defined by the bass drum.

Also of interest on the track are the choruses, where Carter uses the ride cymbal bell (notated with a diamond shape) to place syncopated accents in a theme that recurs in each chorus. Check out how these accents make the bass drum part sound even funkier. Also pay attention to Carter's choice of splash or China cymbal sounds on the downbeats (where other drummers often use a crash cymbal). Carter's use of the splash is original and funky.

Carter also has a serious penchant for beat syncopation and displacement. Check out the funky stuff in measures 50 through 51 and 62 through 65, among other places. The rideout of the song (measure 128 to end) is played with a steady ride cymbal pulse and lots of tricky syncopations all over the kit. Carter's rhythmic inventiveness, independence, and full-on chops are on display here. Right before the fadeout (measures 123 and 124) he treats us to an especially challenging flourish.
A Perfect Circle's
Josh Freese
Thirteenth Step

by Ed Breckenfeld

The long-awaited second album from modern art rockers A Perfect Circle is finally out. With Tool frontman Maynard Keenan's distinctive vocal style setting the mood, comparisons between the drumming of Josh Freese and Tool's Danny Carey are inevitable. Josh's patterns, while not as complicated as math-rock mastermind Carey's, are consistently interesting and creative, and completely suit the band's dreamy compositions. Freese also brings rare taste and feel to his playing, with just enough flash to keep things exciting.

"The Package"
Josh's double bass lick adds explosiveness to the end of the lead track's bridge (at the 4:41 mark of the tune).

"Weak And Powerless"
A repetitive staccato 6/8 beat relentlessly drives the verse of this song. Note the subtle difference between the last beat of each measure. (0:23)

"Blue"
Josh gives a rhythmic twist to the drum fill leading into the first chorus of this tune. (1:08)

"Vanishing"
Here's a wonderful idea for a cymbal part. The two-handed alternating ride cymbal and hi-hat pattern sounds like a strange echo in this half-time verse groove. (1:11)

"The Noose"
The re-intro drum beat in this song features great accent and drag work, coupled with an unusual stop/start effect. The result spells groove with a capital G! (1:52)

"The Outsider"
This little gem of a beat immediately follows the song's first chorus. Notice the two-against-three polyrhythm of the bass drum.
pattern in this 6/8 groove. (1:17)

```
\[ \begin{array}{c}
\text{\( \frac{3}{2} \)} \\
\text{\( \frac{3}{2} \)} \\
\text{\( \frac{3}{2} \)} \\
\end{array} \]
```

“Crimes”

Here’s one of those drum beats that sounds like it’s in an odd time signature, but it’s really in 4/4. Freese accomplishes this by the displacement of his tom and bass drum, coupled with the movement of the snare backbeat. (0:58)

```
\[ \begin{array}{c}
\text{\( \frac{3}{2} \)} \\
\text{\( \frac{3}{2} \)} \\
\text{\( \frac{3}{2} \)} \\
\end{array} \]
```

“Gravity”

On the other hand, Josh’s 7/8 groove makes this song feel as smooth and comfortable as it would if he were playing in 4/4 time. (0:24)

```
\[ \begin{array}{c}
\text{\( \frac{3}{2} \)} \\
\text{\( \frac{3}{2} \)} \\
\text{\( \frac{3}{2} \)} \\
\end{array} \]
```

You can contact Ed Breckenfeld through his Web site at www.edbreckenfeld.com.
Getting More Sounds From Your Kit

Part 2: Investing In New Sounds

by Larry T. Kennedy

Last month we examined the many ways to get additional sounds out of your existing drumkit. That's an important process that can save you time and money when it comes to expanding your musical palette. But eventually, you might get to the point where you've exhausted the versatility of what you already own. At that point, you'll likely want to invest in some new gear to achieve new sounds.

Additional Drums

Needless to say, adding drums to your existing kit will broaden your acoustic spectrum. With an eye to versatility, a piccolo snare drum (3" to 4" in depth, 13" to 14" in diameter) is an excellent first investment. Not only can it provide a tighter "pop" on a song that calls for a more cutting snare sound, you could also throw off the snares for a sort of timbale sound. (And just having a "spare" snare drum already on the kit in case of emergency is always a good idea.)

If a traditional piccolo is not to your taste, there are dozens of "auxiliary" snares available, most of which are 10" or 12" in diameter and come in a variety of depths. Some of these are designed to be "flown" off a stand on a multi-clamp, so they can be put virtually anywhere on the kit.

You might also consider adding toms to your kit. Many manufacturers offer add-on tom packages (8" and 10" rack toms on a stand, or additional floor toms) for entry-level "package" kits. Toms are usually available individually in higher-priced drum series. And don't overlook options like Tama's Octobans, or Remo's venerable RotoToms.

Lately, pros like Dave Weckl and Simon Phillips have added 18" bass drums to their kits. The only limits are your budget, your imagination, and the sizes of the stages you play on.

Additional Cymbals

When it comes to adding cymbal sounds to your kit, my advice is to avoid more "gimmicky" models and go for versatility. For example, I don't know if I'll ever own a China cymbal. The sounds of most Chinas I've heard are too specific; I wouldn't want to use that sound more than a couple of times a night. Likewise with splashes: The one that I own has a very thin sound, and I don't want to use it too often. Of course, rules are made to be broken, and many drummers use special-purpose cymbals frequently to good effect.

I also advise against adding any cymbal that's too close in sound to those you already own. A 17" crash from the same series as your 16" and 18" crashes probably won't sound noticeably different to the audience. Instead, go for something from a different series altogether, and perhaps in a more dramatically different size.

Looking again at versatility, think in terms of multiple applications for a cymbal. For example, when I next shop for cymbals, I'll probably look for a thin 12" or 13" model that could double as a small crash on soft songs and a splash on loud songs.

Most of the major cymbal manufacturers, in their catalogs and on their Web sites, offer great suggestions about adding cymbal
Effects cymbals—like these Thomas Lang signature models from Meinl—can add variety to your cymbal setup.

sounds. To narrow down your choices, do some research before you go shopping. But no matter what you’re looking for, remember to take your own cymbals with you. This will give you an immediate and accurate impression of how a new candidate might fit into the ensemble.

Don’t forget that adding cymbals or drums to your kit will also involve adding hardware to hold the new items, as well as finding the stage space to accommodate that hardware. To reduce your investment and the amount of real estate you’ll require, consider using clamps, extension arms, and other accessory items available from most drum and hardware companies. After all, it’s silly to pay more for a stand than for the cymbal it will hold.

Percussion Instruments

Several percussion and hardware manufacturers offer special mounting brackets that allow you to play a cowbell, block, or tambourine with a bass drum pedal. This is a great way to use your left foot to add a bit of color to a Latin song, or to create a cowbell backbeat on a rock tune.

Here are a couple of tips regarding these brackets, based on my own experience. First, purchase additional L-rods so that you can attach one to each bell, block, and tambourine that you plan to use. It’s easier and faster to swap the instruments in and out of the bracket on a dark stage if they’re already on their own L-rods. Also, I recommend the use of Regal Tip’s Walfredo Reyes cowbell beater. It has hard and soft playing surfaces, and its vertical length allows better contact with a variety of instruments. (I was forever getting my conventional bass drum beater stuck inside my tambourine.)

Mini-Timbales are a nifty addition to a kit. LP’s are sold in 6" and 8" pairs that, truthfully, sound more like bongos. These add a nice flavor to Latin or Caribbean songs. Toca sells their mini-timbales separately, in 6", 8", 10", and 13" sizes, from which you can create a custom setup. Pearl’s Primera models are 13" timbale add-ons, complete with mount and tom arm. Meinl offers similar models. Of course, you may opt for a full-size set of timbales if you play a lot of music where this sound is desired.

Those who play country music, or other styles where a cross-stick sound is required, should consider using a synthetic block. I use LP’s lower-pitched Jam Block, mounted on my hi-hat pull rod. The block makes a louder and more consistent “click” sound than cross-sticking on the snare does. Blocks of one form or another are available from all of the percussion companies. I particularly like the versatility of positioning offered by the Jam Blocks, which can be mounted from either end or from the middle of the back.

Different Strokes

Since the types of music that you and I play are different—as are our musical tastes and budgets—what works for me might not work for you. But I hope that I’ve succeeded in giving you some ideas to explore.

Just do me one favor: Don’t behave like a guitarist. It seems that every time the average guitarist buys a new toy, he or she wants to use it on every song. Do your experimenting at home or in the rehearsal room. When you’re performing, use your new sounds tastefully—and only when they add to the music. Remember, a small amount of something new can make a huge contribution to your band’s sound.
I've been feeling blue lately. You see, when I was a year old, I used to jump out of my crib headfirst. (Why didn't my parents know then that I needed a set of drums?) I jumped out so often that, now as an adult, my neck is a bit of a mess. It acted up recently and I had to take a break to heal and get my strength back. And I'm a horrible sick person. My wife threatens to leave me, and to be honest, that threat is what drives me toward recovery. Well, the following is about two people who aren't like me at all.

“Facing each moment truthfully has everything to do with drumming, but it has more to do with life.”

I met Mark Craney (drummer for Jeff Beck, Gino Vanelli, Jethro Tull, Tommy Bolin, Jean-Luc Ponty, and many others) when I moved to LA from New York in 1988. He was just leaving the stage after playing at a drum benefit, and I overheard him say to his friends, “If any of you find a big toe up there on the stage, it’s mine.” This is how Craney stands at the edge of oblivion. He faces life’s sharpest edges with humor. He’s one of the “Supermans” in my life.

Back in 1986, Mark was on tour with Tower Of Power. As the band’s plane was landing in Oakland, California, he had a total failure of his kidneys. The next two years included many failed attempts at regaining their use, but in the end, he needed to be on dialysis. In 1988, Mark received a kidney transplant, but by then medical complications led to the amputation of one of his big toes, which led to most of his drumming muscles becoming emaciated. He’s been battling serious health issues ever since.

Mark somehow managed to tour with famed Animals vocalist Eric Burdon from ’94 to ’97. Try to imagine what he was going through. There was Mark, leaning on his cane, flying around the world, and playing drums with Burdon. He had no big toe, perhaps less strength in his left hand than a four-year-old, and he could hardly walk up one flight of stairs. But he was playing drums and rocking out!

During the final year of touring, Mark was receiving kidney dialysis wherever they traveled—all over the world, and three times a week. Eventually the touring became too much for him and he had to stop. He’s still receiving dialysis three times a week and still hoping for another organ transplant.

Mark Craney is brave. I’m talking about bravery of the highest order. He faces his obstacles head on, with no excuses, and moves on. To me, facing each moment truthfully has everything to do with drumming, but it has more to do with life.

Humility

I first met Ron Spagnardi at the Modern Drummer Festival, where I performed in 2000. At the time, he seemed like a kid who was overjoyed at hanging out with this year’s drumming heroes. Later, when I met him again as he sat behind his desk at the offices of Modern Drummer, I saw a selfless, curious, and very open man. Please allow me to give more details.

I’ve been to a few major drum companies, and when you meet the “big guy” behind the desk, there’s usually a bravado, a general “gestalt of pride” in that person
that fills the entire office space. I would think this is totally natural. If I ever built a company that employed as many people, fed their families, and fulfilled a service to humanity, I’d stick out my chest too. But there was Ron, sitting behind his desk. Upon seeing me, his eyes were filled with wonder and curiosity. I was amazed to realize that this guy admired me. The DNA of that moment has stayed with me. Ron had no ego because it was replaced with something so much bigger: humility.

Ron Spagnardi was one of the most humble people I’ve ever met. He was also a fine drummer. (A couple of years back he and I, along with MD editorial director Bill Miller, spent an afternoon jamming at Ron’s house.) Perhaps Ron sometimes wondered how he would’ve handled better drumming success. A slight change in the roll of the dice, and he could’ve easily been one of those guys endorsing Slingerland on the back of their catalog in the late ’60s. Instead, he created Modern Drummer magazine. I hope this was luckier for him. It definitely was luckier for all of us.

**Bravery**

It takes bravery almost beyond my imagining to take all of one’s resources and channel them into a new, unknown venture like a magazine. That’s exactly what Ron did. (He had a big pair, as they say in Brooklyn.) His wife, Isabel, deserves massive credit as well. For those of you who aren’t happily married, there is a higher, more loving, more brave, more everything person that appears when two people are true teammates in a loving relationship. It was obvious to me that the Spagnardis had this quality in their lives.

Ron didn’t talk much about himself, and he avoided talking about his illness. My personal guess is that it was his disdain for public sympathy and his desire for privacy that kept him from telling people about the specifics of his cancer. But I do know that within the last few years he had several major operations that caused severe physical distress. But Ron always acted like nothing was wrong, and our conversations were filled with curiosity and intensity. He loved music, he loved drumming, and best yet, he loved drummers.

As the last three years passed, I began to experience the kind of admiration for Ron that I had previously held only for Mark Craney. If I felt as poorly as Ron had on some of those days, I would’ve stayed home and let the staff handle things. But that wasn’t his style. He responded by coming to work day in and day out unless he was totally incapacitated.

Ron was very weak these last two years, especially in his lower body. What did he do? He evaluated himself honestly, looked at his options, and acted towards something positive. Remember the series of articles he wrote about a year ago on music theory? This was Ron’s new obsession. He began refocusing his efforts on the piano and studying theory! Limited to not being able to play the drums as well as before his illness, his curiosity took over and he continued to grow in another direction. He became so accomplished on piano that he began playing solo gigs at a local café. I’m awed by this.

Ron had a voracious appetite for learning and a great work ethic. Bill Miller told me that in the last five years, Ron Spagnardi wrote and published nine method books. To me, these are Leonardo Da Vinci-type numbers! And he never let up. His last editorial, written right before his death, was about encouraging drummers to learn to read music.

I feel certain that every issue of Modern Drummer will forever include Ron Spagnardi’s handprints. He was a true friend, even a benefactor, to drummers everywhere. And writing this article has reminded me how certain “angels” can help each of us in our drumming and in our lives. I know I will think of Ron and Mark at times of distress and draw courage from them. Hey, it’s already happened!

*Billy Ward has worked with Carly Simon, Robbie Robertson, Ace Frehley, John Pattiucci, and Joan Osborne. His book, Inside Out: Exploring The Mental Aspects Of Drumming, was recently released by Modern Drummer Publications. Billy can be reached at his Web site,* www.billyward.com.
Bob Ezrin
From The Producer’s Chair

by Gail Worley

Canadian-born studio legend Bob Ezrin has produced great records for thirty years. When pressed, he admits feeling almost destined for a career recording music. Not only was Ezrin’s uncle the first private individual in Canada to have a stereo record player, he also owned that country’s largest private record collection.

“As a child, while other kids were playing ball, I’d be downstairs at my uncle’s house, playing with tape machines and transcription turntables, listening to music, and assimilating the wonders of stereo,” Ezrin remembers. “It really piqued my imagination and became part of my life from an early age.” For his twelfth birthday, instead of getting a bike, Bob got a tape recorder.

Ezrin gained basic studio recording experience working for CBC television and the University of Toronto’s audio/video production department. At the age of eighteen he joined the Nimbus 9 Production Company as Jack Richardson’s assistant. “That was my first real job as a music producer, and I had just enough knowledge to be dangerous,” Ezrin jokes. “Everything else I gained from being around Jack and asking lots of questions.”

To hone Ezrin’s studio skills, Richardson sent him to the University of Rochester’s Eastman School of Music, where he studied production with Phil Ramone and Dave Green. “That was one of the most wonderful things anyone has ever done for me,” Ezrin says. “I must have impressed Phil and Dave, because they took special interest in me. Phil and I are still friends.”

Bob produced his first album, Alice Cooper’s Love It To Death, when he was just nineteen. The record included the group’s first hit single, “I’m Eighteen.” The chemistry between Ezrin and the band was so hot, he went on to produce the group’s Killer, School’s Out, and Billion Dollar Babies albums.

Ezrin’s success with Alice Cooper led to production gigs on some of the most remarkable albums of the 1970s, including Aerosmith’s Get Your Wings, Kiss’s Destroyer, Peter Gabriel’s eponymous debut, and Pink Floyd’s legendary The Wall. Over the past three decades, Bob has produced acts as varied as Rod Stewart, Lou Reed, Kula Shaker, and Monster Magnet, along with innumerable film soundtracks and collections. When speaking with him about the many amazingly talented drummers he’s known and worked with in his long and colorful career, though, it’s best to start at the beginning.

MD: How did working with the Alice Cooper group shape your early career?

Bob: Doing the first two Alice Cooper albums created my career. Prior to that, I was just a guy working in a production company in Toronto. When I saw Alice Cooper play in New York City, I knew this band was about something far more important than just rock music. This was the beginning of a cultural movement. I told the band we’d produce them before my bosses had even considered the possibility. [laughs]

When I came back from New York, my bosses were very upset with me. But I was quite determined and excited. I told them, “This will be the most important thing to happen to rock music since its inception. We have to do this record.” Finally Jack Richardson said, “If you like this so much, you do it.”

I was lucky to be given an opportunity to put my money where my mouth was and to follow my conviction. I was also fortunate that what I had learned up to then seemed to go all pointed toward that moment. What Alice Cooper needed from a producer was exactly what I had gathered along the way.

MD: What was Alice Cooper drummer Neal Smith like to work with?

Bob: Neal and I spent days working out the drum parts before we ever got to the studio, so that there was no question of what was going to be played when we did get there. That was the first time I had
ever worked like that. Neal showed me how that kind of discipline, singularity of focus, and preparation could make the recording process go way quicker. We were able to cut those albums in a very short period of time, because we weren’t inventing on the floor. It was just a matter of capturing the performance.

In the studio, Neal was wonderful: tireless, flamboyant, and too egotistical to accept defeat under any circumstances. He was totally up for trying anything weird, even to the extent of trucking his enormous kit of Slingerland drums into the women’s bathroom in the RCA records building in Chicago during the
Bob Ezrin sessions for Killer. [laughs] We recorded the drum tracks for “Halo Of Flies” in there because it was a big space that was also reverberant enough to create the effect we wanted.

MD: Most people familiar with early KISS albums agree that Peter Criss’s playing on Destroyer is completely different from the drumming on any other KISS album. How did you work with Peter for his performance on that record?

Bob: On Destroyer we were attempting something a bit more complicated. There were time changes, layered arrangements, and lots of stuff on that record that was new to the band. It really pushed them past the limits of their playing abilities. Within a few days of beginning rehearsals, they put the instruments down and went to school. I brought in a blackboard and we started with basic rhythm theory, the value of notes, what I meant when I said a triplet, how they sounded and how they were played. I know that sounds really weird. It’s certainly way beyond what producers would do now. I think one of the things that gave records of that era so much personality was that it was the band playing, with all their quirks and idiosyncrasies. That’s missing in many cases now. In the case of KISS, we did some schooling, and then we did a lot of really careful drum arranging. There’s very little improvisation on Destroyer.

MD: One of your major projects in 2003 was Jane’s Addiction’s comeback album, Strays. How was it to work with Stephen Perkins?

Bob: Stephen is an absolutely magnificent drummer and percussionist. He has great technique, but he also has so much soul, and he’s incredibly inventive. I love working with him. He’s really special.

MD: You worked with Simon Phillips on a couple of projects.

Bob: Simon is a great drummer. We did a live show at Carnegie Hall for Roger Daltrey’s fiftieth birthday, which was recorded for an album and for pay-per-view. The other members of The Who joined Roger, along with various guest stars and a large house band with the Juilliard Symphony. Simon was the glue. He’s the supreme technician and a great-feeling drummer. We also worked together on a Jeff Beck album that was never finished because the band broke up halfway through the record.

MD: Who are some of your other favorite drummers?

Bob: I’ve been fortunate to work with many amazing drummers. I was lucky to work with BJ Wilson before he died. I think BJ was a groundbreaking drummer. The work he did with Procol Harum really opened up a whole new way of looking at drums.

I never got to work with Hal Blaine, who was a hero of mine. That’s something I regret. I have worked with Jim Keltner, Kenny Aronoff, Vinnie Colatuta, Aynsley Dunbar—who was one of the true greats on a kit—and some other terrific drummers.

I didn’t get to work with John Bonham, but I did work with his son Jason. He’s also pretty special. I think a lot of the talent in that family is genetic. Jason has this visceral feel for the beat that’s very like his dad’s, and that’s something you can’t teach a small child. Jason also has a similar sense of power to his father.

Speaking of famous progeny, Zak Starkey is a great drummer. After I did the Roger Daltrey project, Roger put together a touring band with Zak as the drummer. I came into a rehearsal where Zak was playing, and I was very impressed. He brings another dimension to The Who altogether.

MD: Speaking of The Who, did you ever get a chance to work with Keith Moon?

Bob: I had the pleasure of knowing Keith, but we never worked together. What Keith brought to The Who—more than just the theatrical lead drumming he’d perform, on their recordings and live—was a spirit and energy that helped fuel the group. Keith had such a huge affect on all of them. He really was the emotional glue of the band. When he died, the bottom fell out of their universe. Roger continues to work on developing a tribute to Keith.

While I was still a teenager, I worked for a band that opened for The Who at the Coliseum in Toronto. The stage was very low, and being on the same floor with The Who was a magical experience. To be standing there when they hit the stage in such a small venue was unbelievable.

MD: Getting back to your studio experiences, how long do you like to spend on getting drum tracks?

Bob: I like to get them pretty quickly. I don’t want my drummer playing more
Behind the driving sound of Linkin Park you'll find Rob Bourdon sitting comfortably behind a Gibraltar rack.

To let Rob tell it, "Gibraltar hardware gives me the freedom to set up my kit any way I can imagine. I'm able to mix electronic and acoustic drums into one solid setup."

Having gear that's securely positioned is of prime importance for a drummer who gigs all over the world. But there's more to the story. "I move my legs around a lot while playing which is why I love my rack's new single-leg snare stand. Not having the legs of a traditional snare stand makes everything cleaner."

Visit your drum shop and pick up a Rack Factory brochure. You'll see more than 30 configurations designed to accommodate any size kit, any brand of drums. Only then will you experience real freedom behind the kit.

Bob Ezrin

than three or four takes of anything to get the performance, unless he or she is really challenged and has to go section by section. That's how we did it with Stephen Perkins, because he's such a great player and a quick study. We'd do three or four takes, then he'd go home and listen to that performance overnight. The next day he'd come back and do a better one—usually before anyone else even showed up at the studio. And it would be brilliant.

MD: Do you have favorite rooms or spaces for recording drums in?

Bob: I used to really like isolated booths, though I haven't used one in a very long time. I've been thinking lately about going back to doing that. It makes for a tighter, more controlled drum sound. Then you can apply effects and different types of controlled ambiance to create whatever environment you feel you need around the drums.

Generally, though, I just go back into a normal, natural-sounding room and record there. That's always the best environment. The more natural the sound, the more flexibility you have. We've recorded in some pretty strange places over the years, including loading bays, alleys, and strange live hallways. I like live areas for certain kinds of drum sounds, but I think what's most important is to find a room that the drums like, and that likes the drums. It's also very important to find the place in the room where the drums "speak" the best, where you get the most clarity, power, and density at the same time. A place that's too live has certain inherent limitations, such as when the sound folds over on itself and you get cancellations, weird phase relationships, and a kind of reverberance that you can't control. That becomes a difficult thing to mix.

MD: How hands-on are you in getting drum sounds?

Bob: I'm very hands-on about the sound of the drums during mixing. But during recording, it depends. Under many circumstances, I'll place the mic's and tune the drums myself. Lately, though, I've been working with some great people like [producer/engineer] Brian Virtue. I worked with Brian on the Jane's record, and I didn't have to do much of anything. We picked the kit and the area of the room we liked, discussed what kinds of mic's we were going to put up, and bingo, there it was. We didn't do a huge amount of EQing, either.

MD: Do you have preferences for certain drums or drumheads?

Bob: I love DW drums these days, and I love a great Ludwig kit when I can find one. We trucked out an old Rogers for some of the Jane's stuff, and it sounded brilliant. I also love Slingerland, which we used for the Alice Cooper albums. I think most of the higher-end drum manufacturers come up with great-sounding kits from time to time, and it's really a matter of finding one. As far as heads go, they have a tremendous amount to do with the playing style of the drummer and the sound that one is targeting. The good news about heads is that there are so many different kinds. Consequently, simply changing heads can produce many different effects.

MD: Do you record everything?

Bob: Very often we're working with people who are ultra-prepared, so it's not an improvisational situation at all. In that case, we just go for getting the take. If we're writing on the floor or experimenting, then it's a case of recording everything. One thing I can say is that every time the song rolls, we're in "record." Once in a while I'll say, "Let's run it from the top and see what we've got." Then I'll turn to the engineer and say, "Play that back," and he'll tell me we weren't recording. My advice to anyone working in a studio is that the record light should always be on. You lose nothing when you record, especially in the digital world.

MD: You've been producing records for over thirty years. How have you changed as a producer since the '70s?

Bob: I go into every situation with a strong focus, a personal level of enthusiasm and commitment to the band, and an artistic and professional commitment to the music. I almost feel like I'm reinventing the wheel every single time. I often wish I had "The Bob Ezrin Method." That would make life a lot simpler, and I'd get a lot more records done. But I approach every project in its own way, adapting to whatever is required for that particular record. I may have a few more tools at my disposal these days, but in that sense I haven't changed since I started doing this.

I'm just thankful to wake up every morning and realize that I get to do music as opposed to asking, "Would you like fries with that, sir?" Getting paid to do something I've loved all my life is a major blessing.

Preparing For A Double Bass Pedal

by Larry T. Kennedy

A double pedal can offer lots of creative musical options. But it also requires preparation on your part.

I’ve been tempted for some time now to purchase a double bass drum pedal, and thereby put my left foot to better use than simply playing hi-hat on 2 and 4. The fact that several name-brand manufacturers have released double pedals that sell for around $200 has made this move even easier to justify.

However, before you decide to move on to a double bass pedal, you’d be well-advised to determine just why it is you want one. Do you plan to play thrash or speed metal? Do you want to play more complex bass drum figures? Knowing exactly what you wish to accomplish will help you to make a better investment of time and money.

Getting Started

Pad Or Silencers. Just like our early drumming studies, double bass playing often requires hours of monotonous practice. You’ll want to keep your initial efforts to yourself as much as possible, in order to avoid disturbing your family and neighbors. If you don’t already own a practice-pad kit or silencers for your drums, obtaining one or the other is an excellent way to begin. It’s much easier to hear what you’re doing on a pad than on a drum. You’ll be better able to hear each stroke and thus be aware of slight differences in volume and time.

An alternative to a full-scale practice-pad kit are stand-alone bass drum pads offered by several manufacturers. While not as “complete” as the full kits, these pads do allow you to practice your bass drum technique in relative silence.

Metronome. If you don’t already own a metronome, you should definitely purchase one. Many of us use our hi-hat foot as a sort of metronome by marking time on 2 and 4 or in quarter notes. With this reference point gone, it’s easier to speed up or slow down. Practicing with a metronome is invaluable for keeping strokes clean, even, and in tempo.

I use a small clip-on metronome from Seiko that cost me less than $25. I attach it to a music stand, where it also comes in handy for holding thick method books open to the correct page.

A Good Throne. I strongly recommend a throne with a motorcycle-style seat and a backrest. When playing a single bass drum pedal, most of us use the left foot as a balance point. If we play “heel up,” we have two balance points—the throne and the left foot on the hi-hat pedal. When both heels are up, we’re left with only the throne as a balance point. A larger throne with a backrest also helps support the back and hips.

Hi-Hat With Movable Legs. If you don’t already own one, you’ll probably need to buy a hi-hat stand with legs that move, so that you can place the left pedal closer to the hi-hat. Fortunately, this feature has become more common, even on low- to mid-priced models. There are also two-legged stands that use the pedal footboard as the third “leg.” In addition, you’ll want a drop clutch that will allow you to drop the top hi-hat cymbal into the closed position for double-bass playing, and then pick it back up again automatically when you want to operate the hi-hat again.

A temporary practice alternative for a hi-hat with movable legs is turning the stand so that the hi-hat pedal faces away from...
you. You’ll have to drop the cymbals closed, and you won’t be able to play hi-hat with your foot. But you will be able to practice on your bass drum pedals until you can afford to buy that stand with moveable legs.

Physical Preparation

Heel-Up Technique. Since one of the primary reasons to take up double bass is to increase power and volume, you’ll likely want to consider playing heel-up. Like many heel-up players, I used to leave the beater up against the head at the end of a stroke. The problem with this method is that leaving one beater against the head as the other one strikes will reduce the volume and resonance of the second stroke. Pay very close attention to releasing the beater from the head after each stroke. If you’re currently leaving the beater against the head when you play a single pedal, start concentrating on lifting it off following each stroke. Making this effort now with your single-pedal foot will really help later when you begin working with both pedals.

Exercise. bicycling is an excellent way to train for double bass playing. The muscles used in pedaling a bike are the same ones used in the heel-up bass drum stroke.

Actually, any exercise that strengthens your lower back muscles and hips is advised. Joining a gym and working on your back, leg, and hip muscles will help you to build endurance and control for double pedal playing.

Play Left-Footed. Try playing a song or two left-footed on your single pedal during your practice sessions. This means moving your left foot over to the bass drum pedal, and playing the time on your ride cymbal or some other conveniently reachable surface. This will strengthen the muscles on your left side, while also improving your independence.

Develop Left-Hand Hi-Hat Rides. Work on developing your ability to play hi-hat rides with your left hand. It’s much easier to balance with both heels up when playing in this “open” manner than it is when crossing the right hand over the left to reach the hi-hat. While it may take a while to be able to play this way, I still recommend developing the technique.

Practice Materials. There are plenty of books and videos available on the subject of double bass drum technique. Among these are The Encyclopedia Of Double Bass Drumming, by Bobby Rondinelli and Michael Lauren, and Double Bass Drumming by Joe Franco. I’ve also discovered that good ol’ Stick Control, by George Lawrence Stone, is excellent for developing bass-drum technique, even though it was written primarily for the hands. Simply practice the exercises as directed, using your feet instead of your hands.

Any time and effort you put into expanding your ability in the area of double pedal playing will certainly make you a better all-around drummer. And who knows, some day you may even dazzle the audience and your bandmates with that wicked double bass fill you’ve always wanted to pull off!
THOMAS LANG
CREATIVE CONTROL
A 2-DISC SET

On Creative Control, Thomas Lang presents the unique and innovative system that he has used to develop his awesome speed, control, finesse and coordination—a step-by-step system that will allow you to hone your drumming chops so that you can play more effectively, in any style of music.

- Advanced technique for hands and feet
- Applied rudiments and orchestration
- Dynamic foot control
- Sticktricks and showmanship
- Ergonomic mechanics on the drumkit
- Advanced interdependence and coordination
- Multi-pedal orchestrations
- Creative practice concepts
- Twin effect pedal playing and practice method
- Contemporary groove concepts
- Bonus Footage includes Thomas performing with loops as well as live action footage from the recent Meinl Generation-X Tour.

SPECIAL FEATURES
Audio files, in both ACID® (PC) and REX (Mac) formats, will allow you to loop any of the exercises or performances and even change tempo without affecting the pitch! Also included are 94 printable PDF files of transcriptions of Thomas' performances and over 100 exercises.

RUNNING TIME: OVER 5 HOURS!
In last month’s action-packed installment, we followed the exploits of a rock-solid drummer, who, when confronted with the harsh reality of playing under the baton of a conductor for the first time, withered into a mushy pile of self-doubt in about five seconds. While fictitious, that story was based in truth, and served to illustrate the potential consequences of being unprepared when a musical curveball is heaved in your direction.

For example, I clearly remember the summer of the “Lame Piano-Playing Music Director Who Expected Me To Follow The Tempo By Watching His Fat Bouncing Butt.” Ah yes, one of my personal favorites from years gone by. I can’t fathom why music schools don’t offer a course for that essential skill. They could call it Tushy Tempo Adventures. Hmmmm, perhaps a new book? As I’ve often said, having the ability to follow a conductor is a great skill to add to your musical toolbox. As orchestras and various ensembles continue to explore more contemporary rock, pop, and jazz literature, there is a true need for what I like to call “the conductable drummer.”

By and large, most drummers are not conductable, simply because of the ingrained methodology referred to as good time. A conducted setting can throw the concept of good time on its head, and a proficient drummer can sound hopelessly lost if the concept of what makes time good isn’t revised.

It’s helpful to remember that conductors and drummers really need each other in order to make the music work. My friend Joe Church, who is the musical director of The Lion King, offers a great analogy that I think helps clarify the relationship. He says, “I’m the captain, and you are my engineer. I steer the ship, and you make it go. Without you, I can’t move. Without me, you can’t see where you’re going. We need each other.”

Drummers and conductors have another deep bond. There are more musician jokes with us as the punch line than all others combined. We have to stick together!

It’s good to remember that conductors and drummers really need each other in order to make the music work.
Out of everything I've seen from behind and in front of a drumset, nothing frustrates my musical brethren more than trying to follow a conductor (except, perhaps, smirking female vocalists who insist on playing cowbell on every song, including jazz ballads). I've seen musicians literally cry, quip, and swear never to return after a bad performance with a conductor. I've witnessed "First-Call Snobby Studio Punks" reduced to quivering Jelli-O by good conductors who were not impressed with their pedigree. I've viewed the crème de la crème of touring drummers—just off the road with the biggest names in pop/rock—unceremoniously discharged after one performance, and asked never to return. Conversely, I've seen average drummers carve out very nice relationships with conductors because of their ability to navigate musical waters with deft and class, leading to unbelievably vast pools of employment. There is a lesson to be learned here, so let's get to it.

Note: For readability, I'll be referring to conductors in the masculine "he." However, there are many excellent female conductors, and their numbers are growing all the time.

Getting To The Core

Like anything else you do behind a set of drums, working for a conductor deserves to have a core philosophy. If you were a private student of mine, you'd be hearing that term over and over again. In the often-baffling world of music, having a simple core philosophy can help you to keep your eyes on the prize and avoid distractions. A core philosophy is a guiding light amid a confusing matrix of sound, attitudes, and advice.

A simple example of a core philosophy would be to imagine you are playing an old-school R&B/funk gig, performing classic tunes like "Brick House" and "September." Your core philosophy for that gig would be along the lines of "Simple. Solid. Deep pocket." No matter what else happens, if you stick to those simple ideas on your gig, you increase your chances of success exponentially. In a moment we'll take that idea and apply it to a conducted situation. But first, here's a simple truth: If you don't know the rules of the game, you can't play. Let's make a broad list of do's and don'ts that will cover the basics of what you'll need to know and what to avoid if faced with a conductor.

Do's

Set your drums up logically, so that you can see the conductor and your music with only the slightest head movement.

Keep your eyes on the conductor. Not some of the time, but all of the time.

Concentrate, especially during rests. Don't be ashamed to count through them to maintain your place in the flow of the music. Professionals always count.

Be sensitive to the ensemble.

Quickly learn your conductor's motions. Conductors all have their own "look" and stroke, especially when they want things faster or slower. So be observant.

Be stylistically appropriate within your situation. For example, you generally can't hit the drums as hard in an orchestra as you can in a band.

Be aware that the conductor may change his mind about dynamics, tempo, or anything at all.

Take nothing for granted, be ready.
Working With Conductors

for anything.
Have all the necessary musical implements within easy and quiet reach.
Learn quickly. While we all make mistakes, do not make the same one twice.
Play with confidence. Never play afraid.
Check your ego at the door.

Don'ts
Don't keep your face buried in your music.
Don't try to teach the conductor the "correct" tempo.

Don't be obnoxious and loud. Gauge your surroundings!
Don't be afraid. Conductors smell fear like a hungry wild bear.
Don't make your time immovable. Conductors need our help, so don't be a burden.
Don't start rewriting your parts without an invitation from the conductor.
Don't offer unsolicited advice. Don't make stupid mistakes. Conductors will hate you. Really.

Talk About It...Or Not
By synthesizing the key points of these little lists, we can quickly assemble a nice, simple core philosophy: “Watch closely. Be responsive. Learn quickly.” Those three little gems are the core philosophy I’ve used for every conducted situation I’ve ever been in. No matter what trouble you might find yourself in with a conductor, those concepts will help to keep you calm and focused on the task at hand.

Let’s add one more tidbit to our core philosophy: Ask questions. It sounds like such a simple thing, but it’s amazing how we don’t do it. It’s like asking for directions at a gas station. We’d rather drive around lost for an hour than suffer the embarrassment of admitting (gasp!) that we actually need some help. I’ve found that conductors are extremely receptive and helpful when asked specific questions about how to best approach a section of music. Good conductors know what they want, and good drummers want to give it to them. As a result, you’ll find good conductors and drummers discussing the finer points of a piece all the time.

Amazingly, I’ve also found that the best conductors aren’t afraid to admit when they don’t know something. If the conductor isn’t sure about what he wants the drums to do, he may ask you to create something appropriate. You know you’re starting to cultivate a good relationship with a conductor when he trusts you to make stuff up that works better than what’s already written.

That said, for goodness’ sake, don’t start lecturing the conductor on the necessities of “adhering to a 2:3 clave pattern with the cascara while the bass drum plays the tumbao only on the 2 side of the bar while mildly superimposing a guaguancó with your free limb...” Nobody cares—especially the conductor. For all you know, at that moment he might be obsessed with figuring out why the flutes can’t play together. So don’t talk about it, just do it. He’ll let you know if he doesn’t like it.

Soft Time
Okay. I must be crazy, but I’m now going to give up my personal super-secret formula to guarantee that your conductor will fall in love with you:

As drummers, we’re bred on a steady diet of "being solid,” “having rock-hard time,” “hard-driving swing,” “Grrrr...bring
“I was waiting for the bus one day with another ballplayer named Alberto Ruiz. He said his band was losing its conga player and he asks me to keep my eyes open for a replacement. And I said, ‘I am the replacement’.”

Master Conguero
Armando Peraza

Passion for playing music doesn’t just come from a book or a CD, it comes from all around us and from within. Some even say you’re born with it. At Latin Percussion we believe that. Why? Because we create every instrument from the same place you create music, the soul. I guess you can say we were born with it too.

Armando Peraza is a legendary master conguero. His unmatched style and rich history are inspirational. Most of today’s top percussionists cite Armando as one of their biggest influences. In January 2003, LP unveiled the LP Accents Armando Peraza Signature Series Congas and Bongos as a tribute to this percussion icon. His eighteen years with Santana, as well as his groundbreaking work with Charlie “Bird” Parker, George Shearing and Cal Tjader make Armando the perfect namesake for this top-of-the-line series.
Working With Conductors

me more rocks to eat!” You get the picture. Indeed, no drummer aspires to hear after a gig, “Man, your time was soft. You really moved it all over the place.” That would be a bummer, and it’s not the kind of softness I mean. There is a way to move tempos to fit a conductor’s wishes, while still maintaining solidity. So let’s clear something up right away: soft time in no way means weak time.

Remember that this a conceptual issue, not a musical one. If you approach time in a conducted setting as being “hard,” then you’ll simply be an immovable object. If a conductor wanted that, he’d hire a drum machine. Instead, if you are called on to play a groove while being conducted, keep your time soft while you keep the groove deep. There are several ways to do this. I’ll offer the three that are the easiest to grasp and implement.

The first way is to make a definitive decision to move the time where you think the conductor wants it. Don’t be wishy-washy about it. If you think he wants it faster (or slower), then do it. Watch him closely for signs of satisfaction or frustration. Usually, only small incremental moves are needed; don’t overshoot your (his!) goal tempo. This concept of definitive movement is essential to maintaining overall solidity in any ensemble. A bass player can stay with you easier if you make a clear tempo move, rather than if you go fishing for the right tempo over several bars. Half-hearted tempo adjustments are groove killers.

The second way is more technical. When you decide to move the time, move it on the entire drumset, not just on one or two limbs. I know it sounds crazy, but I’ve seen this bizarre phenomenon happen often. The conductor is showing a downbeat earlier than you’re playing it, so you decide to play faster. But you only move the downbeat (usually on the bass drum). The rest of the kit lags behind, creating a groove-less vortex of rhythmic chaos. Avoid this at all costs, because if you get the one limb correct (and the others not), you’ll sound horrible. If you’re playing a groove, move the whole groove, with all the parts together, to the new tempo.

The third way is the most important. Think fluidly about your time. Stay out of tempo ruts. Remember that you aren’t playing in a “band” now. The big picture must be kept in mind. Don’t become attached to what you think is the right tempo, because you then become resistant to the changes that conductors invariably want to make. Conductors reserve the right to change their minds, whether you like it or not. So I avoid thinking about “right and wrong” whenever possible. I think about trying to make the grooves as deep and comfortable as I can within the parameters of the conductor’s stroke. Sometimes that’s really hard to do, especially with “rhythmically challenged” conductors. But honestly, I’ve found that staying mentally fluid helps in even the most aggravating situations.

How Do You Learn It?

I get a lot of questions—especially from college graduates who are suddenly thrust into the shrinking abyss of the music business—about how I became successful with conductors. I honestly don’t have a clear-cut answer. It always came very naturally to me. However, I did a few things early on that helped me fit into various ensemble environments, and these I can share.
Invoking great musicians everywhere.

Working With Conductors

The first thing I did was participate in the band program at school. I’m very hardcore about this for students serious about a career in music. As a matter of fact, I won’t accept any high school–age private students unless they’re in their school band—period.

Band is probably the first taste any young musician gets of functioning in a large ensemble and following a conductor. It’s priceless training that serves every other aspect of your musical existence. If your local band director is great, then good for you. Think of how much you’ll learn. But if your band director stinks, that’s even better. You’ll be ahead of the game if and when you’re confronted with a bad conductor in a professional situation.

Just remember, no matter how bad you think your band director is, I guarantee he knows more than you do. The point is: Take every chance you can to learn music from every possible source. Check your ego at the door and jump in.

Did you miss out on your high-school opportunity? There are many community orchestras that would love some help in the percussion section. Getting out there and falling on your face a few times in that setting is a great idea.

Most community orchestras are made up of local semi-pros who have, for one reason or another, left the full-time music scene. There is often a lot of great talent in these ensembles. And I’ve found them to be extremely friendly and welcoming to new musicians learning the ropes. You might play triangle on one piece and bass drum on another. Each instrument presents its own musical challenge, thereby providing a perfect training ground for your later experiences in a conducted setting. The most important thing is that you’ll be watching and interpreting a conductor’s motion.

One other thing I did that really helped was to study classical piano. While nobody is going to mistake me for a concert pianist, just learning some basic piano literature with a good teacher is time well spent for any musician. I learned so much more than just the harmonic and melodic principles involved. I learned how differently other musicians approach rhythm and time. When you start to understand how other musicians relate to music, you can speak to them in their own language, instead of seeing everything from a drum-centric viewpoint.

Ah, if only our intrepid hero from last month’s article had read this month’s before he experienced his conductor-inflicted nightmare. Hopefully, I got to you in time. Keep a few of these ideas in mind when the situation arises, and you should be fine. Interpreting a conductor is one of those skills that some drummers assimilate immediately, while others have a harder time. There is only one way to find out how you’ll do, and that’s to jump in.

Of course, you may think that you’re never going to work with a conductor. And you may be right. But then again (cue Darth Vader breathing...), you may be wrong.

Tommy Igoe is the drummer and assistant conductor for Broadway’s Tony- and Grammy-award winning The Lion King. See www.TommyIgoe.com for more information.

Two of Dennis Chambers Favourite Drummers On DVD!

Gary Husband  
Keyboards & Drums

Mark Mondesir  
Drums

Michael Mondesir  
Bass

Named by Dennis, on his video, as one of his favourite drummers. Gary is also a world class keyboard player as this DVD demonstrates. His activities are too vast to mention but include playing keys for Billy Cobham and Drums for Alan Holdsworth and Level 42. This plus his prolific accomplishments as a composer / arranger makes Gary one of the most remarkable & unique artists of our time.

Dennis said “Mark is probably one of the greatest drummers of our time”, to those in the know Mark is one of the most talked about drummers on the international scene. He’s played with John Mclaughlin, Jeff Beck, John Scofield, Joe Zawinul, with artists as diverse as Bryan Ferry to the BBC Big Band. On this DVD you’ll witness some of the most superhuman and musical drumming played with complete ease. For those that have ears to hear let them hear what all the fuss is about.

During this DVD

“Too The Power of Three”

Gary leaves his keyboards to perform a double drum solo with Mark that can only be described as poetry in motion.

Drums By CenterStaging
Service To The Stars

by Rick Long

Have you ever seen your favorite drummer performing live on television and wondered how his or her drums got to the gig? Have you checked the tour schedule and found that the drummer was on tour one day in the Midwest, in LA the next day for a television taping, and then back on the road the day after? Of course, professional drummers often do have multiple drumsets. But chances are good that the kit you saw on TV probably came from an LA-based company called CenterStaging.

CenterStaging provides musical instrument rentals—especially drumkits—to the television industry. They also provide rental kits for their impressive in-house rehearsal facilities. And while their list of clients is confidential, we can tell you that it includes the top echelon of the music business, along with all the major TV shows and studios.

Jan Parent and Johnny Caswell (former employees of S.I.R., another large sound company in LA) founded CenterStaging in 1984. The company has grown to service most of the television industry. Their facility has ten large rehearsal rooms, five rehearsal/production studios, and a massive television sound stage. A recording studio is under construction. An equally large East Coast facility is located in Philadelphia.

The company is involved in backline amplification and television production sound. But if the amount of gear in their new 9,000-square-foot drum department indicates anything, drumsets are their forte. They have racks and racks of drum and percussion equipment from almost every manufacturer, large and small. This is primarily due to the fact that by servicing CenterStaging, manufacturers can get their equipment in front of millions of viewers without having to pay exorbitant advertising fees.
Getting The Gear Out There

Here’s how it works: A drum company will typically send CenterStaging at least one set of drums. But this is not your basic four-piece rig. It includes every available size of bass drum, tom, and snare, all in a single color. In this way, no matter what size kit is requested by the artist, CenterStaging can provide that setup. Hardware and cymbals are done the same way. When a contract comes in, the gear is pulled from the racks, heads are replaced if they appear worn at all, and everything goes into a road case for quick delivery.

“Quick” is often the name of the game. While MD was visiting the company for this story, a call came in for a full percussion setup for a Jennifer Lopez video shoot in Brazil. Time of the call: 11:00 A.M. Time they needed to pick it up: 2:00 P.M. Needless to say, part of the interview was conducted while John Lord, who was then director of the percussion department, was running around pulling percussion gear.

Nissim Aharon, who recently took over John’s role as drum department director, can often be found replacing heads and tuning the drums. (John still works with the drum department part-time, but has been promoted to show department manager.) To say that Nissim is fast—and good—is an understatement. As an example, he replaced and perfectly tuned the heads on a five-piece kit while carrying on a conversation with three other people for this interview.

Nick Stewart, Jake Volez, and Brent Barnett round out the crew. They can be found most days packing up drums and heading for any one of the many studios in the LA/Burbank area.

A call came in for a full percussion setup for a Jennifer Lopez video shoot in Brazil. Time of the call: 11:00 A.M. Time they needed to pick it up: 2:00 P.M.
**Shop Talk**

**Special Needs**
This crew *knows* drum equipment, including nuances that might not occur to the rest of us. For example, they like today’s synthetic conga heads a lot, because those heads hold their tuning in varying temperatures better than natural skin heads do. This is very important in TV studios. For example, the set for *The Tonight Show* is kept at 60° during the 11:00 A.M. soundcheck. This is done because when they turn up the lights to tape the show at 5:00 P.M., the temperature climbs quickly and dramatically. Natural-skin conga heads that were tuned during soundcheck would go out of tune before the band could complete their portion of the live taping.

**The Best Of Times And The Worst Of Times**
When we asked the CenterStaging drum crew to tell us about their favorite gig, John Lord said it was getting the contract for the Grammies. They had been vying for that gig for some time, and eventually they were given the Latin Grammy Show—with the understanding that if they did well, they would be given the major Grammy show. The team pulled together to demonstrate what they could do, and their first Latin Grammy effort went off without a hitch. So did their first two years with the major Grammy Show.

When asked about a worst gig, John chimed in, “Have you ever heard of Marilyn Manson?” It seems that Ginger Fish needed a drumset for a video shoot. The kit had been ordered as usual. But then the manager for the band called to follow up. He asked John, “Did they tell you that you probably aren’t going to get the kit back?” “No,” John replied, “Why?” The manager explained, “Did they tell you the video involves fire?”

Sure enough, at the video shoot the drums were coated with a type of grease that protects stunt persons who are set on fire. This allowed the kit to burn for a while without being consumed, so that Ginger could play it while it was on fire. When CenterStaging picked up the kit, it was literally “toasted.” So they set it in the back of the warehouse. As luck would have it, Marilyn Manson’s manager called again and asked if the kit could be put in playable shape for an awards show. The video turned out to be so popular that they wanted to use the same burned-up drumset again. According to John, “It wasn’t easy to get the kit to sound right after the fire, but eventually we were able to get it back in shape. They’ve called for that kit several times now.”

**Support Group**
John Lord and Nissim Aharon were both quick to express their thanks to all the drum, cymbal, hardware, and percussion manufacturers for the support they’ve given to CenterStaging over the years. Their job would certainly be more difficult without it. Because of that support, the drum industry is represented in fine fashion, night after night, on your television screen.
Just Play.

Kaman Music Corporation  Bloomfield, CT
Most Buddy Rich fans know that for the last three years of his life, the great drummer played a set of vintage Slingerland Radio King drums. Buddy had long since left Slingerland as an endorser; he simply loved the historic sound of that particular kit. For several years after Buddy’s death, the kit was held in storage at the Smithsonian Institution in Washington, DC. I'm happy to report that it is now on display for everyone to enjoy.

This article, however, focuses on what we think is Buddy's last factory-issue Slingerland set, made for him in 1977. It was discovered by Charlie Donnelly (arguably the dean of American drum store owners) and verified by Charles Braun of the Buddy Rich fan club. I owe each of them my thanks.

The story begins with a dream of mine: to find and display items used by Gene Krupa and Buddy Rich. In 1990, I got the chance to realize part of that dream by buying our subject set. Charlie Donnelly called me and said that the then owner wanted to sell the set and its cases. What I wanted, of course, was verification that the kit had, in fact, been Buddy’s. After all, Slingerland made lots of Model 80N drum-sets. Most had 22” bass drums, but some really were copies of the 24” bass drum, 13” rack toms, and twin 16” floor toms configuration that Buddy used. Fortunately, we were able to get conclusive proof.

Buddy first became a Slingerland endorser around 1938, after having used Ludwig & Ludwig products during his Vaudeville years. In 1947, he switched to WFL, whom he stayed with through the reunification of the Ludwig Drum Company. Between 1960 and 1968, Buddy was an endorser for Rogers and, briefly, for Vox, the British offshoot of Trixon. But in late 1968 Slingerland proudly announced Buddy’s return. He stayed with that company for almost ten years.

Our featured set has a 14x24 bass drum with double spurs, a 9x13 rack tom, two 16x16 floor toms, and a matching canister throne. All the hardware is Slingerland’s best of the era. The only non-Slingerland items are a Swiv-O-Matic pedal and a splash cymbal arm by Rogers. We know that Buddy favored certain Rogers parts up until his death.

The kit did not include a matching snare drum. Slingerland ads featuring Buddy included an Artist Model snare, until they developed the Buddy Rich TDR model. I chose an Artist Model drum to round out the set. The accompanying fiber cases have white stenciled lettering reading “Buddy Rich—Slingerland Drum Company,” along with stickers from cities around the world.

By 1978 Buddy had left Slingerland and returned to Ludwig, where he remained until late in his career. After that, the vintage Radio Kings became his drums of choice.

I remember well the day that I received the 1977 set and sat down to play it. I didn't seem to be playing any better. Obviously, the musical magic had come from their former owner.

Their current owner is just happy to have them.
You may have spotted the advertisement in this issue for a unique CD titled *Drum Nation*. It represents the music of drummers, created outside of the constraints of record labels. How *Drum Nation* came about is an eye-opener. In fact, a non-drummer conceived of the project!

Drummers like us take it for granted, but for Magna Carta Records’ Pete Morticelli, it was a revelation: Over the years, recording band after band, drummer after drummer, Pete came to the realization that drummers are absolutely a special lot. In Pete’s eyes they were so special, so unique in their common values, that they formed a distinct community—a “drum nation.”
Birth Of A Nation

Mortellli offers the following as evidence: “If a drummer is sick, other drummers rally to the cause. If a drummer has a problem with playing a lick, another drummer will share the correct way.

“Ask a guitar player about another guitar player,” Pete continues, “and you get this pause. Ask a drummer about another drummer, and he’ll respond, ‘Oh, that guy’s great.’ I thought that it was time to bring some of these great players together in one place and document it.”

Pete approached Modern Drummer magazine for a collaboration, and the result is a CD of drummer-led tracks. Drum Nation features a selection of talented drummers working unfettered. They obviously enjoyed the freedom to compose, write, and arrange material that might not work in other forums. They relished the free license to experiment with song form, drum sounds, and solos—and, ultimately, to have a little fun.

This album is no mere compilation. Although the alert reader may spot a track or two on Drum Nation that has been released elsewhere, it won’t be the same version. All compositions were recorded specifically for this project. Each provides a rare look at the creative processes of the participating drummers. Let’s use Terry Bozzio’s deeply personal work as a jumping off point for an examination of several compositions that appear on Drum Nation.

Terry Bozzio
“A Glimpse Into A Deeply Disturbed Mind”

That’s the title of Terry Bozzio’s composition. Although it seemed rather obvious from the enormous sound he generates, we asked him if he used his normal kit—possibly not the best word to describe Terry’s mammoth setup. He responded with an enthusiastic, “Oh yeah!” In other words, we’re hearing the full DW kit with some forty-eight toms, a vast array of cymbals, and many extras devised by Terry. On his self-produced track, we’re also hearing Terry play keyboards, sing, and do sequencing. It all went down at the Austin School Of Music Studio, with Chet Hines behind the console and with some editing assistance from Pat Mastelotto.

In Terry’s words, “The result was so intense and relentless that it seemed to reflect my own manic/depressive/obsessive/compulsive mental machinations. Hence the title!”

Flying in the face of current trends in techno music that see an imposition of “real” music over electronically programmed drums, Terry’s goal became, in his words, “To reverse the trend. I tried to use the electronic sampled music as an accompaniment to my real drumming.”

Here’s how Terry did it: First he put together the backing track, using samples he had tweaked on his laptop. Then it was into the studio, where he recorded real drums, taking six “runs” in order to ensure that all his desired parts went to Pro Tools. Next, he edited the drums into stereo loops, which were employed in various ways, as you’ll hear on the final mix. Then, says Terry, “I assembled the drums, voice, and backing track in Live (software sequencing), added the lead synth in Reason (software), then bounced it all back into Pro Tools for mixing in the studio.”

The result is a stunning barrage of sounds and drumming, united by thematic material. While reminiscent of his earlier work with Missing Persons and Zappa, the cut also pays heed to traditions in twentieth-century classical traditions and electronic.

For the recording Terry used DW drums, pedals, and hardware, Sabian Radia cymbals, Vic Firth TB Phase I sticks, Attack TB Signature drumheads, and Puresound beaters and snares. Microphones were courtesy of AKG, and their mounting was via the May system. Terry also uses XL Specialty Protector cases, LP percussion, and M-Audio products.

Bill Bruford
“Beelzebub”

The title suggests the heart of darkness. As Bill Bruford puts it, “‘Beelzebub’ is from the old Hebrew meaning Lord of the flies, prince of the evil spirits, and a form of the Devil. The tune was the first one I wrote for my first album, Feels Good To Me, in 1977, and is given a new and acoustic feel on life here. It’s particularly ‘knotty’ to play, and Tim Garland’s bass clarinet gives it exactly the right color—dark, brooding, and dense.”

The ’70s version, which also featured Allan Holdsworth and Jeff Berlin, had a decidedly electric vibe and stands up well today. The problem, however, is that Bruford has been going more emphatically acoustic in his approach. Continues Bill, “For this project, I felt there was value in demonstrating the different quality of power and dynamic headroom in an all-acoustic version. The rhythm is a bit weird: It’s a 9/8, subdivided 5 and 4. When it gets to the bridge, that’s extended into a 12/8, subdivided 5, 4, and 3.”

In keeping with the acoustic jazz spirit, Bruford worked quickly. "Earthworks is a one-take sort of band," he explains. "And we don’t worry too much about the sort of antisepic cleanliness associated with too much Pro Tooling. Four musicians played it in the same room at the same time—a novel idea, indeed!"

Bill ends with the admission that he’s thrilled to find a spot on the CD where, as he puts it, “I’m included alongside the efforts of other, infinitely more distinguished players than I, on this rich and diverse CD, dedicated to the art of the drummer.”

Here’s a rundown of Bruford’s gear: His drums were Tama Starclassic in a Royal walnut finish. Hardware was also Tama and included a custom Iron Cobra short-cable remote hi-hat. Cymbals were Paiste: a Dimensions
20" Dry ride, a 20" Sound Formula flat ride, a 16" Traditional crash, 13" Dimensions heavy hi-hats, and a 20" Traditional Swish China. Heads were an Evans G1 coated on snare, G1 clears on toms, and an EQ3 on the bass drum. And when you've got your own signature stick, you use it: the Pro-Mark SD4 Bill Bruford model. Microphones included a Shure SM57 on the snare, an AKG D112 on the kick, a Neumann KM84 on the hats, Shure SM57s on the toms, and a matched pair of Neumann U87s for the cymbals/overheads.

Steve Smith & Zakir Hussain
"Mad Tea Time"

By now you're thinking that this Drum Nation thing is all about calamitous mental events, what with all the talk of hell and madness. And Steve Smith's entry into the fray is no less frantic.

When asked by Pete Morticelli to climb aboard, Smith figured that here was an opportunity to record a duet with tabla master Zakir Hussain, with whom Steve had been touring in George Brooks' group, Summit. That was the band Steve used for the Drum Nation session.

"Mad Tea Time" is at once a complex and simple structure. Steve explains, "Rhythmically the tune is based on Indian drum compositions and various Indian rhythms. Melodically, 'Mad Tea Time' is based on the raga called Madhuvanti, which in India is often played at afternoon tea time. George and I collaborated on the writing. I brought in most of the rhythmic ideas, George [sax] composed the melody/harmony, and Fareed Haque [guitar] and Kai Eckhardt [bass] helped us flesh out the arrangement. Zakir helped it all come to life with his brilliant concept, sound, and virtuosic tabla chops."

The piece features complex unison drum parts called tihais, which are rhythmic phrases repeated (stay with us!) three times resolving to '1,' and reductions such as the opening "cow's tail," which starts with groups of seven repeated three times. As Steve points out, it's customary in Indian music to repeat rhythms three times in a spiralling descent: three sixes to three fives, three fours, three threes, three twos, and then ending with the tihais: 'takita dhaa, 'takita dhaa, 'takita dhaa.'

The recording modus operandi was traditional. "We recorded live," explains Steve, "with no overdubs, in a studio called Prairie Sun in Cotati, California, just north of San Francisco. The drums and the band were set up in the main room, with only Zakir in a booth. We wanted to have him isolated so that the engineer could get a great tabla sound. Zakir likes to use Shure 57s on his drums. We also used Shure mic's on the drumset, with Beta 98s clipped onto the toms, a Beta 52 on the batter side of the bass drum, an SM57 on the snare, and Shure condenser overheads. We recorded to 2" analog tape and then transferred the music to Pro Tools for mixing. We mixed the tabla toward the left side of the stereo spectrum and the drumset more on the

Drum Nation

right side, so you can clearly hear what each of us is playing.”

Steve used his Sonor Jungle Kit, a small drumset that includes a 16” bass drum, a 10” rack tom, and a 13” floor tom, to which he added a 16” floor tom. Instead of the usual Jungle snare, Steve played a 12” Sonor Designer drum with a Remo Fiberskyn head. The toms were fitted with Remo clear Ambassadors, while the bass drum got a Remo clear Emperor, muffled with a simple felt strip. The cymbals were all Zildjian: Re-Mix 12” hi-hats, a Re-Mix 17” ride, an 18” K Flat Top ride, an 8” K splash, a 9” China splash, and a 22” A Swish.

Steve added the following “scoop”: “I use ‘bundled rods’ with this setup, as opposed to sticks, because the sound blends well with the tabla without being overpowering. I’ve also been experimenting with the technique of pitch bending on my drums, simulating the pitch bending of the baya—the left tabla drum. In this piece I used the left beater of my double pedal to alter the pitch of my bass drum in a couple of places.”

Stanton Moore
“Sprung Monkey”

Stanton clearly had fun with this one, for several reasons. First, he had an opportunity to record a track that didn’t make it onto Ruckus, the new album by his band Galactic. And he got to lay down the track in new digs in the company of his band. Finally, he felt free to make a few significant changes to his usual Gretsch bebop kit, the sort that get drummers’ mouths watering.

Galactic’s new studio, sometimes referred to as The G Spot, felt in many ways like home to Stanton. For one thing, it happens to be the same office building in which his father worked for twenty-nine years.

Expects Stanton, “The studio is a section within this building. It’s a nice size, probably 1,200 square feet. Because it’s an old office, the rooms were separated by glass dividers, so we had our control room already isolated. We recorded in the same room, but we put the amps in different adjoining rooms so that the drums were in the main room with everybody around me.”

And then entered The Lil Rascals Brass Band, right into the same room with the rest of the musicians. Leakage? No problem. With sounds swimming, Stanton nails the mid-tempo funky march, punctuating with infectious kick accents and ringing snare.

About that gear change: Instead of using his Gretsch jazz kit with a tiny 18” bass drum, Stanton thought he’d experiment a little. About a year ago, he got his hands on another Gretsch set in his preferred champagne sparkle finish, but in bigger sizes for a little extra “muscle.” The kit includes a 22” bass drum, a 13” rack tom, and a 16” floor tom.

“The 13” and 16” sound really good with the big 26” bass drum I have set up on the right side of my kit,” Stanton enthuses. “And the bass drum sound is by far the most thumping, hit-you-in-the-chest sound...
"The energy of AA is really explosive! I like the Metal-X models because whether I drop way down in volume or I’m blowing the walls out, they’ve got the power and the sound to always sound great."

- ROCKY GRAY - Evanescence
Drum Nation

you've ever heard. As for the snare drum, I experimented with several, including a Remo Mondo. But the one you hear on the track is a Slingerland solid-shell Radio King reissue.

The drum tuning was very sensible; nothing was extreme. "I tuned them according to the size and 'sweet spot,'" Stanton says. "I didn't try to tune them too high; I tuned them like my usual 12" and 14", but according to the larger size. You could get a clear rimshot on any of the toms."

Miking was fairly standard, although extra attention was required for Stanton's gigantic 26" bass drum, which had no hole in the front head. The engineer miked it from a couple of feet away, pointing the mic' at the top rim of the drum. The advantage (or disadvantage, depending on your engineer) of miking a little to the top of the kick is that you also pick up some of the rest of the kit as well, much in the style of old jazz albums.

Simon Phillips
"Manganese"

This is one fiery track from the get-go. One of the first things we hear is the wall-shaking ambience of Simon's dual bass drums. "Manganese" is rife with complex phrases, over which Simon overlays an attractive melody that sticks in your head. The composition incorporates tasteful solos weaving in and out of a band ensemble figure. At the 3:32 mark, Simon does a brilliantly understated bit: He pulls off a fluttering press roll that offers the perfect dynamic foil to the thunderous fills coming just around the corner.

Says Simon, "The song took me about a day to compose and was actually the first solo piece I had written in a while. I was very lucky that Jeff Babko [keys], Jimmy Johnson [bass], and Andy Timmons [guitar] were available to do the recording. After getting sounds, throwing on the 'phones, and learning the chart, we cut the track in just a few hours. It's nice that way—live and full of energy. After a couple of guitar overdubs, that was it: It was ready to mix, and that took all of one day. This was so much fun to write, record, and mix, without the enormity of recording a full-length CD. It was a hardening back to how records were made in my earlier years, yet with all the advantages of modern techniques."

For the track, Simon used his full Tama double bass drumset with minimal muffling, as well as Zildjian cymbals.

Teasers

We've zeroed in on a few Drum Nation tracks, but there are many more. Here's a taste of some of the other featured artists and their tracks.

Marco Minnemann's "Wandering Portland, Maine" is a delightfully melodic composition with the usual deceptively complex Minnemann drum tracks, recorded to perfection. Says Marco, "I recorded the track first in a Portland hotel room, then overdubbed my drums in Germany using the same room I used to record my..."
war wounds.

Only these won't wake you up during the night in a cold sweat.

The musicians at Interstate Music are ready to help you with the best shopping experience for drums and percussion, tons of accessories and hardware, DVDs, books, PA equipment, recording gear and more. All with a lowest price guarantee!

Whether you like to shop for your drum equipment in a product packed full-color catalog, online 24/7 from your comfy office chair, or drop by in person and hit the goods yourself with a hands-on demo, Interstate Music has you in mind.

And no matter HOW you like to shop, Interstate Music's contact center and retail stores are full of REAL MUSICIANS, waiting to help you decide what best fits your drumming lifestyle!

Drum Nation

solo disc, Green Mind Bomb. The room is large with a stone wall. The drumset was my regular DW jazz/solo kit, with Meinl cymbals and Evans MX2 drumheads."

**Chad Wackerman**'s "The Spell" has a slow 5/4 feel. "The tune has a quirky melody played on vibraphone and a **koto** [Japanese harp] sample." Chad says. "The melody shifts between 16th- and triplet-based subdivisions. There's a dramatic shift in mood in the bridge that features the guitar work of James Muller."

**Josh Freese**'s "Lagerborg" is an in-your-face track that the drummer typifies as "prog-rock/new wave meets *Queens Of The Stone Age.*" Whatever the influences, you'll freak at Josh's command of meter, phrasing, complex fills, and sound.

**Rod Morgenstein**'s "Faceless Pastiche" displays Rod's new Premier Series drumset, which includes two 22" bass drums. The composition, Rod says, defies categorization and, fittingly, the title is a dig at a journalist's take on Rod's band, The Dixie Dregs. "The funny thing is," Rod notes, "the concept of the Dregs is to fuse many styles of music together in the hope of creating something new, original, exciting—and ultimately un-categorizable!"

On "Shut Up And Play Yer Drums," current and former Primus drummers **Tim Alexander** and **Brain** make for a happy union. It's an exciting performance, the two stirring up some serious drum timbres and rhythms.

**Stephen Perkins** and **Brooks Wackerman**'s "Pull Up My Sleeve" is a drumset duet divided into three movements with increasing melodic content, defined rhythmically by free-form, 6/8, and shuffle sections.

**Nation Building**

And there you have it, a record of the explorations of name drummers, each of whom exhibits a different touch, attitude, style, and approach to composition. After checking it out, most people will probably agree with Magna Carta's Pete Morticelli that drummers are a special lot—especially these drummers. Happy listening!
"This thing sounds killer right out of the box!"

— Brain
IRON COBRA
Most Valuable Product
of the Year! 2003

Modern Drummer Readers Poll
Players as different as Victor Indrizzo, Ryan Vikedal and Jon Wysocki consider Iron Cobra a valuable asset to their gig. The readers of Modern Drummer Magazine consider the Iron Cobra pedal the “Most Valuable Drum Product of the Year.”

Are you missing out on something that might make a big difference in what you play, how well you play and how much you enjoy playing? How valuable would that be? Check out the “Most Valuable Drum Product of The Year.” Iron Cobra. At your authorized Tama Dealer.

Jon Wysocki
Staind

“I like everything about Iron Cobra. It’s smooth and quick and gives me a lot of different setting options. So while a lot of people like their beater closer to the head, I like to set mine further back and I can do that. It’s also obviously very durable. Even though I have two of them on the road, we’ve never had to switch them out.”

For the new Tama Drum & Hardware catalog, send $3.00 to Tama Dept. 3007, P.O. Box 800, Bensalem, PA 19020, or P.O. Box 2034, Idaho Falls, ID 83403.
Ryan Vikedal
Nickelback

"The first time I played the Iron Cobra, it just opened up the door to double pedal playing. It's the most equal-sided double pedal. There's no stiffness in the left pedal like most other double pedals. Going over from the left bass pedal to the hi-hat is just so smooth."

Victor Indrizzo
Beck and Macy Gray Sessions

"With sessions and touring all over the world, I have to be on the money every time I sit behind the kit. The Iron Cobra is hands down the most reliable, truest responding pedal ever made. You can take everything else away. Just don't take my Iron Cobra!"
Doesn’t Sound All That Peaceful
Peace DNA And Demolition Max Series Drums

DNA Series drums from Peace feature all-maple, 7-micro-ply shells and are available in nine Atomic Sparkle lacquer finishes. Peace’s Dynamic Neuro-Audiology process is said to draw more pure tone from drumshells, offering professional sound at an affordable price.

Peace’s original Demolition Series student-level drum packages proved so successful that the company has decided to take things up a notch by making the drums bigger and the set-up more current, while keeping the price low. Demolition MAX is said to be the first complete drum package with a 24" bass drum for its price (around $899). The set will include a 10x12 mounted tom, 14x14 and 14x16 floor toms, a 16x24 kick drum, and a matching 5½x14 snare drum. It will come with Arena 600 double-braced hardware, and will feature RavenPlate Black mini-lugs, hoops, hooks, and rods. It will be available in Black, Taxi Yellow, Mirror Chrome, and Wine Red wrapped finishes.

Peace DNA kit in Nightshade Atomic Sparkle finish

Carry On
Sabian Cymbal Tote And Stick/Mallet Bags

Sabian’s new Cymbal Tote is equipped with rollerblade wheels for easy transport. The heavily padded tote is made from durable nylon with reinforced stitching. It has four fixed internal sleeve dividers, an outside zippered pocket for hi-hat or splash cymbals, a zippered stick and accessory pocket, and a pull-out handle enclosed in a zippered compartment. The Cymbal Tote retails for $125.

Sabian also offers three new stick/mallet bags. The Economy Bag ($14.95) is a lightweight nylon bag with internal pockets, one outside pocket, and a nylon suspension cord. The Standard Model Stick Bag ($34.95) is padded and includes two outside zippered pockets, four internal sleeves for sticks and mallets, and two flap pockets. Suspension cords with “S” hooks are included, as well as a removable shoulder strap. The Premium Stick & Mallet Bag ($49.95) is a large, reinforced nylon bag with three full-size zippered outside pockets, multiple internal mallet and stick sleeves, a mesh zippered parts compartment, and retractable suspension.

Electronic Evolution
Yamaha DTXTREME IIS, DTXPRESS III, And DTXPRESS III Special Edition Electronic Kits

Yamaha’s new DTXTREME IIS electronic drum system features a six-piece configuration with three cymbal pads. Upgrades include a new rack, sampling capabilities, and a selection of physically modeled voices from the Yamaha Motif product line. New, soft, three-zone rubber pads are said to offer performance comfort as well as natural feel and rebound. Each pad includes individual controls for pitch and pad selection; snare pads also feature adjustable dampening control. The hi-hat controller combines an acoustic-type stand with electronic pads for a traditional look and feel.

Onboard electronics include 1,757 realistic drum voices, 128 GM voices, up to 90 preset drumkits, 40 user kits, 164 preset songs, up to 32 user-created songs, the Groove Check practice feature, and an easy-view backlit display. Voices, kits, and songs may be stored and retrieved via a SmartMedia storage card. The DTXTREME IIS will connect directly to a PC or Mac computer via an external MIDI interface or the integrated TO HOST connection for editing or downloading Web content. List price is $2,999.

For those seeking affordability in an electronic kit, Yamaha’s updated DTXPRESS III ($1,295) features a selection of new audio waveforms said to reproduce ultra-realistic sounds, with a strong concentration on acoustic cymbal sounds. Physical improvements include upgraded soft rubber pads and gray metallic support racks that will hide chips and scratches. The kit ships in a single box with the rack fully assembled and all cables coded on both ends for quick and easy set-up.

The DTXPRESS III features more than 1,000 sounds, 128 GM voices, 80 drumkits, 127 songs, an integrated two-track sequencer, a three-zone snare pad, the Groove Check practice feature, and easy-view backlit display. The DTXPRESS III also allows players to practice in complete privacy using headphones, and will connect directly to a PC or Mac computer.

The DTXPRESS III Special Edition ($1,899) contains all the features of the DTXPRESS III, and adds an ergonomic curved rack, three round multi-zone cymbal pads, and a hi-hat controller with an acoustic-type stand and an electronic pad. The kit is also the first of its kind to ship with a bass drum pedal and drum throne.

Chiming In
Spectrasound Percussion Now Produced By Grover

Grover Pro Percussion will now be producing Spectrasound Percussion products. Spectrasound has long been known for a chime instrument invented by LA studio percussionist Mark Stevens. Dubbed The Mark Tree by studio legend Emil Richards, the instrument quickly became a percussion staple in the LA studios. The shimmering glissando of the Mark Tree is now pervasive on recordings as well as on television and movie soundtracks. It has also found success in orchestral concert halls, school band rooms, and marching bands, and as a drum kit accessory.

Grover Pro will immediately commence production of the popular SM-1 Recording Brass, SM-7 Recording Natural, and SM-3CS Center Sound models. While the special bar alloys used by Spectrasound for decades will remain unchanged, Grover Pro has made major improvements to the machining and finish of the header bar. Poplar wood has been chosen for its beauty in grain and finish capacity. In addition, each Spectrasound Mark Tree is now dynamically balanced for smoother glissandi and evenness of response. The damper bar attachment system now features a captive barrel lug and two large chromed tension adjustment knobs.

Going With The Grain
Brady Blackheart Drums

According to Brady Drums, their new Blackheart finish gives a new meaning to the words “limited edition.” This highly unusual patterned timber is sourced locally in Western Australia, making it a Brady exclusive. It will be available for the company's complete range of ply drumkits and snare drums.

Due to the great variation of the grain structure of Blackheart, it cannot be duplicated or matched to the same finish. Brady is hand-selecting small amounts of visually stunning veneers, ensuring that no two pieces of veneer are the same. Once a particular timber grain is used for a handful of snare drums or a drumkit, it will never be available again. The Blackheart finish is available in satin and high-gloss finish, at Brady's normal ply drum prices.

Fastest Percussion In The West
Pearl Universal Guiro Holder And Cowbell Stacker

How many times have you been challenged to a guiro showdown, only to be beaten on the draw? Well, that'll happen no more with Pearl's Universal Guiro holder. It mounts securely to the lug of your conga, allowing quick and easy access to virtually any make or model of guiro. It's designed to complement Pearl's PTM10SH tambourine with QuikMount. List price is $45.

Meanwhile, Pearl's new PCS-10 Cowbell Stacker (shown here with Bala cowbell and Clave Block) allows the working percussionist to snuggle up all the cowbells and blocks that he or she can shake a stick at. The PCS-10 conveniently mounts on top of Pearl's PPS-37 cowbell mount. From there the sky's the limit. List price is $22.

Throwing Their Weight Around
Wuhan Expanded Crash Models

Wuhan has expanded their Traditional and Shining S cymbal lines to include three new crash models. Now 16" crash cymbals in each line will be available in thin, medium-thin, and medium weights, in order to offer drummers greater variety in cymbal response, tonality, and projection. Traditional models offer the unique characteristics of hand-hammered cymbals, including a warm, musical tonality, and a breathy wash of overtones that creates a comfortable cushion of sound. The Shining S series offers these characteristics with additional brightness and penetration.

Working with Tom Shelley of Universal Percussion (the cymbal maker's US distributor), Wuhan's craftsmen have also given the new 16" crashes shallower bows and re-shaped bells. The modifications are said to enhance the sound of the cymbals, which the manufacturer describes as "Western, with just a touch of China in them." The 16" crash size in each series was expanded first, owing to its versatility and popularity. Other sizes will be expanded along similar lines in the near future.

The Difference is in the Detail

From Rod Stewart to Dido, Robbie Williams to Tina Turner, Geoff Dugmore is one of the busiest and most versatile session drummers in the transatlantic music industry. Geoff has recorded scores of albums including 18 number ones, countless jingles, movie scores and commercials, and has toured non-stop round the world. www.geoffdugmore.com
More Than Just Wires
Puresound Ultrasonic Snare Drum And 30-Strand Snares

Puresound Percussion has introduced its first accessory drum: the UltraSonic Limited Edition 5x14 copper snare. The drum features the distinctive look and sound of a high-grade copper shell. It’s fitted with chrome-plated brass tube lugs, 2.3-mm triple-flanged steel counterhoops, Remo Ambassador heads, and Puresound’s new 30-strand Super snare wires. The vintage-style, rolled shells have a clear lacquer sealant over their polished copper exterior surface, and are equipped with machine-formed bearing edges and snare beds.

According to its makers, the UltraSonic snare drum produces “an extraordinarily bright, dry, powerful, and articulate sound,” with “a wide dynamic range and lightning-fast response.” Only two hundred drums will be made. At a list price of $995, the drums will include a soft, protective drum bag, a serialized badge, and a certificate of authenticity. Puresound’s newest snare wire set is their 30-strand Super snare for 14” snare drums. The widest set of wires ever offered by the company, the snare is designed to provide increased snare activity and articulation, without choking the drum or reducing sensitivity. Although an extended snare bed is essential to complement any set of extra-wide wires, the Super needs only a slightly wider than normal (3” to 3½”) snare bed for optimum performance. List price is $49.95.

Bronze Gumbo
Bosphorus New Orleans Series Cymbals

The New Orleans series of cymbals from Bosphorus was developed in demand for a cymbal reminiscent of the jazz and blues sounds of The Crescent City. The line is hand-hammered in the Bosphorus “Turk” method, then lathed on both sides in one continuous cut from the bell to the outer edge of the instrument. The result is sold to be a combination of “smoky lows, warm mid tones, and slightly ‘trashy’ highs.” The cymbal is designed to be versatile enough to be played quietly in subdued jazz or blues situations, or played aggressively to cut through even the loudest blues or rock mixes. The line will include 20”, 21”, and 22” ride cymbals, 15”, 16”, and 18” crashes, and 14” hi-hats. List prices range from $232 (15” crash) to $546 (22” ride).

No Assembly Line Here
Ford Drums

Ford Drums is a new custom brand created by partners Jimmy Ford and Jay Gaylen. In addition to being a drum craftsman, Ford is a big band drummer who played with Lionel Hampton for six years. Gaylen (also a drummer) is a marketing specialist who has developed campaigns for Gretsch and Legend drums and Toca percussion.

The company offers shells made to their specs in maple, birch, oak, cherry, and mahogany, in five, six, eight, ten, or more plies, with or without reinforcement hoops. Kits can come finished in eight coats of high-gloss or satin hand-buffed lacquer in any imaginable color, or covered in virtually any available wrap. Round-peaked bearing edges can be cut at 30° or 45°, and lugs are available in solid brass, solid aluminum, or die-cast zinc. The company also offers snare drums that feature Potyondi cast-metal shells.
More bang for the buck.

And bang is just the beginning.

Samson's new drum microphones are voiced specifically for the drum they are meant to mic. Snares sound crisp and full, toms tight and rich, kick drums clean and gigantic. They have rugged exteriors, rim clips and shock mounts for the abuse they are sure to take. Best of all, they sound better than mics priced hundreds of dollars more. You see, at Samson we figure that if your gonna spend that proverbial buck, you deserve more than just bang.

SAMSON AUDIO

For a good time and to find out more about Samson drum mics visit us at samsontech.com.
Don’t Forget That Combination
King Kong Latin And Cymbal Stage Lockers

The Latin Locker from King Kong Kases is designed to store and transport Latin percussion instruments. Individual conga and timbale compartments are padded and carpeted to protect each drum. A large horizontal area is reserved for odd-shaped instruments, bongos, or a small set of timbales. Small parts, tools, and hand-held percussion instruments are kept organized in a lockable drawer. A back storage area can hold large stands, rack components, or a gong up to 40” in diameter.

Each case is constructed using 1/4” laminated plywood and high-strength aluminum extrusions. The Latin Locker is 49” wide x 25” deep x 49” high (64” with casters). It comes with a removable padded front door, heavy-duty casters, ball corners, and recessed handles and latches, at a retail price of $1,750.

King Kong’s Cymbal Stage Locker includes three full-size storage slots for cymbals up to 24” in diameter, plus a padded free space for stands, stick bags, thrones, pedals, or a snare drum up to 9” in depth. The lid is foamed and may be removed and placed on top of the case as a play station. Each Cymbal Stage Locker is 25” wide x 25” deep x 25” high, and is constructed from 3/8” laminated plywood and aluminum extrusions, with recessed hardware and ball corners. Heavy-duty 4” casters are mounted on a 1/4” board for maneuverability in the band room, on the truck, or on the performance stage. Retail price is $795.

Johnny’s On His Own
Craviotto Custom Snare Drums

Noted drum builder Johnny Craviotto has launched his own drum company. Craviotto is known around the world for supplying handcrafted one-piece drumshells to drum manufacturers. With the development of The Craviotto Drum Company, he hopes to take more than just his business to the next level. Says Johnny, “The Craviotto Drum Company will give me a chance to create some pretty outrageous instruments for serious drummers, and perhaps to make a small contribution toward advancing the art of drumming.”

The new company offers four series of high-performance exotic solid-shell snare drums: 5 1/2 x 12, 5 1/2 x 13, and 5 1/2 x 14 bircheye maple with matching reinforcing hoops, 5 1/2 x 13 and 6 1/2 x 14 American ash with matching reinforcing hoops, 5 1/2 x 13 and 6 1/2 x 14 black cherry with matching reinforcing hoops, and 4 x 14 and 5 1/2 x 14 mahogany with maple reinforcing hoops.

Only 250 sequentially numbered drums of each collection will be produced. They’ll feature hand-selected, handcrafted shells and gleaming nickel-plated hardware, along with premium-quality components including Craviotto’s exclusive “Diamond” tube lugs, Remo Ambassador drumheads, and Puresound 21-strand snare wires. All drums also come with a heavy-duty, padded Craviotto drum bag. Suggested retail price is $1,495 for each drum, which includes a choice of standard 2.3-mm triple-flanged, die-cast, or vintage-style counterhoops, as well as natural oil or lacquer finish.

(831) 763-0855, info@craviottodrums.com.

...And They Play With The Box
Kotz ToneCajones

Kotz Handbuilt Drums & Percussion Cajones are adaptations of the Afro-Peruvian/Cuban cajone (wooden box drum). They're built from luthier-grade tonewoods and feature a sympathetic vibrating diaphragm design, similar to the soundboard of an acoustic guitar.

Custom builder Michael Kotzen has launched a limited production run of ToneCajones said to produce “remarkably deep and resonant bass tones balanced with crisp, clean highs.” Each instrument is hand-built from either jarrah (a reddish-brown hardwood native to Australia) or mahogany.

Meticulous craftsmanship and attention to detail ensure that the instruments are as appealing to the eye as to the ear. No screws or nails are used. ToneCajones from this edition of 100 pieces are available for $340 directly from the manufacturer.

Other Kotz cajone designs include the Double ToneCajon (which is mounted on legs and played like a set of congas), and a model with “Slap-Pads” attached to the exterior of the drum to create slap sounds without losing bass resonance.

Hundred of New Titles Now On Line!
And What's More

Lockr, from GAUGER PERCUSSION, are snap-on devices that can be attached to tension rods in seconds to prevent them from loosening. They can be easily removed for head changes (or left in place), and work with most standard rods and die-cast or stamped drum rims. Lockr are not designed for use with wood hoops. A package of four sells for $4.95.
(952) 933-8497, gaugerpersussion@att.net.

Five of HUDSON MUSIC's most popular VHS titles have been digitally remastered and released on DVD. They feature several enhancements to give them improved sound and picture while also making them easier to navigate. Titles include A Salute To Buddy Rich (with Phil Collins, Dennis Chambers, and Steve Smith, $29.95), Buddy Rich Live At The Montreal Jazz Festival (including an audio CD of the concert, $29.95), The Abercrombie, Erskine, Mintzer, Pettitucci Band (recorded live in New York City, $29.95), Horacio Hernandez Live At The 2001 Modern Drummer Festival ($24.95), and Rocco Prestia Live At Bass Day 2000 ($24.95).

New from WARNER BROS. is an expanded version of Rick's Licks, by noted Canadian author/performer/teacher Rick Gratton (in collaboration with fellow percussionist and Berklee instructor Ed Uribe). The book includes thirty-five additional pages of drumlicks that integrate grooves, fills, odd-time playing, and polyrhythmic concepts. Other topics include hand-foot combinations, accent placement, improvisational ideas, creative warm-ups, and a host of advanced rhythmic concepts. Detailed exercises help readers absorb the technical aspects of Gratton's licks, while an accompanying CD helps listeners gain a deeper feeling for the innovative patterns. The book/CD package lists for $29.95.

Also from Warner Bros. is a new DVD version of Russ Miller's award-winning The Drum Set Crash Course. In addition to covering all of the key points in Miller's book/CD, the 128-minute DVD offers bonus features, such as MP3 play-along tracks, printable PDF drum charts, a photo gallery, and a special performance of "Don't Bust My Chops" by the Grammy Award-winning Miller. Additional special DVD features include a photo gallery, product previews, and Internet connectivity. List price is $29.95.

Ever wanted your own "signature" stick, or perhaps a promotional item for your band—or maybe a gift for your drum instructor? VIC FIRTH's Players Label line might do nicely. The line consists of nine new hickory models made to the same strict standards as are all Vic Firth sticks, including pitch pairing and weight matching. The drummer's name may be printed on the stick in one of three fonts. Sticks must be ordered in minimum quantities of twelve pairs.

PLANET WAVES' Swivel XLR Microphone Cables feature XLR connectors that swivel from inline to a right angle, both ways, and can be used at any position in between. This simplifies the mounting of microphones in tight spaces—such as on a drumkit. Planet Waves' overmolded connectors provide extra strain-relief protection. The cables are available in 10' ($44.99) and 25' ($54.99) lengths.

PRO-MARK has assumed production and worldwide distribution of Webs. Webs feature a durable, layered, flexible-plastic "brush" material attached to hickory wood handles. They're said to produce a sound that's a cross between the company's Hot Rods and Nylo-Brushes. List price is $29.95 per pair.

CODA DRUMS (from The Music Link) now offers DS-200 Generation Beta five-piece student kits in Metallic Silver finish. The kits feature 12-lug mahogany-shell "power" toms, an 8-lug steel snare drum, and double-braced hardware. In addition to the Metallic Silver, they're available in Black, Dark Blue, and Metallic Wine Red finishes. List price is $499.
Ludwig Amber Vistalite Limited Edition "Bonham" 5-Piece Shell Set $2299.99

John Bonham's drumming was the driving force that propelled the legendary Led Zeppelin. The original Amber Vistalite kit was featured in Zep's documentary - The Song Remains The Same. The folks at Ludwigave faithfully recreated this history making kit and are making it available for a very limited time. Vintage appointments include: gold sparkle bass drum hoops; olive and blue badges; classic lugs, brackets, spurs and legs; gold sparkle inlays. Drum Sizes: 14"x20" Bass Drum; 10"x14" Tom; 16"x16" and 16"x18" Floor Tom; 6-1/2" x 14" chrome plated Supra-Phonic Snare Drum.

You Make the Call!

Vote for your favorites in

Modern Drummer's
26th Annual Readers Poll

The MD Readers Poll lets you voice your opinions about the drummers, percussionists, authors, and educators whose efforts have been particularly outstanding in the past year.

All it takes is a stroke of your pen (or a click of your mouse) to show support for your personal faves. So get out there and vote!

Instructions:

1. You may use the official MD ballot from the magazine, or a photocopy. You may also vote by email. (See below.)
2. All ballots must include your name, address, and signature.
3. Please print or type your selection in the corresponding box.
4. Make only one selection in each category. Leave blank any category for which you do not have a firm opinion.
5. Place the ballot in an envelope, affix appropriate postage, and mail to Modern Drummer's offices at 12 Old Bridge Road, Cedar Grove, NJ 07009.
6. Ballots must be postmarked no later than March 15, 2004. Results will be announced in the July 2004 issue of MD.
7. Prize Drawing: Providing your name, address, and signature automatically makes you eligible for MD's voter-appreciation drawing. Three ballots will be drawn at random; each winner will receive a free one-year subscription to Modern Drummer.

To Cast Your Vote Online:

2. Click on the ballot button located on the home page.
3. Fill in your selections in the appropriate fields on the ballot.
4. You must complete the fields for your name and mailing address. Anonymous email entries will be disqualified.
5. After you have entered your selections, press the "Submit" button.

(Note: Your browser must accept cookies in order for your vote to count.)

Category Descriptions

Hall Of Fame
Vote for the artist, living or dead, who you feel has made a historic contribution to the art of drumming. Current members of the Hall of Fame are not eligible for this category. They are: Gene Krupa, Buddy Rich, John Bonham, Keith Moon, Neil Peart, Steve Gadd, Louie Bellson, Tony Williams, Billy Cobham, Joe Morello, Carl Palmer, Bill Bruford, Art Blakey, Max Roach, Jeff Porcaro, Larrie London, Elvin Jones, Vinnie Colaiuta, Terry Bozzio, Ringo Starr, Roy Haynes, Dave Weckl, Dennis Chambers, Steve Smith, and Simon Phillips.

All-Around
Not intended to indicate the "overall best" drummer, but to recognize drummers noted for performing in a variety of musical styles and applications.

Studio
Drummers who record with many different artists and/or on jingles, TV, and film scores.

Mainstream Jazz
Drummers performing in small acoustic jazz groups, in styles such as bop, avant-garde, etc.

Contemporary Jazz
Drummers performing fusion, jazz-rock, new age, etc.

Big Band
Drummers performing regularly in traditional big bands, stage bands, etc.

---

**Up & Coming**
The most promising drummer brought to the public's attention within the past twelve months.

**Rock**
Drummers performing mainstream, modern, and "college" rock music.

**Metal**
Drummers performing in all metal styles, including speed, thrash, death, etc.

**Punk**
Drummers performing in punk or primarily punk-influenced styles.

**Hand Percussionist**
Hand and specialty percussionists (as opposed to drumset players). Includes TV and touring percussionists, and performers of Latin, Afro-Cuban, Brazilian, as well as other world percussion.

**Classical/Mallet Percussionist**
Includes mallet percussionists (of all styles), timpanists, and symphonic percussionists.

**Hip-Hop**
Drummers performing hip-hop, rap, dance, and other contemporary urban music styles.

**R&B**
Drummers performing funk, blues, and gospel styles.

**Clinician**
The drummer or percussionist you found most inspiring and educational in a live clinic presentation.

**Educational Book**
Your favorite educational drum book released within the past twelve months. Please name the book and author.

**Educational Video/DVD**
Your favorite educational video or DVD released within the past twelve months. Please name the video/DVD and artist.

**Recorded Performance**
Your favorite recording released within the past twelve months. Please name the artist, the drummer, the song, and the album.

MD LIBRARY
The Best In Educational Materials For Drummers!

Share Drum Duet

This new book by Modern Drummer Editor Ron Spagnardi offers a great selection of 23 challenging duets ranging in difficulty from simple to complex.

Practice both parts individually to improve your basic reading skills and facility with varied time signatures.

Ideal for high school and college-level percussionists.

An excellent source of supplemental reading material that's fun for students and teachers.

Can't find a playing partner? No problem. The enclosed CD contains both parts recorded separately so you can play either part along with the other on the CD!

**CRITIQUE**

**Primus**

**Animals Should Not Try To Act Like People**

By Michael Parillo

TIE MCLANDER, it's good to have you back.

Brain "Brain" Mclander did a worthy job as Primus's timekeeper from 1997 to 2000. But now it's like Tim never left. The new five-song EP portion of the Animals package bursts with vitality— if not exactly originality—as the thrilling synergy between Les Clapp, Larry Landa, and Alexander returns undiminished by time. Tim's thick-toned giggles of tums sounds better than ever, and his precise, prog-leaning touch complements Claypool's percussive basslines like no other drummer's could.

The EP is paired with a funhouse DVD that contains fourteen kooky videos and live/ backstage footage of varying quality. Highlights include a brief montage of Claypool—no rhythmic sleuth—playing drums, as well as a circus-like clip for "Mr. Krinkle" that gives the costumed Flaming Lips a run for their money.

If you'd like to cop Alexander's pants—or just watch him frolic uninterrupted on his vast playground of a drumset—check out his sound DVD. It's pure performance, featuring unaccompanied Primus and Lavender beats. Don't skip the commentary track, though he takes a while to get boblin comfortably. Alexander offers fascinating insight into his craft. The bummer is that his pedal work isn't shown enough; a mistake with someone so fleet of feet.

---

**Dimmu Borgir**

*Death Cult Armageddon*  

By Jeff Perlis

With their corpse makeup and demonic album titles, many black metal bands seem cartoonish on the surface. But don't judge Dimmu Borgir's latest full-length by its cover and title. The Norwegians offer a savagely creative, almost elegant mixture of black, death, and thrash, and often garnish it with gorgeous segments performed by the Prague Philharmonic Orchestra. While vocalist Shagrath gurgles distinctively and Silenoz and Galder unleash their tremendous guitar assault, Nicholas Barker provides magnificent, clever drumming. His chops crash and boom on the sprawling "Progenies Of The Great Apocalypse" and the operatic "Blood Hunger Doctrine," and frolic rapidly on the chilling "Cataclysm Children." Pulverizing, profound, and fun.

---

**Deep Purple**

*Bananas*  

By Mike Haid

Although the instrumental adventurism of legendary progressive metal-boogie band Deep Purple has mellowed with age, the quality of composition is still top notch, and Ian Gillan's vocals are as strong as ever. And Ian Paice remains one of the most musical and gifted drummers in rock history. On Bananas, classic British rock's great lefty continues to lay down a mean groove while sprinkling his flashy trademark fills sparingly. These rock icons continue to prove that you're never too old to rock 'n' roll with musical dignity.

---

**Senses Fail**

*From The Depths Of Dreams*  

By Mike Lang

New Jersey quintet Senses Fail play New Found Glory-ish emo with a heavy edge. While the style on their EP may be nothing new, the confident drumming of Dan Trapp surely is. Trapp delivers a rock-solid performance that displays both considerable chops and a sensitive ear. Between his lightning-quick snare drum bursts and his choppy, driving hi-hat work, it's obvious that Trapp has all the tools, which is exciting because he's only sixteen years old. Having already mastered punk drumming, Dan's future is downright scary. Given a few years to grow and find his own voice, Trapp could become a monster.

---

**Greg Howe/Victor Wooten/Dennis Chambers**

*Extraction*  

By Mike Haid

This all-star fusion trio goes way off the musical hook with excellent, high-energy instrumental compositions and chops to match. Dennis Chambers goes ballistic on the intro of the title track, and never lets up from there. Along the way, the band blasts a fresh new hole through '70s-era Tony Williams track "Proto Cosmos," and Chambers unleashes a maniacal solo on the Latin-flavored "Contigo." There's some serious funk going down on this disc too, and as always, Chambers is impressive with his infectious feel and brilliant creativity.

---

**Shelly Manne, Cal Tjader, Willie Rodriguez**

**SIGNIFICANT REISSUES**

Shelly Manne's drumming was a study in sophisticated swing. Rarely has that been made clearer than on Yesterdays, a live recording from 1960. Accompanied by his killer quintet that included Russ Freeman and Monty Budwig, it sounds like a night as usual for these cool jazz maestros as they cruise through the breezy swing of "Cub Col," then stand back as Manne navigates the blistering brushwork of "Polisiana" and a slathering, snappy solo on "Straight, No Chaser." (Pablo)

Cal Tjader's 1977 release Cuban Fantasy is also taken from a concert performance, its scalding Latin rhythms and tangy vibraphone improve the polar opposite of Manne's cool style. With Tjader's atmospheric vibes and the band's electric bar room energy, Cuban Fantasy scorches, from the eye-watering funk of "Guarabo" to the slow burn mambo "Manuel Delgado." Drummer Pete Rizzo is Tjader's secret weapon, a torrid showman with a merciless red-hot time feel. (Fantasy)

The Willie Rodriguez Jazz Quartet's 1963 date Flatpacks brings swing and Latin together in the briskly popping stick work of the bandleader, who was also an in-demand drummer with Jimmy Smith and Oliver Nelson. Flatpacks has a 1950s period feel, but Rodriguez's spicy drumming sounds timeless. (Minton)

Jason Crosby
Four Chords And Seven Notes Ago (Avidite House)

On Four Chords..., Jason Crosby shines on keys, trumpet, and violin, and his playing and writing combines the eclectic flair and sophistication of the new Southern fusion. Drummers JEFF SIEE and DAVE DIAMOND are game for all the different spins: The first three songs veer from avant-garde to smooth Southern soul to Zappa-ish Latin, yet somehow the stew works. Diamond’s sticking on “Out Of The Box” is pure Headhunters funk, laying perfectly with Crosby’s clarinet. And Sipe is a premier jamming, conjuring drummer who can burn on a dime (“Bumblebut”), sneak in the subtle licks (“Georgia’s Conscience”), and lay down a mean groove (“Love’s In Need”).

Robin Tolleson

HEAVY WORLD
Neurosis & Jarboe, Ill Niño, Ephel Duath, Children Of Bodom, King Diamond

In the world of Heavy, it’s often the adventurous, weird stuff that deserves the most acclaim. Neurosis have been banging their tribal soundscapes since 1985, and drummer JASON ROEDER and his percussion cohorts don’t let up on Neurosis & Jarboe—a wildly creative collaboration with the silky-voiced former Swans chanteuse.

(Mostly Recording)

Neurosis’ Latin-flavored Confession also offers a cool tribal feel—especially through the drumming of DAVE CHAVARRI and percussionist DANNY COUTO—and the results are melodic and menacing.

Jazzy horn arrangements merge with raging extreme metal, prog oddness, and other disparate elements on Italian band Ephel Duath’s aptly titled The Painter’s Palette, so don’t miss DAVIDE PIOUSAN’S colorful strokes.

On Hate Crew Detour, Finnish quintet Children Of Bodom offer a more traditional approach—think a revamped Malmsteen—yet there’s plenty of insane minstrelsy elsewhere.

Speaking of insane...makeup-clad, operatic-voiced King Diamond and drummer MATT THOMPSON unleash some of their finest thrash yet on The Puppet Master. (Metal Blade)

Jeff Perlah

Michael Bettine
Stars Show The Way / Labyrinth
(Mike Batt nettine)

MICHAEL BETTINE is a percussionist specializing in metal, and these CDs focus on his art through two different solo performances. Labyrinth, subtitled Music For Gongs, consists of nine beautifully hypnotic tracks. The music was composed with his particular gongs in mind, a collection thirty years in the making. From the opening majestic washes of “Ritual—Ascension” to the high-pitched melodies of “Medicine Wheel,” the entire sound spectrum is covered. On Stars Show The Way, drums and other percussion also make appearances. The variety of instruments used here is staggering. Whether it’s melodic tom patterns or Asian metal percussion figures, these twenty-five pieces possess an undeniable immediacy and intensity. Both CDs are excellently recorded, with a clear sound that shows off the instruments quite well. Sinking into Bettine’s sound world is fascinating and inspiring. (www.pureorg.com/vbattine)

Martin Patmos

Om Trio
globalpositioningrecord (Capitol)

From the opening beats of “Shant,” globalpositioningrecord sounds like a wheel is about to fall off and a gear is sticking. And it grooves like mad. This band digs in at the plate—they don’t always hit the ball out of the park, but they take a big rip at it. The trio isn’t always in a hurry to move on from a good thing, which is also nice. Drummer ILYA STEMKOWSKY drives over the clever changes of “Discrepancy” with a straightforward groove, waiting until the end to drop a huge fill. He plays it straight and funky on the highly syncopated “L,” hands loose, big and quick too. Be alert for the rocking hidden track, a popular, well-chosen cover.

Robin Tolleson

Vida Blue
The Illustrated Band (Sire)

On its second album, trio Vida Blue enlists Miami’s Spam Allstars, a fiery horns/percussion/DJ group, to add extra punch. The Spam hits the spot: Illustrated Band is much more powerful than Vida’s unfocused 2001 debut. This time it’s a jammy, long-form funk party, and keyboardist/leader PAGE McCONNELL (of Phish) plays the classy host, laying back and letting his gifted guests get acquainted. RUSSELL BATISTE clearly relishes his connection with Spam timbalero TOMAS DIAZ and percussionist LAZARO ALFONSO, and their crackling rhythms are wisely spotlighted. The bell of Batiste’s ride gets a serious workout—from syncopated funk patterns to Afro-Cuban cascara.

Michael Parillo

TRES LATINO ROCKERS
Bat Makumba, Radio Mundial, Café Tacuba

Bat Makumba are culturally schizophrenic on their self-titled CD. For starters, the band sings in three languages—Portuguese, Português, and Spanish—and spins plenty of polyrhythms. Styles such as ijexa, baiao, samba-reggae, Afro-Brazilian Berenvento, and ska have equal settings at this table. Percussionist EMILIANO BENVENIDES, four kit drummers, and other skin slappers make this a joyful listening experience.

Drummer ANDY SANESI and percussion cohorts GIANNI MANO, GERALDO FLORES, and FERNANDO SUBRATAS explode with Afro-Latin-funk on Radio Mundial’s La Raíz. The 6/8 shuffle of “Cuarto Sin Ventanas” plays like a good Sling tune. It’s accessible yet rich in rhythmic layers. (www.radionmundial.com)

After reviewing the sonically lush Cuatro Caminos, we know why Café Tacuba is being called Mexico’s answer to Radiohead. Guest drummers VICTOR INDRIZZO and JOEY WARDNER lay the foundation, allowing the band to freely saturate the heady upper registers. Waronker’s crafty hi-hat, cymbal, and bass drum work complement and then rightfully overtake the static programming on ambient gem “Puntos Cardinales.” Beat placement is crucial here. (MAW Records/Universal Music Mexico, www.cafetacuba.net.mx)

VINNIE COLAIUTA
The UnReel Drum Book
(0730B)
This is what the drumming world has been waiting for... The first-ever book featuring Vinnie Colaiuta. The book includes transcriptions and charts from Randy Waldman's UnReel CD along with audio examples of the solo excerpts transcribed and slowed down so every drummer can explore the work of this master drummer. As a bonus, this groundbreaking book includes the Concord Records release of UnReel and two tracks from that CD remixed without drums on the educational CD that accompanies the book. The author, Marc Atkinson, also includes a unique method, allowing the student to better understand advanced polyrhythmic concepts that have become Vinnie's trademark.

GIOVANNI HIDALGO AND HORIZON "EL NEGRO" HERNANDEZ

Traveling Through Time
DVD • (90686-3)
This new DVD from two of the greatest Latin percussionists of all time features stellar performances and incredible breakdowns from the CD of the same name.

WATCH FOR NEW RELEASES THIS YEAR FROM
JOHNNY RABB, VIRGIL DONATI, CARMINE APPICE, DENNIS CHAMBERS, RUSS MILLER, RICHIE GAJATE-GARCIA, AND MANY MORE!
Along with an explosive band that includes percussionist ARTO TUNCBOYACIYAN and bassist/vocalist RICHARD BONE, Mike Stern’s latest album features the fiery virtuosity of Vinnie Colaiuta. Stern’s maturation as a songwriter, Colaiuta’s expansive rhythms, and Bone’s serenely organic approach make this one of the best albums of the guitarist’s career. And Colaiuta gets to blow over speedy sambas, triumphant rock grooves, whisper-quiet brushed ballads, raucous reggae, and aristocratic. In fact, Vinnie’s drumming here equals his performance on Randy Waldman’s Wigged Out, and far surpasses the boring Jing Chi Live At Yoshi’s.

Mike Stern
These Times (Veej)

Renowned for his silky presence on many classic Miles Davis recordings, JIMMY COBB has recently surfaced as the leader of an exceptional quartet, first heard on 1998’s Only For The Pure Of Heart. Cobb revives that band for the equally mellow but propulsive bop of Cobb’s Groove. And groove is the key word here, as the quartet dances and improvises over the master drummer’s gentle phrasing and airy timkeeping. Cobb’s solos are brief and musically concise throughout, like wallet-sized snapshots that encompass his enviable drumming experience in tasty bite-sized moments.

Jimmy Cobb’s Mob
Cobb’s Groove (Coffeine)

RUSH
In Rio (Coffeine/Conig/Here/2ae)

Let’s put the Rush phenomenon in perspective. The band was formed in 1969 and released their first recording in 1974. Now they release their first live concert DVD, filmed at Maracana Stadium in Rio de Janeiro on the final night of the (66-date) 2002 Vapor Trails tour (one of the highest grossing tours of the year) in front of 60,000 fans (the largest audience in Rush concert history). The extraordinary three-hour concert (disc one) features the cream of the Rush catalog (28 songs). Disc two includes an insightful and amusing documentary in which the legendary NEIL PEART explains the basis of his "O Bearer" drum solo. Peart’s energy,原始性，well-constructed, and entertaining solo is featured a second time, with multi-angle viewing, on disc two. Colorful liner notes are also written by Peart. This DVD set is a Rush/Peart treasure trove. Just one question: Who let the guitar player mix this thing? The drums and vocals are buried and unbalanced in the mix. Come on, this is Neil Peart!

Mike Haid

PRETENDERS
Loose In L.A. (Eagel Voice)

MARTIN CHAMBERS is one of the world’s greatest rock drummers, at least according to the producers of this concert recorded at the Wiltern Theatre in Los Angeles in February 2003. After viewing this 140-minute DVD packed with familiar and new tunes, you might agree with that assessment. Chambers easily slips into reggae, country-rock, and punk, while kicking it up a notch on classics “Mystery Achievement” and “Message Of Love” with infectious, hard-driving, syncopated beats. Chambers really spans his toms and cymbals, though side views reveal his use of ghosting and subtle sticking patterns. It’s a great package (hi-def., 5.1 surround sound), but buyers beware: band-leader Chrisia Hynne, as she’s known to do, speaks her mind, sometimes using explicit language.

Will Romano

HANDS ON
GIOVANNI HIDALGO is featured on two new instructional hand-drum DVDs. On In The Tradition he explains the four basic conga sounds, tuning techniques, and danzón, son montuno, bolero, and charanga patterns. Gio emphasizes a calm and peaceful mental attitude while playing, “so that you can analyze what you’re doing while you play.” He also speaks simply about dedication in learning to play and intensity in performance. Congo Virtuoso features Hidalgo with a band featuring IGNACIO BERROA, Danilo Perez, and David Sanchez. Here he starts with just one drum, explaining the evolution of the timba and how bass parts are played on the congas. He adds the timbales and panderos, and discusses the jump to three congas, the rhythms of Puerto Rico, and the rudimentos on congas. (Werner Bros.)

The very personable and focused RICARDO MONZON leads us through Basic Afro-Cuban Rhythms. Monzon explains 32 son clave, rhumba clave, and 6/8 clave, and how slight displacements make a big difference. You will be clapping along, then playing along, with the conga timba and timbale cascara patterns. (Bertla)

JOHN YOST Teaches: West African Rhythms is very interactive, with no trills. Yost is selling the samba, not the sizzle, and there’s plenty to learn here. Viewers are given choice of instrument (samba or dundundu, rhythm, and speed). Wisely, the dundundu sections are seen from out front and from the player’s view. And the dundundu sections offer separate parts for the dundundu, sangban, and kankan. (www.yostmusic.com)

STEVE THORNTON’s Rhythmic Construction Of World Music comes off a lot like a Latin Percussion commercial. Thornton explains the instruments and rhythms well—the samba with its pandeiro, agogo bells, cuica, and surdo—as well as playing samba on congas, timbales, and “never instruments for a little bit of Latin flavor to the funky samba.” Unfortunately, co-host (and LP founder) Martin Cohen seems impatient, and his comments at times take away from the flow. (Latin Percussion/Werner Bros.)

Robin Tolleson

Correction
Last September we ran a review of Sworn Enemy’s As Real As It Gets album, which in its liner notes lists drummer Paulette Antignani, who we credited with playing drums. In actuality Timothy Mycek, who is currently touring with Metal Blade Records band Ubeath, recorded the tracks. Our apologies to Tom and to Paulie (a slammin’ player in his own right).

Dunnett Classic Drums

Www.dunnett.com
Tony Thompson, whose playing helped to define the sound of disco in the 1970s and pop/rock in the 1980s, died this past November 12 at the age of forty-eight, following a battle with cancer. He was featured on MD’s December 1985 cover, and in the August 2001 Update department.

As a young drummer, Tony was a fan of Ginger Baker and John Bonham, leading him to appreciate a big, powerful drum sound. Later he encountered the playing of Billy Cobham with The Mahavishnu Orchestra, which got him heavily into fusion drumming. He also studied with Mahavishnu alum Narada Michael Walden.

Somewhat ironically (considering his rock and fusion background), Tony’s first major success came in the 1970s as a member of Chic, one of the biggest dance bands of all time. Originally criticized by band co-leader/guitarist Nile Rodgers for playing too much, Tony was taken under co-leader/bassist Bernard Edwards’ wing. Edwards helped Tony to redirect his energies toward pure groove. In return, Tony helped take Chic to the top of the dance charts with such hits as “Dance, Dance, Dance (Yowsah, Yowsah, Yowsah),” “Good Times,” and the classic disco anthem “Freak Out.”

After leaving Chic in the early 1980s, Tony gained success as a session drummer, lending his talents to recordings by Sister Sledge (Love Somebody Today), Debbie Harry (Kookoo), Rod Stewart (Out Of Order), Jody Watley (Jody Watley), Mick Jagger (She’s The Boss), David Bowie (Let’s Dance), and Madonna (Like A Virgin).

Eventually, Tony’s oversized drum sound and powerful groove earned him a reputation as one of pop/rock’s leading drummers. This, in turn, led to his participation in a 1985 all-star project involving members of Duran Duran and vocalist Robert Palmer. Named for the studio in which they recorded, The Power Station—propelled by Tony’s distinctive sound and deep groove—scored hits with “Some Like It Hot” and a cover of T. Rex’s “Get It On (Bang A Gong).” Tony also appeared on Palmer’s solo hit “Addicted To Love.”

Tony’s most high-profile performance took place in 1985, at the legendary Live Aid concert at RFK Stadium in Philadelphia. Realizing a boyhood dream, Tony served as co-drummer (with Phil Collins) for a reunion performance by the members of Led Zeppelin. In 1986, Tony joined Jimmy Page, Robert Plant, and John Paul Jones again for some recording sessions in Bath, England, to explore the idea of a group re-formation. The promising project was halted when Tony was injured in a serious car accident.

In recent years Tony had been dividing his time between doing recording projects and screening potential songwriters for a production company. His session activities included Duran Duran’s Thank You (1995), Power Station’s Living In Fear (1996), and eight tracks on Nine Inch Nails’ The Fragile (1999).

The Tony Thompson Fund has been established to help Tony’s family with medical bills. Tax-deductible contributions may be sent to The Tony Thompson Fund, c/o One Incredible Family, 13455 Ventura Blvd., #224, Sherman Oaks, CA 91423. For more information, go to www.tonythompsonfund.com.

Don't settle for anything less!
Montreal Drum Fest 2003

The eleventh annual Montreal Drum Fest, held this past November 7–9, presented drum and percussion styles from around the globe. As usual, the venue was the Salle Pierre Mercure in downtown Montreal, Quebec, Canada.

**Friday, November 7**

Fest organizers Ralph Angeillo and Serge Gamache launched the festival with a Friday-evening concert featuring Mike Portnoy & Hammer Of The Gods in a tribute to Led Zeppelin. The musical and physical resemblance was uncanny, what with vocalist Daniel Gildenlow's open shirt revealing a frail Robert Plant physique, Paul Gilbert's Jimmy Page-ish curly wig and dual-neck guitar, and bassist Dave LaRue's perfect John Paul Jones demeanor. Portnoy's go-for-it spirit on his amber see-through kit—along with a Bonzo wardrobe including a bowler hat and white jumpsuit—contributed greatly to the Zeppelin vibe.

Opening for Portnoy were Quebec heavyweights Flo Mounier (Cryptopsy) and Ange Curcio, whose spectacular command of the drumset ranged from new punk to fusion styles.

**Saturday, November 8**

Local lads Mario Roy and Bruno Roy warmed the hall with a guided tour from Africa to America. Their performance included vocals, dancing, "face offs" on Taye Go Kits, and rousing drumset conversations.

Sergio Bellotti turned his spot into a performance/educational clinic, as befits a professor at Berklee College. His drumming was muscular, while his snare/hat patterns were sensitive and contemporary.

Justin Spencer began with a stunning vocal imitation of turntable scratching and ended with a barrage on rubber garbage cans, proving that there's art lurking everywhere.

Toronto legend Paul DeLong wowed the audience with his band The Code. Paul deftly negotiated the group's extraordinarily complex arrangements in what was, as they say in Quebec, a tour de force.

From behind the drumset, Vera Figueiredo took the audience from the Brazilian rainforest into the clubs and concert halls of the world. Jaws dropped at her unique presence, approach, and distinctive licks.

Puerto Rican all-stars Paoli Mejias, Javier Oquendo, and Marcos Lopez Ayala presented the liturgy of Latin percussion.

The fifteen-year old Ayala alone offered a treatise on how to play timbales.

Billy Ward's words of wisdom (which he interrupted with, "I gotta speak slower; I'm from New York City") were not lost on the predominantly French-speaking audience. "Be yourself," advised Billy. "Play all the tones at your disposal, but don't play more than is necessary." When Billy laid sticks to drum, the message was loud and clear.
Tommy Aldridge received a plaque from the Fest organizers in recognition of his long and stellar career in rock. The Black Oak Arkansas/Ozzy/Whitesnake vet then sat down at the drums and gave 100%—and then some. (He played with sticks and bare hands until, quite literally, he bled.) Tommy's cymbal flourishes and double bass drums were especially frightening.

Sunday, November 9

The winners of the Yamaha Rising Star contest were first up.

Giulio Pampena, Marc-Andre Gilbert, Emmanuelle Caplette, and Samuel Joly performed with a crack Quebec rhythm section, breezing through fusion and jazz tracks.

Pat Metheny’s Antonio Sanchez counseled the audience to develop chops—but not to be disappointed when they use only 30% of them on the average gig. “However,” he said with a winning smile, “I’m going to play 100%!” Antonio built up a spectacular solo, with phrases that increased incrementally in complexity.

Canadian session ace Randy Cooke tossed off some scary licks, then quickly admitted, “Those are things I never play.” He explained that in the course of a day in the studio, his agenda is simple: Play creatively, but not to excess. He admirably demonstrated this concept while playing to backing tracks.

JoJo Mayer seemed to be on a mission to prove how long a drummer could groove before breaking. Working in a predominantly drum ‘n’ bass genre, he motored forth without a single hesitation, flawlessly executing intricate variations that pumped up the excitement in the room.

The charismatic Mike Mangini seemed octopus-like as he traversed his uniquely symmetrical tom configuration. How he reached the Earth Ride to his extreme left, or pulled off those lightning-fast fills, remains a mystery. His credo, though, was obvious: Practice, practice, practice.

Gary Novak closed the Fest with an airy acoustic jazz set, featuring bassist James Genus and pianist Deron Johnson. Performing on a retro tangerine glitter kit, Gary reminded us that there is music yet to be made on the basic, four-piece drumset. The crowd obviously agreed, as evidenced by their standing ovation.

During the afternoon, tribute plaques went to Yamaha drum design guru Takashi “Hagi” Hagihara, master timpanist Louis Charbonneau, and Canadian drum icon Jerry Mercur of April Wine. Ralph Angelillo also asked the audience to observe a moment of silence in honor of Modern Drummer founder Ron Spagnardi.

Sponsors for the Montreal Drum Fest included AKG, Aquarian, Baobab, Beyerdynamic, Drum Workshop, Evans, LP, Paiste, Pearl, Premier, Pro-Mark, Regal Tip, Remo, Rhythm Tech, Sabian, Shure, Sonor, Tama, Taye, Trueline, UFIP, Vater, Vic Firth, Yamaha, and Zildjian Cymbals and Drumsticks.

Story by T. Bruce Wittet

Photos by Heinz Kronberger, except where indicated
Percussionist/composer Sarah Hommel was joined by percussionist Mino Cinelu (Miles Davis, Weather Report, Sting), drummers Victor Jones (Stan Getz, Freddie Hubbard, Michel Petrucciani), Victor Lewis (Dexter Gordon, Carla Bley, David Sanborn), and Richard Zukor (Dem Brooklyn Bums), and vibraphonist Bill Ware (Jazz Passengers, Club Bird All-Stars, solo artist) at CAMI Hall in New York this past October 5 to perform in A Sarah Hommel Drum All. The concert featured works written by Hommel for percussion instruments including drumset, timbales, timpani, vibraphone, marimba, xylophone, cajon, and African drums.

In addition to performing with her own jazz ensemble, Jazz Squad, Hommel is a member of the group Kinetic Drums. She has been awarded two National Endowment grants as a composer, and recently released a jazz CD called That Would Be Telling.

In “Dance One For Honi,” a piece written for four drumsets, Hommel set up a rolling pattern that served as a background to improvisational solos by Lewis, Jones, Hommel, and Ware. Later in the concert the musicians set up their instruments within the audience for Hommel’s composition “Little Luke Early.” Bill Ware’s vibe improvisations were posed against crashing statements from large drums and loud cymbals played by the other musicians. The location of the instruments and the arrangement of parts among the drummers made the music seem to surround the audience in a whirlwind of percussion sounds. Other highlights of the show included a virtuosic solo by Mino Cinelu in “Victor’s Lesson,” as well as Hommel’s surprise vocals on the calypso-flavored “This Is What My Friends Tell Me.” The concert was recorded for a CD that will be released later this year.

Stanton Moore And Ron Spagnardi Honored By Dunnett And Drumsmith.com

Stanton Moore (Galactic, Garage A Trois) has been awarded the Eric A. Bergquist award for excellence in education in the percussive arts by Ronn Dunnett of Dunnett Classic Drums Ltd. and www.drumsmith.com. The award was presented to Stanton on October 8 following a clinic in Vancouver, Canada.

Dunnett states, “This award recognizes contributions that professional drummers and teachers make above and beyond the call. Stanton has taken the clinic to a new level. His audiences are inspired by more than just an awesome display of musicianship. They take home a wealth of practical ideas, a better understanding of drumming from a historic perspective, and the sheer pleasure of spending time with an artist who is there for no other reason than to share his knowledge and love of drumming.”

From left: James Johnson and Carlos Vallejo (of Tom Lee Music, Vancouver, Canada), Stanton Moore, and Ronn Dunnett

The Eric A. Bergquist award is named for a pioneering Canadian teacher (and Ronn Dunnett’s friend and mentor). It came about after a group of drummers at online Internet forum www.drumsmith.com learned of the passing of MD editor Ron Spagnardi, and decided to make a contribution to the scholarship fund established in Ron’s name. “I was moved by that,” says Ronn Dunnett, “and I wanted to respond with something that would honor Eric and Ron.”

As part of the Bergquist award to Stanton Moore, Dunnett Classic Drums will make a cash contribution to the MD scholarship fund in Stanton’s name. Money raised through auctions and donations from drumsmith.com will also be included.

Yamaha “Guru” Retires

After more than thirty years guiding the destiny and design of Yamaha drums, legendary drum guru Takashi “Hagi” Hagiwara will retire on February 1, 2004 (his sixtieth birthday).

Raised in Tokyo, Hagi learned the virtues of craftsmanship from his silversmith father and seamstress mother. In his mid-twenties he entered the Yamaha fold, where he progressed quickly from retail to management. Hagi eventually settled in the drum division, where his inquisitive and creative mind helped to facilitate most of the innovations we associate today with Yamaha. These include ball & socket tom mounts, the legendary piano-lacquered Recording Custom drum series, the Maple Custom series, and the recently introduced Nouveau “quick change” lug, to name but a few.

Hagi is also revered for his dedication, warmth, and humor by hundreds of Yamaha artists who’ve enjoyed a personal as well as professional connection with him over the years. In 2001 Hagi was presented with Modern Drummer’s Editor’s Achievement Award in recognition of his long and distinguished career.

T. Bruce Wittet

A New KoSA

The new KoSA Academy has been established at 5457 St. Jacques West, in Montreal, Quebec, Canada as a year-round learning center for drumset players and percussionists. Programs of study include drumset (all styles), African, Brazilian, Cuban, Arabic, and hand drumming, and classical percussion. Students may choose to have private lessons, take group classes with rhythm sections, and be part of small ensembles, all of which are taught by some of the most respected players in the music community. The Academy will also hold masterclasses featuring world-renowned visiting artists.

In related news, the KoSA Cuba cultural exchange workshops and jazz festival will be held this coming April 25 to May 10 at the EL Senador resort in Cayo Coco. The annual KoSA International Percussion Workshop & Festival will be held July 26 to August 1 at Castleton State College, in Castleton, Vermont. For more information on these and other KoSA events, go to www.kosamusic.com.

Noto’s Turns 25

MD congratulates Michael Noto on the twenty-fifth anniversary of his Baton Rouge, Louisiana music shop, Michael Noto’s Music Store. Mike was included in Modern Drummer’s “Shop Owners: On Opening A Drum Shop” feature, way back in the June 1982 issue.

A Pro-Mark Incentive

Pro-Mark has announced their Pro-Points incentive program. Whenever a drummer buys a Pro-Mark product, he or she simply needs to cut the bar code off the package and save it. Each Pro-Mark product carries a point value that can be found by visiting our Web site, www.promarkdrumsticks.com, and clicking on the Pro-Points icon. Customers may redeem their points for wearable items such as hats, shirts, and jackets, as well as for accessory items like drumkeys and practice pads. They can even get their signature imprinted on twelve pairs of sticks.

Richard Wilson

In Memoriam

Drummer/teacher/composer Richard Wilson passed away on October 18, 2003. He was seventy-four.

As a drummer, Richard performed with such artists as Duke Ellington, Sarah Vaughan, Chet Baker, Don Ellis, Gary Peacock, and Buddy DeFranco. He also led his own National Endowment Orchestra, so named because he was the only drummer in history to win three National Endowment grants for composition. As a teacher, Richard's approach transcended the typical "licks" and "chops" of drumming. His exercises were complex, deeply musical, and really hard to play. He encouraged his students to see the L.A. Philharmonic perform modern, atonal works, in the hopes of expanding the students' overall musicality.

Richard never went out of his way to advertise himself as a big-name teacher. When asked about this, his response was, "If you're hip, you'll find out about me eventually." Yet his life story—which went far beyond the drums—was so incredible that, unless you knew him personally, you wouldn't believe it. Wilson survived everything from plane crashes to cancer, and kept coming back for more. He was a brilliant and unique individual who will be missed by all of us who knew him.

David Ingraham
(Tribe Of Gypsies, Bruce Dickinson, Young Dubliners)

Editor's note: Richard Wilson was profiled in the Teachers' Forum department of the April 1996 MD.

Richie LePore

Drummer/percussionist Richie LePore died this past June 20 following a long period of ill health. LePore was a first-call session percussionist in Los Angeles from the 1980s through the 1980s, contributing to many album projects and film scores. In addition, he was in demand for tours with such artists as Bette Midler, Frank Zappa, and Anne Murray, and with shows like Sugar Babies and The Ice Capades.

LePore was known for performing on non-traditional instruments with renowned composer Harry Partch, and on classical percussion with the L.A. Philharmonic. He was also a dedicated teacher who spent many years on the faculty of the Dick Grove School Of Music in Los Angeles, the Hartt School Of Music in Hartford, Connecticut, and other institutions.

In his later years Richie became wheelchair-bound, but continued to play and teach. He worked with the Lemelson Assistive Technology Development Center at Hampshire College, helping them to develop a special device for playing the bass drum without a leg. A scholarship fund at the Hartt School Of Music has been established in Richie's name. Information can be obtained from Michael Augeri, 60 Pineridge Road, Torrington, Connecticut.

Michael Augeri
Who's Using What

New Evans drumhead endorsers include
Morgan Rose (Sevendust, right), The Reverend (Avenged Sevenfold), Jason Bittner (Shadows Fall), Francis Mark (From Autumn To Ashes), Scott Reeder (Fu Manchu), Tommy Decker (Spineshank), and Matt Byrne (Hatebreed).

Adam King (Jason Mraz) is a new Meinl cymbal artist.

This year’s MTV Headbanger’s Ball tour features three prominent rock bands whose drummers endorse Pro-Mark sticks. The bands are Lamb Of God (Chris Adler), Killswitch Engage (Adam Dutkiewicz), and Shadows Fall (Jason Bittner). Pro-Mark will be providing hundreds of pairs of sticks imprinted with the bands’ logos to be given away from the stage and during radio promotions. In addition, the bands will be autographing sticks that will be given away to a few lucky fans.

Neil Peart (Rush) is now a Sabian cymbal artist.

Quick Beats

Charley Drayton
(Divinyls, Keith Richards & The Xpensive Winos, sessions)

What are some of your favorite grooves that you’ve recorded?
I played drums and bass on "Human On The Inside" with divinyls, on "Rainbow" by a new artist, Josh Bennett, and on "I Let A Good Man Go" by Barbara Lynn.

What are your favorite TV show themes?
Courageous Cat, the station sign off (silence), and Speed Racer.

If you could put together an imaginary superband, who would be in it?
Lately my superband has been Billie Holiday, Art Blakey, Lisa Coleman, and Freddy Stone, with me on pedal steel, baritone sax, and sometimes bass and drums. Jimi Hendrix can drop in anytime he wants. Same policy applies for Johnny "Guitar" Watson, Grady Tate, and Billy Hart.

What song makes you say, “I wish I played on that one”?
I would have liked to play guitar on "Harmony" by Sly & The Family Stone, and drums on "The Wanderer" by Dion and "Dancing In The Street" by Martha & The Vandellas.
WIN THOMAS’ DRUM SET
THE THOMAS LANG CREATIVE CONTEST

Every winner will receive a DVD containing a performance by Thomas Lang’s Creative.

AQUARIAN® SNARE DRUMHEADS
WORLD CLASS FAVORITES

TEXTURE COATED w/ SATIN FINISH™
Traditional sound and feel. The Satin Finish resists “chipping” and outlasts all other conventional coatings.
* Also available with a Power Dot™ underneath.
* Also available with a Studio-X™ ring underneath.
* Also available with a Power Dot™ & Studio-X™ ring underneath.

MODERN VINTAGE™
The look, feel and warm sound of a calfskin drumhead. Preferred by jazz drummers.

HI-ENERGY™
Favored by heavy hitters who want a head with a "sharp attack" and great durability.

NEW ORLEANS SPECIAL™
Great for New Orleans Funk and Second Line drumming.

POWER-HOUSE™
A special Kevlar® head with amazing strength and a sensitive snare response. A favorite with Gospel drummers.

Advanced Design = Advanced Performance

Rack 'Em Up!

Houston drummer Tim Qualls describes his setup as functional, adaptable, and esoteric. It's a 1991 Tama Artstar II kit with a custom blue-over-purple lacquer finish hand-painted by Tama. Tim had the tom rims powder-coated in black for added dramatic effect.

Other components of the kit include a 6x10 Pacific snare, a 7 1/4x14 Sonor HiLite snare, an 8" LP mini timbale, fourteen Sabian cymbals, an 8" Paiste bell, 15" Zildjian New Beat hi-hats, and LP Rencan and Wuhan China cymbals. The kit is mounted on a Gibraltar rack, with Yamaha, Tama, and Gibraltar cymbal boom arms. A Yamaha hi-hat and a Tama Iron Cobra double pedal round out the hardware. Remo coated Emperors are on the tops of the toms (and the 10" snare), with Ebony Ambassadors on the bottoms. The main snare has a PowerStroke 3 batter. The bass drum is fitted with an Evans EMAD batter and a Remo custom color-matched front head.

"The rack system makes it easy to add or drop gear as is dictated by the style of music or the venue," says Tim. "I use this kit for session work on everything from zydeco to country, fusion, and alternative."

PHOTO REQUIREMENTS

1. Photos must be high-quality and in color. 35mm slides are preferred; color prints will be considered; Polaroids not accepted. 2. You may send more than one view of the kit. 3. Only show drums, no people. 4. Shoot drums against a neutral background. Avoid "busy" backgrounds. 5. Clearly highlight special attributes of your kit. Send photo(s) to DrummKit Of The Month, Modern Drummer, 12 Old Bridge Road, Cedar Grove, NJ 07009-1298. Photos cannot be returned.
NO MATTER WHAT HAPPENS DURING THE DAY, NOTHING CAN BEAT PLAYING A LIVE SHOW IN FRONT OF THE BEST FANS IN THE WORLD, ON THE BEST DRUMS IN THE WORLD.

Linkin Park’s Rob Bourdon loves to play live on Gretsch Drums -
18 X 22 bass, 8 X 10 and 9 X 12 mounted toms,
16 X 16 and 16 X 18 floor toms,
5 X 14 snare in Custom Graphic Finish.

play what you love
